

Ajith Katukuri
QA Automation Engineer
Email: ajiths.sdet@gmail.com
Phone: 940-354-0225

QA Automation Engineer with 9+ years of experience in comprehensive testing of various applications. Strong knowledge in SDLC and STLC life cycles. Good at developing Test Cases, Test Plan, and Automating the scripts using Java, Selenium, and Cucumber with gained expertise in various domains like Oil & Gas, Telecom, Finance, and Retail.

PROFESSIONAL SUMMARY:

- ❖ Strong knowledge on all phases of SDLC and STLC life cycles and working experience on Functional, Integration, End-to-End, Sanity and Regression testing.
- ❖ Involved in critical testing to ensure the stability and reliability of diverse applications.
- ❖ Collaborated closely with cross-functional teams to align testing efforts.
- ❖ Proficient in Salesforce CRM administration and configuration
- ❖ Strong understanding of Salesforce platform features and capabilities
- ❖ Experience in developing and executing test plans and test cases
- ❖ Familiarity with Salesforce testing tools Selenium,
- ❖ Excellent communication and collaboration skills
- ❖ Attention to detail and ability to prioritize tasks effectively
- ❖ Worked on Data Driven, Keyword Driven and Behavior Driven Frameworks and knowledge on Hybrid Models.
- ❖ Expertise in Java and JavaScript, Selenium WebDriver and WebDriver.IO, REST Assured, Maven, Gradle, and Test NG.
- ❖ Created CI/CD pipelines using Jenkins and builds to trigger Smoke and Regression Tests.
- ❖ Leveraged Bitbucket and GIT as repository hosting services to manage version control effectively.
- ❖ Experience working on SOAP UI and Postman for Web services and API testing.
- ❖ Conducted thorough database validations using SQL queries, ensuring data integrity and accuracy.
- ❖ Experience in configuring device emulators and simulators as well as real devices for running Appium tests, ensuring compatibility across different device configurations.
- ❖ Competent in creating reusable test modules and components within the Tosca framework to maximize test coverage and maintainability.
- ❖ Worked extensively on Salesforce lightning and cloud applications.
- ❖ Good at logging and tracking defects using JIRA, Rally, and PMO.
- ❖ Experience working in Agile and Waterfall methodologies.

TECHNICAL SKILLS:

Methodologies	Agile, Waterfall, SDLC, STLC
----------------------	------------------------------

Artifacts	Test Strategy, Test Cases, Test Plan, RTM, Test Summary Report, Bug Report
Automation Frameworks	Testin Data Driven, Hybrid, Behavior Driven, Modular, Keyword Driven, Page Object Model, WebDriverIO, TestNG
Automation Testing Tools	Selenium WebDriver, Cucumber, Tricentis TOSCA, Appium
Languages	Java, JavaScript, C, C#, HTML, XML
Databases	SQL Developer, MySQL Workbench
IDE	Eclipse, IntelliJ, Visual Studio Code
Build & Integration Tools	Maven, GIT, Bitbucket, Jenkins
Bug Tracking Tools	JIRA, Rally, HP Quality Center, PMO

WORK EXPERIENCE:

Client: Charles Schwab Location: Westlake, TX Present Role: QA Automation Engineer	May 2024 to
---	--------------------

Responsibilities:

- ☐ Analyzed Business Protocol Specifications and System Requirement Specifications.
- ☐ Extensively worked on Behavior Driven Development (BDD) automation framework using Cucumber and Java on the IntelliJ platform.
- ☐ Developed BDD scripts using Gherkin language, creating feature files for different Salesforce functionalities. Designed reusable methods in step definition files and managed XPath's in YAML files.
- ☐ Created functional test cases based on User Story acceptance criteria, tested them on different profiles, documented results, and attached them to corresponding User Stories.
- ☐ Conducted testing on Salesforce objects such as Leads, Opportunities, Accounts, Contacts, Loans, Product Packages, and Financial Accounts across various profile types.
- ☐ Involved in testing Account-Account Relationships, Account-Contact Relationships, Financial Account Rollup Entities, and Financial Account Roles.
- ☐ Performed Functional, Regression, and End-to-End testing across multiple environments.
- ☐ Configured Bamboo to trigger Sanity and Regression test suites on a daily/weekly basis.
- ☐ Used GIT for source code tracking and Bitbucket for code deployments and pull requests.
- ☐ Identified, logged, and tracked defects using JIRA.
- ☐ Tested data migration stories using advanced Excel shortcuts.
- ☐ Worked on automation maintenance for various projects.
- ☐ Actively participated in QA team discussions, Sprint planning, grooming sessions, retrospectives, and daily Scrum meetings.

