

# AMAN SONI

## Cloud/DevOps Engineer

amansoni369@gmail.com | +61 404 346

916 | Sydney, Australia

### PROFESSIONAL SUMMARY

- Experienced DevOps Cloud Engineer with a strong background in leveraging **DevOps methodologies** to orchestrate deployment processes. Used GitHub Actions, GitLab CI/CD, Jenkins, AWS Developer tools to automate CI/CD pipelines.
- Proficient in designing and implementing scalable and resilient AWS architectures keeping **Well-Architected Framework** in mind to ensure that the solutions are secure, cost optimized and optimized for performance and security.
- Proficient in using **Infrastructure as Code (IaC)** tools such as AWS CDK(Python), Terraform, CloudFormation. **Developed CDK constructs, Terraform modules and detailed CF templates**
- Skilled in continuous integration and continuous deployment (**CI/CD**) practices, efficient in designing deployment pipelines. Built **custom docker images** to provide runner environment for CI/CD pipelines and to host critical applications.
- Committed to automating workflows and utilizing best practices to drive innovation and improve overall productivity in cloud environments.
- Ability to understand and bridge gap between business requirements and technical implementation driving success across various customers across various industries

### SKILLS

#### CLOUD

- AWS SERVERLESS
- SECURITY
- S3
- AWS BATCH
- LOAD BALANCER
- VPC
- API GATEWAY
- LAMBDA
- CLOUDFORMATION
- AWS CONFIG
- AWS ORGANIZATION
- ECS, ECR

- CLOUDTRAIL
- CLOUDWATCH
- EVENTBRIDGE
- DNS/ROUTE53
- RDS
- AWS TEXTTRACT
- CLOUD NATIVE
- AWS SAM
- SSM
- AWS BACKUP
- STEP FUNCTIONS
- SQS, SNS

#### CI/CD

- GITHUB ACTIONS
- GITLAB CI/CD
- AWS CODEBUILD
- AWS CODEPIPELINE
- JENKINS
- ANSIBLE
- GITOPS

## IAC

- AWS CDK
- TERRAFORM
- ANSIBLE
- CLOUDFORMATION
- AWS SAM

## SOFTWARE & TOOLS

- PYTHON
- BASH
- AWS CDK
- AGILE
- DATADOG
- DYNATRACE
- ANSIBLE TOWER
- ATlassian SUITE
- JFROG ARTIFACTORY
- PAGERDUTY
- DOCKER

- HASHICORPT VAULT
- DRUVA SAAS
- CLOUDABILITY
- BOTO3 SDK

## EXPERIENCE

### CEVO | MAR 2022 – MAR 2025

As an AWS Consultant at Cevo Australia, I design and deliver innovative cloud solutions for clients across various industries and domains. With over five years of experience in DevOps, cloud architecture, FinOps, development, I have a track record of delivering high-quality, secure, and scalable cloud solutions that meet the client's needs and expectations.

### AMP | SECURITY, REGULATORY

**Technologies:** AWS Backup, CloudFormation, Druva SaaS, SSM Automation, Docker, Project Planning

#### Role:

- Helped the customer to comply with **APRA CPS 234 regulation** to secure their backups in air-gapped environment.
- Heavily Involved with internal stakeholders and SaaS vendor to uplift the security posture.
- Designed and implemented AWS native solution to secure the backups to comply with regulations using CloudFormation templates and stack sets.

- Designed custom docker image to run github actions runners for consistent deployments
- Planned the project to ensure timely delivery.
- Mentored colleagues to work efficiently on project tasks based on priority.

## **MOBILITYDESK – SAAS** | DOCUMENT PROCESSING, CLOUD NATIVE

**Technologies:** AWS Textract, AWS Lambda, AWS Step Functions, AWS CDK, Python, GitHub Actions

### Role:

- Built and deployed the entire document processing solution independently on the AWS cloud platform. Leveraged a combination of AWS services like Lambda, Step Functions to achieve comprehensive end-to-end functionality.
- Used **AWS Textract** OCR provider to allow faster, scalable and more accurate processing of visa documents.
- Implemented a fault tolerant CI/CD pipeline using **github actions** workflow for automated testing and deployment of document processing solution.
- Used **AWS CDK** to manage infrastructure as code within their AWS environments

## **AMP** | FINOPS

**Technologies:** AWS, Python, AWS SDK Boto3, GitHub Actions, Apptio Cloudability

- Involved in developing the custom solution to help customer in optimizing cloud cost using automation tools

- Successfully achieved critical targets reducing the AWS spend by millions of dollars annually
- Successfully configured and deployed AWS instance scheduler organization wide for further cost management and to enable optimal use of cloud resources

## **NASDAQ** | MODERNISATION, CLOUD NATIVE

**Technologies:** Event Driven Architecture, AWS Step Functions, Lambda, Python, AWS SDK Boto3, AWS CDK, Terraform, GitLab CI/CD, Puppet, Docker, ECS, ECR, SQS

- Involved in helping customer modernize their customer facing solution leveraging cloud native capabilities
- Involved in designing the solution using AWS native capabilities that complies with AWS WAF(Well-Architected Framework)
- IaC with automated CI/CD pipelines allows the team to dynamically build and terminate feature environments improving overall developer productivity
- Successfully deployed the new solution to Production to onboard clients
- Deployed and managed AWS infra using custom **CDK constructs, terraform modules**.
- Built custom docker images to run ECS tasks/services to host critical applications.
- Used Datadog monitoring tool to ingest logs from AWS ecosystem.

## **OPTUS | FEB 2018 – MAR 2022**

As a Senior DevOps Engineer for the Product Engineering team at Optus, I was involved in deploying, administering, maintaining the DevOps platform used across the organization by various internal teams & individuals, along with training and helping teams onboard to utilize the devops tools. I was also involved in modernizing the in-house billing solution for AWS resell.

### **SENIOR DEVOPS ENGINEER:**

- Involved in solutioning and designing in-house Billing solution for Reselling AWS services to external customers.
- Involved in frequent interactions with external customers and helped them with fixing issues and understanding and implementing their request.
- Worked on PoC to test out Auth0 integration to enable a single sign on platform within the organization.
- Used Terraform to automate provisioning on AWS Cloud, and automating deployments on our DevOps Platform
- Helped in onboarding various internal teams on our DevOps platform

### **DEVOPS ENGINEER**

- Involved in building and managing DevOps platform comprising of various DevOps tools such as Ansible,

Ansible Tower, GitLab, HashiCorp Vault, Docker, JFrog Artifactory

- Create and maintain fully automated CI/CD pipelines for code deployment using Ansible, GitLab CI/CD and Jenkins
- Automating complex workflows using GitOps
- Built and deployed Docker containers to break up monolithic app into microservices, improving developer workflow, increasing scalability, and optimizing speed
- Managed GitLab projects, repositories, user management and other admin related tasks
- Involved in setting up platform monitoring and reporting tools to constantly keep track of on-going issues within platform for earliest resolution
- Presented various sessions in internal DevOps show & tell shows across the organization and SQL procedures based on business use case
- Maintaining code repositories with frequent updates and bug fixes. Implementing new modules within existing frameworks

## **INFOSYS | SENIOR SYSTEMS ENGINEER | FEB 2014 – DEC 2017**

- Worked on generating financial reports using the custom Framework developer in JAVA
- Created CI/CD workflows using TeamCity and IBM's udeploy
- Coordinated and supported UK based clients in case of issues
- Strong skills in SQL & SQL Server, with the ability to write complex queries

## **EDUCATION**

BACHELOR OF TECHNOLOGY | COMPUTER SCIENCE (2009-13) | INDIA
