

Alan Marco

Address: NewYork, US
Email: alan.engr1@gmail.com
Github: <https://github.com/CodeMystic07>

Profile

Experienced **Python Full Stack Engineer** with **7+** years of experience in building and deploying web applications. Skilled in Python, Django, Flask, SQL, and JavaScript. A collaborative team player passionate about delivering top-notch software solutions.

Work Experience

02/2021 – PRESENT

Sr. Software Engineer **Radical Imaging**

- Led a team of developers in designing and implementing a scalable e-commerce platform using Django and Flask, increasing sales by 30%.
- Developed RESTful APIs with Django REST Framework and Flask to enhance mobile application functionality, improving user experience by 25%.
- Implemented microservice's architecture using Docker and Kubernetes, facilitating better scalability.
- Optimized database queries and caching strategies in PostgreSQL, reducing load times by 40%.
- Integrated third-party services and payment gateways using Django and Flask, streamlining transaction processes.
- Mentored junior developers and conducted code reviews, ensuring coding standards and best practices.
- Utilized React to create dynamic, responsive user interfaces, increasing user engagement by 20%.
- Automated CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment time by 50%.

01/2019 – 01/2021

Software Engineer **Alta Vista**

- Developed web applications using Python, Django, and Flask, ensuring high performance.
- Collaborated with front-end developers to integrate user-facing elements with server-side logic using Django Templates and Flask, improving project completion times by 20%.
- Implemented authentication and authorization with Django and Flask-Security, improving security and reducing unauthorized access by 15%.
- Conducted unit and integration testing with pytest to ensure software quality and reliability, reducing production bugs by 30%.
- Optimized SQL queries and database indexing in PostgreSQL, reducing query execution time by 30%.
- Enhanced front-end functionality with Vue.js, improving load times and user satisfaction by 15%.

Work Experience

12/2017 – 12/2018

Backend Engineer **Alta Vista**

- Designed and developed RESTful APIs with Django and Flask for various applications, improving data exchange efficiency by 35%.
- Integrated third-party APIs and services using Django and Flask, expanding application capabilities by 20%.
- Developed automated tests with pytest to ensure code reliability and minimize bugs.
- Collaborated with front-end developers to ensure seamless integration of UI components.

Skills

Python	Django	Flask	TypeScript	
Fast API	Node.js	JavaScript	React	
Next.js	Angular.js	Redux	HTML5	
CSS3	Material UI	Bootstrap	Tailwind	
AWS	GCP	Azure	Heroku	Docker
Kubernetes	Selenium	Jmeter	PyUnit	
PostgreSQL	MongoDB	SQLite	Redis	

Projects

Micro1

<https://www.micro1.ai/>

Micro1's platform facilitates listing requirements, receiving developer recommendations, conducting interviews, and offering a one-week trial to test developers, simplifying remote software engineer hiring.

Technologies used: Python, Django, Flask, Node.js, AWS.

vMOX

<https://www.vmo.com/>

vMOX's enterprise managed mobility services help organizations better procure, deploy and manage their smartphones, tablets and other mobile devices.

Technologies used: Python, Django, PostgreSQL, Azure.