Environment: Salesforce, IntelliJ, Cucumber, Java, Selenium WebDriver, Maven, GIT, Bitbucket, Bamboo, JIRA, Microsoft Excel.

Responsibilities:

- ☐ Analyzed application business requirements and technical specifications.
- ☐ Created and executed test cases for program modules as per Business Requirement Documents.
- ☐ Provided end-user support, including troubleshooting issues and providing training as needed.
- ☐ Validated user creation functionality within Salesforce systems.
- ☐ Ensure that user roles, profiles, and permissions are assigned accurately during user creation.
- ☐ Validate that email notifications and welcome messages are sent to newly created users as expected.
- ☐ Perform boundary testing to ensure system stability when creating a large number of users simultaneously.
- ☐ Develop and execute test cases to validate the accuracy and functionality of reports and dashboards in Salesforce.
- ☐ Verify that reports display the correct data based on defined criteria and filters.
- ☐ Validated dashboard refresh functionality to confirm that data updates are reflected promptly.
- ☐ Conduct integration testing to validate the seamless interaction between user creation processes and other integrated systems or applications.
- ☐ Validate the accuracy of data flow and mapping between Salesforce and connected systems during user provisioning.
- ☐ Designed and implemented robust test cases and test scripts for all the projects using C# in Tosca's model-based test automation approach resulting in a 30% reduction in test cycle time.
- ☐ Collaborated with cross-functional teams to design and execute automated test scripts for salesforce applications.
- ☐ Conducted Regression testing and participated in Integration and User Acceptance Tests throughout the SDLC.
- ☐ Integrated Tricentis Tosca with Jenkins for seamless CI/CD pipeline execution.
- ☐ Identified defects are logged and tracked in PMO.
- ☐ Involved in migration of automation framework from Tosca to BDD.
- ☐ Developed BDD scripts by adding features and step definition files for Salesforce Applications and executed using NodeJS packages.
- ☐ Objects are identified and stored in MySQL Workbench and integrate with the framework.
- ☐ Used GIT to pull, push and track changes of the source code.
- ☐ Used TestNG and Maven for execution of automation suites on different platforms.
- ☐ Actively participated in QA team meetings and discussions.
- ☐ Executed automated tests as Maven project using TestNG.
- ☐ Developed and maintained Smoke, Sanity and Regression Automation Suites as per the requirement.
- ☐ Tested the Web application on Android and iOS mobiles by using simulators.
- ☐ Used Postman to test APIs manually.

- ☐ Used GIT for tracking changes in source code. Performed push, pull and merge operations.
- ☐ Used Bitbucket for code deployments and pull requests.

Environment: Tricentis Tosca, C#, Appium, Javascript, Webdriver.IO, Cucumber, TestNG, Maven, GIT, MySQL Workbench, Jenkins, Visual Studio Code, Waterfall Methodology, PMO.

Client: MoneyGram

Location: Frisco, TX

Apr 2020

Role: QA Automation Engineer

June 2018 to

Responsibilities:

