SUMMARY

Full-Stack Software Engineer with over **3+ years** of experience designing, developing, and scaling applications, **RESTful APIs**, and **microservices**. Proficient in **Python (FastAPI, Flask)**, **JavaScript (Node.js, React, Next.js)**, and **AI/ML technologies** including XGBoost, TensorFlow, and NLP for anomaly detection, predictive maintenance, and log classification (52K+ logs). Expertise in **AWS, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD pipelines**, and **Agile** methodologies. Skilled in database optimization, **caching**, **security** hardening, and delivering low-latency solutions. Experienced with AI-driven development tools for task tracking in Visual Studio and **Cursor**

PROFESSIONAL EXPERIENCE

Software Engineer | Honeywell | USA

July 2025 – Present

- Developed and modernized **FastAPI**-based microservices on **AWS** and **SQL**, enabling secure, **scalable** storage and fault-tolerant alerting for **3,000+ IoT fire sensors**
- Engineered **real-time** processing pipelines handling **5,200 signals/second** and ingested **300,000+ logs**, achieving **<500 ms latency** for dashboards and telemetry compliance
- Implemented anomaly detection and predictive maintenance pipelines using **Python, XGBoost**, and **NLP**, analyzing **52,000+ logs** to prioritize alarms and reduce downtime
- Optimized **API** performance with Python **memoization**, enhancing **600+ daily notifications** and reducing debug time **by 20%**
- Deployed **FastAPI** microservices and visualization prototypes on **AWS EC2**, improving profiling efficiency and system reliability

Software Engineer | Capgemini | India

August 2021 – July 2023

- Built **MERN** stack applications with **Next.js** and **AWS**, supporting **25,000+ monthly sessions** and delivering **18 RESTful APIs**
- Reduced bundle size **by 35%** through **Webpack** optimizations and **Code Splitting**, improving frontend load performance
- Enhanced database performance by optimizing **12 slow queries** and implementing **Redis caching**, reducing latency from **3.5 s to 1.1 s**
- Developed **scikit-learn** models for ticket classification (**500+ weekly**) and used **Pandas-NLTK** for **10,000+ logs** analyses, saving **10 hours/week**
- Deployed **TensorFlow** models to edge devices for on-demand inference, improving prediction speed and real-time workflows
- Streamlined **CI/CD** pipelines using **Jenkins, GitHub Actions, Docker**, and **Kubernetes**, adding **3 validation cycles** per sprint with **Netlify** based frontend **quality assurance** previews
- Led **Agile** delivery for a 7-member team, closing **150+ tasks** and optimizing integrations with **PyCharm IDE**

Software Engineer | Dell Technologies | India

June 2020 – May 2021

- Optimized **API** latency from **500 ms to 300 ms** for **100+ users** by implementing **async retrieval** and **caching**, and enhanced **Vue** dashboards with **bLoading**
- Architected data pipelines and **REST APIs**, integrating **Webpack** and **Bootstrap** for real-time dashboards with **<10-second** refresh rates
- Secured **5 services** with **API** authentication and rate-limiting, handling **1,000+ requests/minute**, and applied **memoization** for efficient data transformations
- Automated deployment scripts for **Flask**, reducing rollout time from **10 hours to 3 hours**, and leveraged **PyCharm** for testing and refactoring across **5 repositories**
- Facilitated user testing with infrastructure teams, driving adoption across **5 enterprise platforms**

KEY PROJECTS

- Cyberbullying Tweet Detection:** Built a comment classifier for **50,000+ records** using **Hugging Face** and **FastAPI**, deployed on **AWS Lambda** with **<2-second inference**, and published a **Vercel** dashboard with modularized frontend via Code Splitting
- Smart Traffic Signal Automation:** Designed an adaptive traffic signal system reducing idle time by **18 seconds/cycle** across 4 intersections, using **Raspberry Pi, Tailwind CSS**, and Lazy Loading for video streams
- AI Travel Guide:** Developed a **MERN**-based travel planner with **Zustand, MUI**, and **LangChain** for multi-step reasoning, integrated **OAuth 2.0/JWT** for **100+ queries/second**, and deployed on **AWS EC2** via **Vite**

TECHNICAL SKILLS

Languages & Scripting: Python, JavaScript (ES6+), TypeScript, SQL, C++, HTML5, CSS3, Go

Frontend & UI Development: React (Hooks, Router), Angular, Vue, Backbone, Next.js, Gatsby, Hugo, Zustand, Tailwind CSS, Bootstrap, MUI, SASS/SCSS, BEM, SMACSS, OOCSS, AJAX, JSON, Responsive Design, Flexbox, CSS Grid, Lazy Loading, Code Splitting

Backend, APIs & Databases: Node.js (Express, NestJS), Django, Flask, FastAPI, REST, GraphQL, SOAP, WebSockets, JWT, OAuth 2.0, Microservices, PostgreSQL, MySQL, MongoDB, Oracle (PL/SQL), Redis, DynamoDB

Core Concepts & Paradigms: DSA (Data Structures & Algorithms), Object-Oriented Programming, Memoization

AI/ML & Data Science: OpenAI, Hugging Face, LangChain, TensorFlow, TensorFlow.js, PyTorch, Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib, NLP, Model Deployment

Visualization, Animation & Accessibility: D3.js, Chart.js, ApexCharts, GSAP, Framer Motion, WCAG, ARIA, axe

DevOps, Cloud & Tooling: AWS (EC2, Lambda, S3, API Gateway), GCP, Firebase, Vercel, Netlify, Docker, Kubernetes, Jenkins, GitHub Actions, **Webpack**, Vite, Babel, Maven, npm, Yarn, Git (GitHub, GitLab)

Testing & QA: Jest, React Testing Library, Cypress, Playwright, Mocha, Test Automation

Collaboration & Methodologies: VS Code, WebStorm, PyCharm, Postman, Figma, Zeplin, JIRA, Confluence, Trello, Slack, Agile, Scrum, Kanban, CI/CD, Containerization

EDUCATION

MS in Computer Engineering | San Jose State University

August 2023 – May 2025

BE in Electronics and Telecommunications | Pimpri Chinchwad College of Engineering, Pune

August 2017 - May 2021
