PROFILE

Senior software engineer with over 10 years of experience in web and mobile application development. Specializes in **JavaScript**, **TypeScript**, and frameworks including **React/React Native** and **Angular**. Developed backend systems using **Express.js**, **Nest.js**, and **Python/Django**, **C#/ASP.NET** for applications in **E-commerce** and **Healthcare** sectors, serving 10,000+ users. Familiar with **DevOps** and building **CI/CD** pipelines. Have strong interpersonal skill, leadership & mentoring experience.

SKILLS

- JavaScript, TypeScript, Python, C#
- React, React Native, Next.js, Angular, Angular.js, Express.js, Nest.js, Django, Flask, ASP.NET, .NET Core
- Redux, Context API, Zustand, NgRX
- MySQL, MS SQL Server, PostgreSQL, MongoDB, DynamoDB, RDS, CosmosDB
- GitHub Actions, GitLab CI, Jenkins, Docker, Kubernetes
- AWS EC2, S3, Lambda functions, API Gateway, Azure Functions, Azure App Service, GCP

PROFESSIONAL EXPERIENCE

Concentrix

Feb 2020 – present | Newark, CA

Sr. Software Engineer

- Involved in developing an **E-commerce** applications using **React/React Native**, **Next.js** for the frontend (web and mobile applications) and **Nest.js**, **Python/Django** for developing backend APIs.
- Designed frontend architecture using **React** with best practices for performance and maintainability.
- Worked closely with designers to improve **UI/UX** and translated **Figma designs** into **pixel-perfect** frontend components.
- Leveraged **Chakra UI** for styling the web app and **gluestack(v2.0)** for the mobile application.
- Utilized **Storybook** for maintaining component reusability and documentation.
- Used **Apollo GraphQL Client** for data fetching and **Zustand**, **Custom React Hooks** for state management in application.
- Built Mobile app using **React Native** for both **iOS** and **Android**.
- Integrated **Expo SDK(v52)** into the **React Native** project to streamline the testing, building, and submission process to the **App Store** and **TestFlight**.
- Integrated push notifications using **Expo Push Notification**.
- Built **Android** and **iOS** builds, and automated the submission process using **GitLab CI** and **EAS CLI** for building and submission.
- Maintained the mobile application by leveraging **Sentry.io** for monitoring and logging.
- Installed **Apollo GraphQL Server**, designed and implemented backend APIs using **Nest.js**.
- Created Custom **Decorators** in **Nest.js** to extract and validate user data from requests.
- Experience with building shopify backend APIs using **Python**, **Django** framework, **PostgreSQL** database.
- Managed API system deployment using fast HTTP server and Amazon **AWS** architecture.
- Hands-on experience in Object Oriented Development, code optimizations, code refactoring, and web development.
- Experience in Database Security including creating Logins and Roles for users to access to database.

- Implemented a **CI/CD pipeline** to automate the processes of building and testing both frontend and backend solutions using **GitLab CI**.
- Addressed client and stakeholder feedback to improve the platform.

Yelp

Sep 2014 – Jan 2020 | San Francisco, CA

Software Engineer

- Participated in **Healthcare, Shopify** application development using **React/React Native, Angular** and **Python/Django, C#/ASP.NET**.
- Created reusable UI components using **Angular directives** and **services**.
- Engineered custom **Python** scripts for batch processing large datasets, used in backend.
- Developed **RESTful APIs** using **Django** Rest Framework.
- Migrated from **Angular** to **React(v16.6.3)** leveraging **React components, React Hooks** and **States**.
- Changed backend system from **Django** to **Express.js**.
- Involved in **C#, .NET, ASP MVC, Razor, XML, HTML/CSS** and **REST APIs**.
- Experience with **LINQ** and **ADO.NET** for developing data access layer.
- Experience with full use of **.NET** object oriented features(**C#**), event handling, error handling, caching and security feature.
- Made database object like Tables, Stored Procedures and Triggers in **MS SQL Server**.
- Provided codes to perform Unit Testing.
- Deployment of Application on Test and Production Server.
- Developed Mobile app using **React Native**.
- Utilized **Firebase** for authentication, remote configuration, and cloud messaging.
- Improved real-time features leveraging **GraphQL subscriptions**.
- Integrated payment systems with **Stripe** and **Apple Pay**.
- Customized **native modules** with **Bluetooth** capabilities using **Objective-C + Swift** for **iOS** and **Java + Kotlin** for **Android**.
- Leveraged **Jenkins** and **GitHub Actions** to automate the testing, building, and deployment processes.
- Wrote user and developer documentation to support the operations and support teams.

PROJECTS

ModCloth

2020 – 2024

E-Commerce Application

- Technical Environment:
Frontend: React, React Native (Mobile)
Backend: Nest.js
State Management: Zustand, Redux
Testing: Jest, RTL/RNTL
CI/CD: GitLab CI
Deployment: AWS EC2, S3 bucket, DynamoDB
- Played a critical role in developing key features of the application such as **User Authentication, Product Management**, and **Order Processing**.
- Enhanced UI/UX for product browsing page.

TalkSpace

2016 – 2020

Telemedicine Application

- Technical Environment:
Frontend: Angular, React, React Native (Mobile)
Backend: Python/Django
State Management: NgRX, Redux Saga
Testing: Jest, RTL/RNTL
CI/CD: GitHub Actions, Jenkins
Deployment: AWS EC2
- Improved appointment scheduling system with **Real-Time Update** with professional's availability.
- Ensured code quality through comprehensive testing.
- Deployed application on **AWS**.

Shopify Application

2014 – 2016

- Technical Environment:
 - Frontend:** Angular
 - Backend:** C#/ASP.NET/LINQ
 - State Management:** NgRX
 - Testing:** Jest, Cypress
 - CI/CD:** GitHub Actions
 - Deployment:** Azure
- Engineered a Shopify application using the specified tech stack to create an e-commerce platform.
- Constructed API endpoints that delivered seamless integrations between frontend app and backend database.

EDUCATION

University of California, Berkeley

2010 – 2014

Bachelor of Science (B.S.), Computer Science
