Jira, Confluence, Figma, Miro, Confluence, AEM, MS Dynamics, Excel, Balsamiq, Visio, Azure DevOps

CERTIFICATIONS

PSM 1, PSPO 1

EXPERIENCE

Concentrix-Catalyst

Senior Business Analyst:

Feb. 2022—Present

- Collaborated with design and technical teams to develop and prioritize backlog for consumer API portal in banking industry resulting in detailed user story generation and future project plan.
- Automated status reporting using Jira cloud plugin in GoogleSheets to provide data-driven estimates to support roadmapping and objectives tracking for mobile application allowing for greater transparency to stakeholders and managers.
- Configured Jira automations to record start date, end date, template auto-population, and continuity of labels from parent tickets to child tickets, improving accuracy of tickets and resulting in 30% decrease in rework for mental health application.
- Led Agile ceremonies as Scrum Master for global development team across time zones, educating client team on principles of Agile for AEM consumer facing insurance website.
- Planned and facilitated workshops to promote client consensus and discovery (both online and in person) for logistics industry migration to MS Dynamics resulting in custom MVP build tailored to client's process and Phase 1 backlog.

Sony Music, New York, NY

Senior Business Analyst (Consultant)

Nov. 2019-Feb. 2022

- Improved Agile team structure in the role of scrum master, including involvement of QA/tester in team activities, commitment to participation in Agile ceremonies, causing an increased output and consistent burn down charts.
- Provided Confluence and Jira templates to other teams in the department, streamlining user stories and documentation across Agile teams.
- Gathered requirements from audio and video engineers to accelerate transition to the updated UI for 20-year-old application while simultaneously responding to industry-demanded changes.
- Coordinated and refined department-wide build process, facilitating procedural improvements as well as providing an internal user facing page to showcase upcoming features.

UPS, Parsippany, NJ

Senior Business Systems Analyst (Consultant)

Oct. 2018-Nov. 2019

- Accelerated department-wide Waterfall to Agile transformation by serving as key member of Agile BA team charged with advising developers and management on key Agile practices.
- Lead several tiers of an accounting transformation project, quickly mastering new accounting concepts and company procedures to gather concise requirements from business users.
- Instructed business analysts on other projects who are new to TFS/Azure Devops or Agile, providing coaching and serving as a technical resource to ease Agile transition.

Tarifica, Cedar Knolls, NJ

Business Analyst

Nov. 2016-Oct. 2018

- Automated daily manual data collection project by designing and coding a program in Python, cutting the cost of the project by 50% and improving the quality of the data collected.
- Implemented Agile across all development projects, educating team members and clients about the principles of Agile and ensuring all aspects of the process and ceremonies are upheld.
- Wrote standards for gathering and documenting requirements from clients to more accurately estimate cost of projects, resulting in all projects in my department being completed on time and under budget.