- ☐ Analyzed Business Protocol Specifications and System Requirement Specifications.
- ☐ Collaborated closely with stakeholders to understand project requirements and translate them into effective test scenarios.
- ☐ Designed and executed test cases for both positive and negative scenarios to ensure robust application testing.
- ☐ Conducted exploratory testing to uncover potential issues and improve overall test coverage.
- ☐ Worked closely with developers to reproduce and troubleshoot reported defects, ensuring timely resolution.
- ☐ Assisted in the creation and maintenance of test documentation, including test plans, test cases, and test matrices.
- ☐ Actively participated in test strategy discussions and provided valuable insights to enhance testing processes.
- ☐ Mentored junior team members and provided guidance on testing best practices and techniques.
- ☐ Contributed to process improvement initiatives aimed at optimizing testing efficiency and effectiveness.
- ☐ Developed reusable code in Data Driven automation framework using Java, Selenium WebDriver on IntelliJ platform and used Microsoft Excel to input the test data.
- ☐ Executed automated tests as Maven project using TestNG.
- ☐ Used Robot class to simulate Keyboard, Mouse Hover Events and used for uploading/downloading the files when using selenium web driver.
- ☐ Developed and maintained Smoke, Sanity and Regression Automation Suites as per the requirement.
- ☐ Tested the Web application on Android and iOS mobiles by using simulators.
- ☐ Used Postman to test APIs manually.
- ☐ Used GIT for tracking changes in source code. Performed push, pull and merge operations.
- ☐ Used Bitbucket for code deployments and pull requests.
- ☐ Created and monitored Jenkins Jobs.
- ☐ Interacted with the respective developers to explain the testing issues on behalf of the automation team.
- ☐ Scheduled meetings with respective teams to get functional knowledge and test data.

- ☐ Identified and isolated software defects and reported them through JIRA.
- ☐ Actively participated in QA team meetings and discussions. Participated in Sprint planning and Agile meetings daily.
- ☐ Additionally, managed a team of 3 from Offshore.

Environment: Java, Selenium WebDriver, TestNG, Maven, IntelliJ, Microsoft Excel, Postman, GIT, Bitbucket, Jenkins, Mobile Testing, JIRA.

Client: CVS Health

Location: Richardson, TX

May 2018

Role: QA Automation Engineer

Apr 2016 to

Responsibilities:

- ☐ Activity participated in analyzing NovoLogix application and worked on hands of the application as per the test case.
- ☐ Worked on Refactoring of test scripts when there is an application change in application and fixed the test scripts.
- ☐ Involved in Creation of Test Suites and Uploading Developed Test Scripts into ALM.
- ☐ Executing the test scripts through ALM and the analysis of the results in ALM to prepare the final reports.
- ☐ Prepared Test Scenarios, Test Cases, Test data, Test procedures, and Test reports.
- ☐ Involved in Designing and Developing Keyword Driven Framework using Selenium Web Driver –Java.
- ☐ Involved in handling multiple clients at same time with automating and Executing test scripts as per the requirement flow of test cases.
- ☐ Involved in developing new Components in the Framework and Mapping them with Business component Repository, Activity Keyword and Object Repository.
- ☐ Refactoring of Scripts in the Execution of Test Scripts during Regression Testing.
- ☐ Actively Involved in Tracking the HTML Reports, Accessibility reports and Effective Execution of Test Scripts.
- ☐ Involved in Developing New Components in the Framework and Mapping them with Business component Repository, Activity Keyword and Object Repository.
- ☐ Performed Input Validations, User Interface Validations, Browser Compatibility testing and Navigation testing by using navigate commands in Web Driver.
- ☐ Engaged in Framework enhancements, code reviews and maintaining deliverable quality.
- ☐ Involved in Planning and prioritizing work items.
- ☐ Reviewed Test Design and Traceability Matrix for Test Coverage for Security.
- ☐ Prepared and reviewed Unit Test Cases and Reviews.
- ☐ Involved in Project Dependency Management using Maven build tools to manage framework dependency jar files.
- ☐ Performed Manual Testing through all possible perspectives.
- ☐ Actively performed Test Execution, defect coordination and defect facilitation activities.
- ☐ Worked with ALM for Bug tracking and Project Management.

Environment: Selenium Web Driver, Eclipse, Java, HTML, TestNG, SQL Server, ALM, XPath, CSS, Apache POI, Maven, Selenium Grid, GitHub, MS Excel.

CERTIFICATIONS:

- ☐ Tricentis Automation Specialist Level 1
- ☐ Tricentis Automation Specialist Level 2
- ☐ Salesforce Platform Development 1
- ☐ Salesforce Platform Administration 1

EDUCATION:

- ☐ Masters in Information technology at Atlantis University, Miami, 2016.
- ☐ Bachelors in Electronics and Communication Engineering at SRM University, Chennai, 2014.
