Professional Summary

Detail-oriented Software & QA Engineer with 7+ years of experience in full-stack development, automation testing, and DevOps practices. Proficient in modern tech stacks, with hands-on expertise in web, API, and mobile testing, cloud migration, and CI/CD integration. Known for enhancing testing frameworks, collaborating cross-functionally, and driving quality improvements across the SDLC. Passionate about scalable architecture, clean code, and continuous delivery.

Core Competencies

- **Languages & Frameworks:** Java, JavaScript, Python, C#, TypeScript, SQL, Ruby on Rails, React, Node.js, Django.
- **QA & Automation:** Selenium, Cypress, Playwright, Postman, JMeter, ReadyAPI, Charles, Appium, Katalon Studio.
- **Cloud & DevOps:** AWS, Azure, Docker, Kubernetes, Bamboo, GitHub, Bitbucket, CI/CD pipelines.
- **Testing Tools:** IntelliJ, Eclipse, Xcode, JIRA, Confluence, HP ALM, Zephyr, Blazemeter, Swagger.
- **Database Tools:** MySQL Workbench, PostgreSQL, Redis, DataGrip.
- **Agile/SDLC:** Scrum, Kanban, Test-Driven Development (TDD), Behavior-Driven Development (BDD), Pair Programming.
- **Other:** **Fluent in Spanish**, Conversational Portuguese, Unity/VR Testing, SCORM, LMS.

Professional Experience

Senior Quality Assurance Engineer- E Learning Brothers | July 2020 – July 2025

- Performed API testing using Postman and Swagger to validate endpoint functionality and integration.
- Leveraged QA best practices incorporating AI, cloud testing, and machine learning methodologies for improved test coverage and efficiency.
- Developed and executed automated test scripts using Cypress, Playwright, and Visual Studio for web applications.
- Conducted load and performance testing using JMeter, identifying system bottlenecks and ensuring scalability.
- Managed QA efforts across three concurrent projects, collaborating with multiple Scrum teams including offshore development partners.
- Oversaw ticket lifecycle in Jira, including verification, bug creation, and rejection of features; ensured thorough test documentation.
- Executed regression testing ahead of each release to validate application stability.
- Performed ad-hoc testing during live release cycles to identify critical issues in real-time.
- Maintained clear communication via Slack and participated in a customer-facing community monitoring program, directly addressing user-reported issues.
- Conducted database testing using MySQL Workbench to ensure backend data accuracy and integrity.
- Worked with eLearning tools and platforms such as SCORM, LMS, and VR environments (Unity).

QA Automation Engineer- LAVU | Feb 2020 – March 2020

- Led Cypress automation for iOS/Android mobile apps, including complex payment gateway integrations such as Square, PayPal, and FreedomPay.
- Executed regression and smoke testing cycles, utilizing tools like Charles Proxy and ngrok to inspect and troubleshoot network traffic.
- Collaborated closely with development teams on Kubernetes deployments and Xcode build processes, ensuring seamless CI/CD integration and app stability across environments.

QA Engineer- Total Wine & More | Sep 2019 – Feb 2020

- Spearheaded mobile QA efforts for inventory and retail applications deployed on Zebra devices (iOS & Android), ensuring performance and usability in real-world retail environments.
- Introduced the Katalon automation framework, establishing a scalable, low-code testing solution and initiated a comprehensive API testing strategy to improve backend validation.
- Executed thorough regression testing for each release and played an active role across the entire Agile development lifecycle, from sprint planning to post-release support.

QA Engineer -ChenMed | Apr 2019 – Aug 2019

- Currently on a Cloud Migration project working with a talented team, moving all applications from Verizon Terremark To AWS.
- Performed Grey box Testing by knowing on site and on cloud.
- Daily Stand Ups on a time Sensitive project
- Experience using Jira/Confluence/Bitbucket
- Executed Test Suites in IntelliJ using Selenium
- Ready Api suite. Mostly used Soapui pro to execute api testing. Also used Swagger to test.
- Wrote Test cases in Jmeter and executed locally and in Blazemeter for performance testing.
- Used Jira/Confluence/Bitbucket for tracking projects, documentation, and code repository.

QA Engineer-Spirit Airlines | Oct 2017 – Feb 2019

- Automated web tests for Spirit.com using Selenium WebDriver (Java, Cucumber, JUnit)
- Perform functional, regression, and UAT testing for the Spirit website and Mobile application
- Performed responsive, mobile, and GDS booking testing using HP ALM, TFS, and Appium
- Used UFT/QTP for desktop applications; supported testing in a .NET/C# environment

Store Manager-Brand smart U.S.A. | May 2008 – Aug 2017

- Managed 200+ employees and operations at a major electronics retailer
- Spearheaded customer service process improvements and training programs

Software Developer in Training-Wyncode Academy | Aug 2017 – Oct 2017

- Built projects in Java, Ruby, C#, and JavaScript; frameworks included Rails, React, Django
- Gained hands-on experience with Postgres, Redis, Selenium, Cypress, Playwright, Unity
- Practiced Agile, Git, REST, MVC, TDD, and BDD

Education

Associate's degree – Florida Atlantic University / Palm Beach State College
