+1 408 431 1883 | anubhatia.cloud@gmail.com | Union City, CA 94587 | [LinkedIn](#)

IT and Cloud/Software Engineer with 10+ years of experience, including **5+ years specializing in cloud engineering and DevOps automation**. Expertise in **AWS, Azure, Kubernetes, Terraform, and CI/CD pipelines**, with a strong background in **software development, infrastructure automation, and cloud security**. Proficient in **Python, Java, Ruby, JavaScript, and C++**, with hands-on experience in **container orchestration (Docker, Kubernetes, Istio)** and **infrastructure as code (Terraform, Ansible, CloudFormation)**. Skilled in **cloud migration, optimizing cloud infrastructure for performance and cost, and implementing secure, high-availability architectures**. Experienced in Agile methodologies, collaborating with cross-functional teams to deliver scalable and resilient cloud-native solutions. Certified in **IBM Cloud, Kubernetes, Docker, and Python for Data Science**, with an **AWS Solutions Architect certification in progress**.

TECHNICAL SKILLS

Cloud & Infrastructure

Cloud Platforms: AWS (EC2, S3, Lambda, IAM, EKS, RDS, Route 53, CloudFront), Azure (ARO, AKS, VMs), IBM Cloud, GCP, Red Hat OpenShift (ROSA), RHEL

Infrastructure as Code (IaC): Terraform, CloudFormation, Ansible

Containerization & Orchestration: Docker, Kubernetes, Istio, Helm

Monitoring & Logging: AWS CloudWatch, Prometheus, Grafana, ELK Stack, Datadog

DevOps & CI/CD

CI/CD Tools: Jenkins, GitHub Actions, GitLab CI/CD, AWS CodePipeline

Automation & Scripting: Python, Bash, Shell Scripting, Terraform, YAML

Security & Compliance: IAM Role-Based Access Control (RBAC), Security Groups, AWS WAF

Programming & Development

Languages: Python, Ruby, Java, JavaScript, C++, Shell Scripting

Databases: MySQL, PostgreSQL, DynamoDB

Testing & Automation: Pytest, RSpec, Selenium, CodeceptJS, JUnit

Collaboration & Agile

Tools: Git, Jira, Confluence, Postman

Methodologies: Agile, Scrum, DevOps

WORK EXPERIENCE

Akamai Technologies, CA

Nov 2023 – Present

AWS Cloud Engineer

- Designed and implemented highly available, fault-tolerant AWS architectures, reducing infrastructure costs by 20% through reserved instances and spot pricing.
- Automated cloud infrastructure provisioning using Terraform, improving deployment speed and reliability.
- Migrated legacy on-premises applications to AWS (EC2, S3, RDS) with zero downtime, using serverless and containerized solutions.
- Implemented CI/CD pipelines using GitHub Actions, enabling seamless deployment of containerized workloads on AWS EKS.
- Enhanced AWS security posture by enforcing IAM role policies, VPC configurations, and automated security audits.
- Optimized cloud resources, implementing auto-scaling policies, AWS Cost Explorer, and cloud monitoring strategies.
- Managed project tasks and workflows through JIRA, streamlining project coordination and task tracking.
- Troubleshoot and optimized AWS services to ensure smooth operation and minimal downtime.
- Configured various file systems, including EBS, EFS, and S3 buckets, enabling versioning and lifecycle management for critical data retention.
- Designed and deployed a MySQL database using Terraform for automated, consistent infrastructure provisioning.
- Architected VPC with secure, segmented subnets, implementing Network ACLs and security groups to safeguard resources within private and public subnets.
- Automated deployment processes for high-availability websites in AWS using tools like CodeCommit, CodeDeploy, and userdata scripts.
- Configured Lambda functions to automate start/stop schedules for EC2 instances, reducing operational costs, and set up IAM roles for secure access.

IBM, CA

Oct 2018 – Oct 2023

Software Engineer / Technical Lead

Worked as a Software Engineer / Technical Lead at IBM, leading multiple cloud and DevOps initiatives. Contributed to ROSA (Red Hat OpenShift on AWS) by integrating IBM API Connect with AWS EKS and automating cluster management. Managed deployments and automation for Azure Red Hat OpenShift (ARO) using Terraform. Played a key role in CP4i Cloud Migration, optimizing CI/CD pipelines and troubleshooting Kubernetes operators. Also worked on Faspex, developing RESTful APIs, integrating AWS S3 for secure storage, and collaborating with DevOps teams to implement CI/CD workflows.

Project: ROSA (Red Hat OpenShift on AWS)

- Architected IBM API Connect (APIC) integration with ROSA, deploying microservices on AWS EKS clusters using Helm charts and Istio service mesh.
- Automated cluster scaling and resource management using ROSA CLI and Python scripts.
- Authored comprehensive multi-cloud deployment documentation for IBM CP4i operators across AWS, Azure, and IBM Cloud.

Project: Azure Red Hat OpenShift (ARO)

- Led manual and automated testing for Aspera Enterprise Server deployments on Azure compute resources, ensuring compliance with SLA requirements.
- Developed Terraform templates to provision Azure VMs and OpenShift clusters, reducing deployment time by 30%.

Project: CP4i Cloud Migration (AWS, IBM Cloud)

- Configured Jenkins CI/CD pipelines for automated deployment of IBM Cloud Paks across hybrid cloud environments.
- Debugged Kubernetes operator installations and upgrades using RHEL VMs and OpenShift Container Platform.

Project: Faspex (Ruby on Rails Application for Secure File Transfer)

- Built RESTful APIs for user configuration and integrated AWS S3 for secure file storage.
- Collaborated with DevOps teams to implement CI/CD workflows using AWS CodePipeline and Terraform.

IBM, CA

Sep 2015 – Sep 2018

Software Engineer / Automation QA

- Developed frontend automation for APIC E2E testing using CodeceptJS, Puppeteer, and Selenium.
- Automated functional test execution with Pytest for API integrations, reducing manual testing efforts by 50%.
- Configured Jenkins pipelines for automated test execution, improving test efficiency across IBM cloud applications.
- Designed and maintained IBM Aspera CLI operations for secure data transfer across AWS, IBM SoftLayer, and Google Cloud.
- Implemented load testing for Aspera's SaaS offering, ensuring high availability and scalability across cloud environments.

Portnov, CA

Apr 2015 – Aug 2015

Software Quality Assurance Tester

- Conducted end-to-end testing for multiple web and mobile-based applications, including an international movie streaming portal, a social networking platform, an e-reading client/server application, and a mobile calling app.
- Performed Localization Testing to validate UI elements, page layouts, and overall user experience across different regions, ensuring correct implementation of local language, currency formats, and time zone settings.
- Verified cross-platform compatibility and functional accuracy across Android, iOS, and web platforms.
- Collaborated with development and product teams to identify, document, and track bugs using industry-standard QA tools.

EDUCATION

B. Tech in Computer Science and Engineering

Maharishi Dayanand University, Haryana, India

AWARDS & CERTIFICATIONS

People's Choice Culture Award – IBM (2021)

Super Learner Award – IBM (2020)

Hackathon Winner – Best Internal Tool (Connect Testing Framework – 2017)

AWS Certified Solutions Architect – Associate (In Progress)

IBM Certifications: Kubernetes, Docker, Cloud Core, Agile Explorer

Python for Data Science – IBM
