Project Manager

Accomplished technology professional with extensive experience in web platforms, content management systems (CMS), and database applications. Adept at quickly understanding complex technical systems, identifying areas for improvement, and delivering strategic solutions. Proven ability to lead cross-functional teams, optimize project management processes, and ensure alignment with business objectives. Passionate about delivering successful projects and building efficient, scalable program structures.

Key Skills

Project Management | Strategic Planning | Change Management | Software Development Lifecycle (SDLC) | Project Management Office (PMO) | Release Management | Leadership | Problem Solving

Professional Experience

BlackRock / Barclays Global Investments, San Francisco

February 2009 – February 2025

Vice President, Web Tools and Technology

Web Platform Program Manager

Directed strategic and tactical growth of the core web platform system across multiple international development teams. Managed project and BAU work queues, resourcing, requirements and prioritization of incoming work. Drove information security, compliance and disaster recovery planning for the group.

- Adobe AEM / Universal Editor platform development. Led the selection, planning and creation of a new CMS and React.js-based web delivery platform. Led the Alpha / Beta testing partnership with Adobe for their hybrid/headless Universal Editor platform, culminating in the first commercial deployment.
- Led the design, development and implementation of a web platform supporting more than 180 web sites using Teamsite, IDOL/SOLR, Apache, Java, JBoss and Spring. Responsibilities included strategic planning, resource management, process enforcement, and project management for system upgrades and migrations.
- Founded and led the WTT Release Management team, improving the testing and deployment of code, to meet Risk Management standards. Developed and implemented code quality, risk management and testing standards, achieving Five 9s availability.
- Implemented Adobe and Unica web analytics systems, integrating both into backend/CRM tracking systems for Marketing to provide insight into site usage and improvement.

Project Manager / PMO

Developed project management and program management procedures using both PMP and Agile/Scrum methodologies for multiple PMO teams, including direct PMO leadership.

- Worked directly with relationship managers and business partners to assess, prioritize and plan projects.
- Designed and implemented standards to support the full development lifecycle.
- Led projects to improve database availability and redundancy, create database abstraction layers, create web services and web service layers, mobile services using MobileIron and create Disaster Recovery plans for the business unit.
