***Senior Project & Program Management | Scrum Lead | Team Building & Leadership
Engagement Management | Customer Success | Global Digital Transformation***

Over **20 years** in leading large-scale software delivery across several general business domains (Agri-business, Finance, Bioinformatics, Pharma, and Education), including **3 years** of experience as an Engagement Manager and **10 years** in project management, technical delivery, operations, and support management. I have diverse experience in waterfall, agile, and scaled agile delivery methodologies. Expert in upscaling teams and driving revenue growth while ensuring exceptional quality and client satisfaction. Adopting **Agile** and **DevOps** cultures to increase efficiency and quality of execution and delivery. I demonstrated success in leading global, cross-functional teams to achieve strategic objectives. I managed and delivered projects for stakeholders in **USA, Europe, China, and Middle East**.

EXPERIENCE

April 2022 – present | Location: NC, USA | Company: [ITWorx - USA](#)

Engagement Manager/Customer Success Manager

- Led an Agri-tech account with a Fortune 500 company, boosting revenue by 22% in the first year and 12% in the second year.
- Successfully built a framework and governance for the Middle East's most significant security exchange markets, improving transparency and increasing user engagement.
- Consistently achieved high client satisfaction, boosting the NPS score by 37% after the first year, reflecting strong customer loyalty and trust.
- Building trust and being the technical advisor for global clients and teams across the USA, Europe, China, and the Middle East, driven by business objectives and Customer needs.
- Overachieving my KPIs in my first year in this role.
- My domain got selected as a success story & case study within the organization for successfully driving the DevOps and Lean-Agile transformation model, resulting in improved efficiency, collaboration, and project delivery.

April 2021 – April 2024 | Location: NC, USA | Company: [ITWorx - USA](#)

Senior Project/Program Manager

- Awarded the Company Champion Team Award, recognizing my team/Program's outstanding performance and commitment to achieving high customer satisfaction.
- Managed a team of 3 project managers, 4 Business analysts, 2 Architects, and 40+ Developers and testers.
- Worked strategically with the commercial team, grew the company's footprint, and increased the revenue for a multiyear engagement from a few hundred thousand to a multimillion-dollar program(~300% Growth).
- Established standard budget tracking processes & metrics, leading to a multi-year phased global program being delivered right on budget.
- Spearheaded the adoption of Agile and DevOps practices (CI/CD, code reviews, unit testing, test automation), driving operational efficiency and team collaboration (Certified CSM and SAFe SM).
- Played a key role in re-establishing and fortifying relationships with the most significant key account, addressing all concerns, maximizing satisfaction, and being fully accountable for the program's overall success.
- Led a team to meet tight and critical deadlines while maintaining motivation and engagement, working in a fast-paced/dynamic mode to deliver over 40 MVPs in 18 months.
- Built governance across multi-divisional strategic projects to ensure timely delivery, transparent reporting, & Alignment.
- Leveraged Agile implementation processes in collaboration with stakeholders to meet stringent deadlines consistently using Jira, ADO, Confluence, Trello... and more.
- Led and Delivered Big Data Domains, Bioinformatics, agricultural research, R&D, Data Analysis, Integration, and Migration Projects.

July 2017 – March 2021 | Location: NC, USA | Company: [ITWorx - USA](#)

Project Manager/Scrum Master

Chosen by leadership to manage major client accounts as the onsite representative, overseeing successful project delivery from inception to completion. Advised clients on actionable next steps and developed initial implementation plans. Led small to medium-sized projects, ensuring alignment with time, scope, and budget requirements while maintaining strong client relationships

- Led and successfully achieved AWS Cloud migration of a Big Data platform (multi-million program), including Data Warehouse (DWH), Data Marts, and the related 5 applications and integration points, ensuring on-time delivery with zero post-release failures in less than 4 months duration.
- Managed the delivery of projects with various technologies, including AWS, Azure, .NET, Java, React, React Native Angular, Python, Power BI, Tableau, Postgres, IBM Data Stage, Oracle, and CRM.
- Technical capabilities/background allowed me to:
 - Contribute to data analysis and change request impact assessments.
 - Understand and verify the functional requirements of applications.
 - Determine the security and performance requirements of systems.
 - Determine and find solutions for key design issues.
 - Trusted strategic and technology advisor.
 - Brainstorming and problem-solving.
- Established and maintained a strong understanding of the business domain within the teams, including necessary science basics (e.g., statistics, biology..etc.)

April 2013 – June 2017 | Location: Cairo, Egypt | Company: [ITWorx - EG](#)

Technical Team Leader

- Awarded the Make a Difference Award for displaying distinctive performance, earning trust and confidence of peers.
- Recognized by the client and the team as a key contact for the application’s knowledge and support.
- Expertise: C#, ASP.NET, .NET MVC, Web API, Oracle, SQL Server, Java, Oracle Forms, Python, R Shiny.

ADDITIONAL EXPERIENCES
