📍 Ashburn, VA

SUMMARY

- Total 8+ years of experience as a Front end web developer in developing and designing user experiences of Internet/Intranet applications using HTML, HTML5, XML, DHTML CSS, CSS3, SASS, LESS, JavaScript, React.Js, Redux, ES6, Saga, thunk Web pack, Flex, jQuery, JSON, Node.js, Ajax, JQUERY Bootstrap.
- Expertise in React.Js and working with React Flux architecture.
- Experience in React.Js Libraries & middlewares like Redux-Thunk, Redux-Saga, Redux-Logger, Universal React Redux.
- Experience with modern build tool chains, like JavaScript frameworks/technologies such as Express.js, Angular.js, React.js, MobX or Flux.js.
- Strong Experience in using Data Visualization packages like Highcharts, Highmaps and D3.js (Data Driven Documents) and worked with canvas and SVG.
- Experience in developing modern web applications using Angular, Node.js, React.js, Express.js .Js and MongoDB.
- Expertise in using bug tracking tools like JIRA.
- Experience in Cross - Platform Mobile Development using React Native + Typescript based mobile app.
- Extensive experience in Unit Testing frameworks like Jest, Enzyme, and React Testing Library Integration Testing and in preparing test cases.
- Extensive experience in creating web servers using Node.js.
- Expertise in using React.js / Redux / JSX build user interfaces with states, props, middleware, store, action creator, reducer, presentational and container components and react hooks.
- Good knowledge of database connectivity (JDBC) for databases like MongoDB, PostgreSQL, MySQL.
- Experience on AWS services like lambda, S3 and EC2 experienced in developing the API using Lambda function.
- Working experience with Node environment using Node JS, NPM, Grunt JS, Bower.
- Expertise in React.Js framework to develop the SPA.
- Expertise in implementing the MVC architecture in backend applications Node JS along with Express JS.
- Really good understanding of React JavaScript framework and react native.
- Extensive experience in developing Responsive Web Design(RWD) using Media Queries and Bootstrap.
- Comfortable working with JSON data format to consume RESTful web services.
- Well aware of the deployment process in code fresh CI/CD pipelines and monitoring the changes to dev environments.
- Excellent knowledge of software development life cycle (Requirements gathering, analysis, design, development, testing and implementation) and SDLC methodologies such as Agile/Scrum and Waterfall.

TECHNICAL SKILLS

Web Technologies: HTML, HTML 5, XML, JavaScript, AngularJS, NodeJS, ReactJS, AJAX, JSON, CSS, CSS3, Bootstrap, UI Concept Modeling/Wire framing, Restful Web Services.

Frameworks: AngularJS, Bootstrap, ReactJS.

SDLC's: Agile (Scrum), Waterfall and Extreme Programming.

Editors: Notepad++, Sublime Text, Visual Studio.

Web Server: HTTP Web Server, RESTful Services.

Database: MongoDB, PostgreSQL.

Version Controls: Git and NPM.

Operating System: Windows, Mac OS, Unix.

Cloud Services: AWS S3, AWS Lambda, API Gateway, CloudFront, DynamoDB

State Management: Redux, Context API, Redux Toolkit

CERTIFICATIONS

- AWS Certified Developer - Associate

PROFESSIONAL EXPERIENCE

Sr. Full Stack Developer / Module Lead

PurpleTalk

May 2022 – Jan 2025

Responsibilities:

- Working as a lead and having responsibilities of managing and leading the team of 9 members.
- Designed and developed responsive modules based on Business Requirements using HTML5, CSS3, Bootstrap, ReactJS, Tailwind, NodeJS, Express, and MongoDB.
- Developed User interface by using the React JS, and CMS integration for content management system.
- Built out a component-based architecture using ReactJS and Redux.
- Worked on React JS Virtual DOM and React views, rendering using components which contain custom HTML directives in JSX.
- Integrated D3.js to accomplish dynamic data visualization for price monitoring module also integrated every existing API's to Azure API management to get all the attributes like security, usage plans, throttling, analytics, monitoring, and alerts.
- Developed UI using ReactJS and Redux and NextJS.
- Executed pair programming, Agile methodologies and software development practices such as Test-Driven Development (TDD) and Behavior Driven Development (BDD).
- Utilized JavaScript ES6 import/export module, Browserify for JavaScript build.
- Used SSR for increasing SEO performance and (Progressive Web App) PWA compliance for initial load and UX by setting headers implementing React-Helmet.
- Used NextJS for server-side rendering for better performance and for SEO and created reusable and testable React.JS functional and class components using ES6.
- Followed Agile Methodology throughout the project which included pair programming, sprints, user stories, backlog grooming.
- Refactored the app's navigation from the ground up using React Navigation to replicate native interactions.
- Rebuilt from scratch major feature components to improve performance and clean up code.
- Developed UI for web platforms using React, HTML5, CSS3, JavaScript and Bootstrap.
- Designed an intuitive, mobile and user friendly interface using React Bootstrap and parallax and also designed and implemented server-side RESTful web services using Node JS and handled communications to the client side (React JS) using JSON.
- Implemented multiple CI/CD pipelines as part of DevOps role for us on-premises and cloud-based software using Jenkins, Chef and AWS/Docker.
- Worked closely with UX Team to create pixel perfect designs Figma / UX wireframe and optimized the code by implementing concepts like Lazy Load of resources, caching, Change Detection.
- Responsible for development, programming, coding of complex and business critical information technology solutions using React JS, Redux, FORMIK, YUP to enable customer experience application.
- Involved in the releases involved in Continuous Integration and Continuous deployment CI/CD of the application.
- Involved in Agile process, Sprint meetings, attended daily standup meetings (Scrum), estimation meetings.

