Professional Summary

Results-driven Front-End Developer with 6 years of experience building responsive, scalable, and user-centric web and mobile applications using **Angular (v6+), React, and React Native**. Expert in **TypeScript, RxJS, and NgRx** for creating efficient, maintainable front-end architectures. Skilled in writing clean, optimized code and implementing **CI/CD pipelines, security best practices (JWT, OAuth 2.0), and accessibility compliance (WCAG 2.1)**. Adept at collaborating with cross-functional teams to deliver **pixel-perfect interfaces**, mentor junior developers, and ensure consistent Agile delivery. Committed to continuous learning and delivering innovative, business-aligned digital solutions.

Skills Summary

Front-End Technologies: HTML5, CSS3, JavaScript (ES6+), TypeScript, CSS Preprocessors (Sass, LESS), Frameworks: React, Angular, Vue.js, Responsive Design & Mobile-First Development, JavaScript Libraries (jQuery)

Database: PLSQL

Mobile App Development: React Native, iOS Human Interface Guidelines, Material Design (Android), APIs (RESTful, GraphQL), Mobile Testing Frameworks (Jest, Mocha)

Version Control & Collaboration: Git (GitHub, GitLab), Agile/Scrum Methodologies

UI/UX Design: Wireframing, Prototyping, Usability Testing, Interaction Design, Accessibility (WCAG), User Research, Figma, Adobe XD, Sketch

Testing & Debugging: Testing Frameworks (Cypress, Jest, Mocha), Browser DevTools for debugging and performance analysis

APIs: RESTful APIs, GraphQL

Software Development Life Cycle (SDLC): Requirements Gathering, Design, Development, Testing, Deployment, and Maintenance

Tools & Workflow: Webpack, Gulp, Jira, Postman, CI/CD Pipelines

Data Visualization & Analytics: Power BI

Scripting & Automation: Python (basic scripting)

Optimization & Performance: Performance Tuning, SEO Optimization, Cross-Browser Compatibility, Lazy Loading, Code Splitting, Lighthouse

Other Technical Areas: XML, Node.js Integration, Security Best Practices, Progressive Web Apps (PWAs)

Education

Florida Atlantic University

FL, USA

Master of Science – Information Technology Management; GPA: 3.89

Experience:

AMEX

Front-End Developer; May 2023 - Now

- Built scalable web apps using **Angular** and improved app performance through optimized state management and modular design.
- Led **React/Redux** implementation and mentored junior developers, improving team productivity and code quality.
- Collaborated with UX teams to develop design systems, ensuring consistency and faster delivery across projects.

- Implemented **CI/CD pipelines**, automated testing, and accessibility standards (WCAG), enhancing deployment speed and usability.
- Configured **AWS CloudWatch dashboards** to monitor app performance and detect errors proactively.
- Implemented **JWT and OAuth 2.0** for secure authentication and role-based access.
- Used **NgRx** for structured state management in large-scale Angular applications.
- Collaborated with backend engineers to design **microservice-based APIs**, improving scalability and data flow.
- Optimized build processes using **Webpack and Gulp**, cutting load times by 30% and improving deployment reliability.
- Utilized **Power BI and PLSQL** for interactive data visualization and backend performance tuning.
- Enforced **SEO and security best practices**, increasing discoverability and protecting sensitive user data.
- Collaborated cross-functionally to integrate **GraphQL APIs** and streamline data retrieval across applications.
- Developed **Progressive Web Apps (PWAs)** and mobile-first designs, improving engagement and responsiveness by 20%.

IBM

Software Developer; March 2021 - December 2022

- Delivered responsive web apps using **React and Angular**, ensuring cross-device compatibility and high performance.
- Reduced page load time by 30% via **code-splitting, lazy loading, and performance audits**.
- Collaborated with designers and product managers for **pixel-perfect UI** and accessibility compliance.
- Built **Protractor-based E2E automation** integrated with CI/CD pipelines for robust workflow validation.
- Used **Azure DevOps pipelines** to automate build, test, and deployment processes.
- Developed **modular Angular components** to improve code reusability across multiple applications.
- Automated testing using **Jest/Mocha** and introduced coding standards that enhanced maintainability.
- Conducted **A/B testing** and integrated analytics insights to improve UX and user retention.
- Designed and implemented **GraphQL endpoints** to simplify front-end data fetching and reduce API latency.
- Created **Power BI dashboards** and integrated analytics into front-end modules to enable real-time reporting.
- Leveraged **Python scripts** for test automation and data processing within CI/CD pipelines.
- Led **usability testing with Figma prototypes**, gathering insights to refine design flow and accessibility features.

Versabyte Datasystems

Front-End Developer; February 2019 - December 2021

- Developed interactive, responsive websites using **HTML, CSS, JavaScript, and Bootstrap**.
- Collaborated with backend teams for **RESTful API integration** and data-driven interfaces.
- Participated in **Agile sprints**, code reviews, and documentation to streamline delivery.
- Improved page speed and user experience through **performance optimization and testing**.
- Assisted in **React and Angular** feature development, gaining hands-on experience in component architecture and routing.
- Collaborated with backend teams using **PLSQL** to optimize queries and improve data reliability.
- Created prototypes and design assets using **Figma and Adobe XD**, ensuring smooth handoff to development.
- Implemented **unit tests with Cypress and Jest**, reducing regressions and ensuring stable releases.
