

Anoosha Padamata

SDET | Milpitas, CA | 408-666-2425 | anu.padamata@gmail.com | Permanent Resident

Summary

- 11+ years of experience across multiple roles including QA Automation Engineer, Test Lead, and QA Analyst
- Experience in building automation frameworks for web applications and RESTful services
- Multi-domain expertise in Healthcare, Finance, Networking and Telecom
- Languages & Frameworks: Java, Selenium, Rest Assured, TestNG, Maven, Jenkins, ReadyAPI, Postman
- Tools & Methodologies: SQL, MongoDB, JIRA, Rally, Git, Agile, Scrum, Unix, Splunk, Grafana
- Working experience in AI-driven tools like Microsoft Copilot, Windsurf, Claude

Experience

Get Insured | CA | SDET | Dec 2025 – Present

- Maintained a unified UI and API test framework using Selenium with Page Object Model (POM), TestNG and Java
- Automated 100+ test cases covering frontend UI and backend API workflows
- Triaged critical UAT defects and high priority production issues to minimize service disruption
- Integrated Claude into the automation workflow, reducing script authoring time by 60%
- Validated clinical backend data via SQL (Oracle) to ensure accuracy in data migration and processing

LPL Financial | TX | SDET | Sep 2023 – Aug 2024

- Involved in automating API test cases using Java and TestNG framework
- Automated 500+ test cases which covers more than 20 different services to reduce overall testing time by 20%
- Participated in the development of the framework for Utility and Base class methods
- Leveraged GitHub Copilot into the automation workflow, reducing script authoring time by 30%
- Led onsite-offshore coordination, providing technical training on new tools and ensuring global team alignment

Dish | CO | Senior QA Automation Engineer | Mar 2021 – Aug 2023

- Collaborated with third-party vendors (Optima) to validate complex billing and payments integrations.
- Performed manual API validation in Postman and transitioned high-value scenarios into ReadyAPI using Groovy
- Developed Selenium scripts using TestNG, utilizing XML and property files for externalized data-driven testing
- Identified and triaged 100+ defects, which directly contributed to 95% production stability post release
- Experienced in building and deploying services through CI/CD pipelines using Jenkins and Maven

Cisco | CA | QA Automation Engineer | May 2016 – Feb 2020

- Enforced Test-Driven Development (TDD) practices, conducting rigorous test reviews with stakeholders
- Validated data migrations from SQL to NoSQL (MongoDB), ensuring data consistency across distributed systems
- Tested Kafka messaging systems to support real-time data processing requirements
- Automated 200+ automation scripts and reduced the testing times by 40%

Vodafone | Germany | QA Analyst | Mar 2013 – Apr 2015

- Developed Selenium WebDriver scripts with JUnit for parallel execution across various browsers and platforms
- Prepared 500+ Test cases in Rally for different scenarios
- Directly collaborated with clients to work on L1/L2 issues

TCS | India | Software Engineer | Jan 2012 – Feb 2013

- Participated in all the phases of STLC and SDLC cycles
- Underwent intensive technical training in Selenium

Education: Bachelors in Electronics and Communications (2011) Jawaharlal Nehru Technological University, India
