Professional Summary

Lead Software Engineer with 15+ years of end-to-end development experience, specializing in high-quality, scalable mobile and front-end solutions. Proven expertise in hybrid mobile development (Ionic/Angular/Apache Cordova), API integration/Microservices (Node.js, Java, Spring), and full-stack engineering. Strong track record in technical leadership, mentoring engineers, and driving architecture/design in Agile environments to enhance user experience.

Core Technical Skills

- Backend: Java, Node.js, Spring Boot, REST APIs, PHP.
- Frontend: Mobile App Development (Hybrid/Native Concepts), React Native, Ionic, Angular.
- Cloud & DevOps: Azure, AWS, Docker, CI/CD (Jenkins/GitHub Actions), DevOps Practices
- Payments: Secure Transaction Workflows, Payment Integrations (Stripe, Paypal), Enterprise Environments (Walmart/Norfolk Southern)
- Databases: MySQL, PostgreSQL, MongoDB,
- Practices: Agile/Scrum, TDD, Code Reviews, API Design

Professional Experience

Software Engineer — Norfolk Southern

Atlanta, GA | 2020 – Present

- Engineered and maintained Java-based microservices using Spring Boot and Quarkus for real-time logistics systems.
- Implemented RESTful API consumption and async data management for real-time logistics systems, utilizing Promises and Fetch API logic to improve data load times.
- Collaborated with DevOps to design CI/CD pipelines and containerized deployments with Docker and Jenkins.
- Conducted code reviews and mentored junior developers on best practices.
- Developed hybrid mobile and full-stack back-end solutions using Agile methodologies, focusing on secure coding practices and API integration.

Mobile Programmer Analyst — Walmart GTS

Atlanta, GA | 2016 – 2020

- Built and maintained Java microservices for inventory and product management used across global operations.
- Designed responsive mobile UIs using Angular and Ionic for international retail teams.
- Integrated Stripe APIs to handle secure payment workflows for internal and customer-facing applications.

- Implemented CI/CD automation and Git workflows, reducing deployment time by 40%.
- Participated in UX design reviews and accessibility compliance initiatives.

Fullstack Developer — Instafit

Mexico city | 2016

- Led development and maintenance of the core mobile and desktop platform for a subscription-based service, integrating Stripe for secure multi-sale payment processing.
- Designed and developed the Apptive mobile app and CMS platform using Apache Cordova, JavaScript, and PHP.
- Created responsive landing pages and front-end features for desktop and mobile platforms, improving user engagement and retention.

Earlier Roles (2010 – 2016) — Bonobo Digital, Libella Creative Boutique, Imodel

- Delivered full-stack web and hybrid mobile applications using Java, PHP, and JavaScript.
- Implemented social media and e-commerce integrations improving user engagement and retention.

Education

B.S. Computer Science — Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM), 2006

M.S. Animation & Special Effects — Universidad Pompeu Fabra, 2008

Certifications

Cloud Computing Certification — University of Texas (AWS, Azure, GCP)

Scrum Master Certified — SCRUMstudy
