PROFILE

A software developer with **10 years of experience** that thrives in modern tech systems with varied teammates. Main capabilities include Software Engineering (C#, .NET, Python, Cloud Services) and Database Engineering (Power Suite, Kusto, Synapse, Databricks, SQL)

EXPERIENCE

Microsoft Vendor @ Agility Partners – Database Engineer (October 2024 – March 2025)

- Created, optimized, and modularized **Kusto** database queries for Azure Roadmap and Tooling team
- Utilized **Synapse and Power Automate** to ingest data via APIs into Kusto to build out Power BI reports

Microsoft - Software Engineer 2 (4 Years: June 2019 – September 2023)

- Developed features for and improved a multi-system Azure Cloud server hardware fault detection application utilizing the following technologies:
 - Server monitoring and repair executables built in **Python and C# .NET** deployed on regionally hosted **VMs**
 - **Apache Spark** data streams to read multi-regional **Azure Cloud** server telemetry and write processed JSON structured data to storage accounts and databases
 - **Data Lake storage** for **NoSQL** based data storage and **Event Grid** for message queuing
 - **Azure Data Explorer (Kusto) databases** for querying multi-regional cloud server telemetry
- Greatly reduced detection-to-repair time for Azure Cloud server faults from minutes to seconds by converting from scheduled database querying to real-time data stream reading
- Saved hours of weekly team work by upgrading to fully automated cloud resource deployments
- Carefully performed full parity, no downtime migration from **Databricks jobs** to **Synapse jobs**
- Participated in 24/7 on-call rotations to ensure service uptime for our customers
- Mentored a team of 5 new hires for a year in data analysis, systems design, corporate practices

Esterline Avista - Software Engineer (4 years: May 2015 – March 2019)

- Developed screen render code for embedded touch screen displays in **C/C++**
- Wrote technical requirement and design specifications for aviation industry customers
- Provided test engineering support against customer defined requirements

EDUCATION

University of Wisconsin – Platteville (2011-2015):

Bachelors of Science: Software Engineering Major, Mathematics Minor

LANGUAGES, TECHNOLOGIES, SKILLS

Languages: C#, Java, Python, C, C++

Technologies: Azure Cloud Tools Suite (See: Microsoft section), Databases (SQL, Cosmo, Azure Data Explorer [Kusto]), .NET, Git, Geneva, Business Intelligence (PowerBI), RESTful APIs, YAML, Docker

Skills: Dev Ops, Cross-discipline coordination, Team Leadership, Memorization, Data Structures, Algorithms, , Onboarding documentation creation, TSG Creation
