PROFESSIONAL SUMMARY

Appian-certified Software Engineer with over 7 years of experience delivering scalable, high-impact software solutions that enhance business efficiency and automation. Proficient in the full software development lifecycle (SDLC) and end-to-end project management, with expertise in Agile methodologies, including SCRUM, and Test-Driven Development (TDD). Experienced in leading cross-functional teams in fast-paced, deadline-driven environments while optimizing workflows through automation platforms such as Appian (including version 24.X), PowerApps, and Power Automate. Skilled in advanced SQL query development, code reviews, debugging, and producing comprehensive technical documentation to ensure high-quality, maintainable solutions.

TECHNICAL SKILLS & FREELANCING PROJECTS

- Programming Languages: Java, JavaScript/ES6, Swift, C#, C++, C, PHP, Assembly, Objective-C
 - Mobile & Cross-Platform Development: Ionic, Flutter, React Native
 - Database Technologies: MySQL, SQL, NoSQL
 - Low-Code & Cloud Platforms: Appian SAIL, PowerApps, Azure, AWS
 - Frameworks & Libraries: NET Framework, ASP.NET, React.js, Angular JS, Angular 7, Redux
 - Web Development: HTML5, CSS, XML, SOAP, Web Services, MVC, Node.js
 - Version Control & DevOps: GitHub, GIT, Jenkins
 - Testing & Development Tools: XCode, NetBeans, Eclipse, Visual Studio Team System (VSTS)
 - Freelancing Projects: Phone Contacts, Block System, Parking Application, E-commerce Application- Blog Web Application, Smart Home Application, Facebook application, Recommendation App using AI system, Packman, Tic tac-toe, Painter, Maze Runner.
-

PROFESSIONAL EXPERIENCE

MiFi Source

November 2024 - Present

Application Architect

Washington, DC

Key Responsibilities:

- Appian Design and Architecture: Designed scalable and secure Appian applications, aligning with enterprise standards to streamline workflows and enhance operations.
- System Integration: Integrated Appian applications with legacy systems and external platforms using REST APIs for seamless data flow and efficiency.
- Team Leadership: Mentored cross-functional teams, conducted code reviews, and established best practices to deliver high-quality Appian solutions.
- Innovative Solutions: Pioneered JSON-to-SAIL form conversion, reducing development time and improving scalability.
- Global Collaboration: Coordinated with teams across multiple countries to deliver impactful solutions for clients in pharmaceutical and financial industries.
- CI/CD Implementation: Introduced DevOps practices with tools like Jenkins and Selenium for automated testing and deployment.

PricewaterhouseCoopers

April 2021 - October 2024

Lead Solutions Architect

Washington , DC

- I led agile development teams of 40+ across four countries, implementing DevOps practices to streamline the delivery of automation workflows and data models on PowerApps and Appian, driving significant compliance and efficiency improvements. I designed intuitive user interfaces using wireframes and prototypes to optimize workflows and usability. Additionally, I developed scalable web applications with JavaScript and Angular, improving data flow and front end performance, while leveraging Azure DevOps for seamless CI/CD integration and continuous feature delivery.

Key Projects:

- Interactions Hub: Led development of a low-code Appian app for healthcare providers, enhancing real-time communication and patient management for clients across five countries. Technologies: Appian, JSON, SQL, REST APIs, GenAI, Agile Methodologies.
- Investments Management System: Automated workflows for a global organization managing \$100M+ in funds, cutting manual tasks by 30% using Power Automate. Technologies: PowerApps, Power Automate, JSON, SQL, REST APIs, GenAI, Agile Methodologies.
- Data Analytics Web App: Built a web app with ETL processes and interactive dashboards for real-time business insights. Technologies: JavaScript, SQL, HTML5, Node.js, D3.js, GenAI, Agile Methodologies.
- Revenue Growth Management: Developed a platform to optimize pricing and forecasting with advanced analytics and GenAI. Technologies: PowerApps, Dataverse, Power BI, JavaScript, REST APIs, GenAI, Agile Methodologies.
- Spend Categorization: Created a PowerApps solution for automated expenditure categorization, improving financial visibility and reducing manual effort. Technologies: PowerApps, Dataverse, Angular, REST APIs, GenAI, Agile Methodologies.
- Enterprise Products: Streamlined product management across channels, boosting sales and customer satisfaction. Technologies: Java, PowerApps, Power Automate, SQL, REST APIs, Microservices, Agile Methodologies.
- Mustang Cat: Developed a custom app for equipment rental and sales management, enhancing efficiency. Technologies: Java, PowerApps, SQL, React, REST APIs, Agile Methodologies.
- Procurement Survey: Built a platform for vendor feedback, improving procurement strategies. Technologies: PowerApps, Power Automate, SQL, REST APIs, Data Visualization Tools, Agile Methodologies.

Tech Tammina

March 2020 - April 2021

Appian Developer

Chantilly, VA

- Acted as the primary contact for mission-critical BPM applications.
- Developed BPM systems using Appian, Java/J2EE, and MySQL.
- Conducted root cause analysis for bug fixes and implemented code changes.
- Designed process models and custom interfaces using Appian.
- Managed the full SDLC, improving existing systems and adding new functionalities.
- Provided technical assistance and participated in Agile activities, including sprint planning and retrospectives.

Mass Steel

Jan 2017 - Feb 2019

Application Developer

Alexandria, EGY

- Designed architecture for applications on handheld devices, ensuring data synchronization with central servers.
- Managed web application strategy and provided training on Java programming and J2EE architecture.
- Led software development projects across multiple functional areas, including Safety, Quality, and HR.
- Developed an e-commerce storefront to facilitate sales and integrated legacy systems with modern interfaces.
- Documented software changes in compliance with Sarbanes-Oxley requirements.

CERTIFICATIONS

- International Product Manager (AIPMM), Appian Certificate, Microsoft Power Platform, Web Development, Java, Android, Smart Home

EDUCATION

Master's in Information Systems & Cyber Security

Aug 2019 - Dec 2020

ECPI University

Manassas, VA

Associate Degree in Application Development & Digital Marketing

Nov 2018 - March 2019

Information technology Institute

Alexandria, EGY

Bachelor's in Computer & Telecommunication Engineering

Feb 2013 - June 2017

Alexandria University

Alexandria, EGY