- Wrote data mutations in GraphQL which allows users to update their username and password information and used Highcharts to generate charts and worked on Dashboards for data analysis.
- Involved with bug fixing on functionality, performance and designing issues with JavaScript and jQuery and extensively used GIT for version controlling and regularly pushed the code to GitHub.
- Created Ajax calls to exchange (request / responses) information with MongoDB.

Key Achievements:

- Led cross-functional teams to ensure on-time delivery of scalable applications.
- Enhanced project workflows to improve productivity by 30%.
- Introduced automated testing practices, reducing bug reports by 25%.
- Successfully migrated legacy systems to modern frameworks, improving maintainability and reducing technical debt.
- Played a key role in pre-sales initiatives, providing technical insights and crafting project proposals.

Environment: HTML5, CSS3, Bootstrap, ReactJS, Tailwind, NodeJS, Express, MongoDB, D3.js, Redux, Webpack, NextJS, AWS, GraphQL, DevOps, GitHub, AJAX, Typescript, CI/CD, Agile, TDD

Sr. Full Stack Developer

PurpleTalk India Private Limited

May 2021 – April 2022

Responsibilities:

- Developed single page responsive webUI using HTML5, CSS3, Angular, React JS, Bootstrap, Tailwind, JavaScript and jQuery.
- Highly used Angular Router to build single page applications and for page navigation.
- Implemented two-way data binding among models, controllers and views to provide continuous updates among view and model.
- Worked on HTML, CSS, JavaScript, AJAX, jQuery, Bootstrap, Tailwind, JSON, XML.
- Used Highmaps.js for pointing out the airports in different locations and Highcharts.js for creating Dashboards consisting of Pie Charts, BarCharts, Donut Charts for monitoring the dataflow.
- Worked on React JS Virtual Dom and React views, rendering using components which contain additional components called custom HTML tags.
- Participated in code reviews, unit/functional test case reviews and refactoring.
- Used Webpack, Babel and gulp for transpilation configuration for Typescript to be converted to JavaScript and also used Node.js and NoSQL data stores.
- Deployed docker images on Rancher server to maintain docker containers and load balancing.
- Managed different infrastructure resources Cloud, and Docker containers.
- Involved in application design, site architecture design, using React, CSS, JavaScript and HTML programming to meet validation requirements.
- Built highly scalable and elastic cloud native application which can sustain a high volume of traffic.
- Worked with cloud platforms such as EC2, S3 of Amazon Web Service (AWS).
- Designed new modular UI components to be used/documented in our interactive pattern library using Pattern Lab & React Storybook.
- Performed NoSQL data modeling for DynamoDB and set appropriate sizing and monitoring.
- Developed NodeJS applications using MVC frameworks and installation of client side dependencies using Bower, Grunt, and NPM and followed Test Driven Development (TDD) and Pair Programming.
- Used Object Oriented Programming concepts to develop UI components that could be reused across the Web Application.
- Used Grid View, and Panels to display and manipulate data in Web Forms.
- Handled frontend architecture and matched pixel perfect accurate screens and designed responsive ROUTE MAP using MAPBOX features.

- Maintained project documentation and assisted in application design with React Native and involved in DevOps processes for build and deploy systems.
- Optimized the code by implementing concepts like Lazy Load of resources, compression, caching, Change Detection.
- Gained knowledge on reactive programming and its usage in real time projects.
- Committed code change into repository by using version control tool Git and GitHub.
- Worked with Databases like MongoDB and AWS (DynamoDB) for querying.
- Use Git version control and Interacted with Testing Team and Business Analysts for fixing the Issues and Module bundler Rollup, Webpack.
- Manipulated DOM, handled events and applied animation effects with Vue.js and used JavaScript and Drupal validation framework for performing front end validations.
- Produced comprehensive architecture strategy for environment mapping in AWS.
- Involved Active Directory, LDAP, AWS Identity and Access Management (IAM) Role for AWS API Gateway platform.
- Executed pair programming, Agile methodologies and software development practices such as Test-Driven Development (TDD) and Behavior Driven Development (BDD).
- Used D3.js in policy analysis module to create dynamic pie charts and bar charts and configured GitLab CI/CD pipelines using a YAML file in the project.
- Working with React Router for developing Single Page Applications SPAs.
- Using lifecycle methods and React Async Await.

Key Achievements:

- Enhanced user experiences by delivering feature-rich applications.
- Optimized resource allocation to improve delivery efficiency.
- Successfully led the migration of multiple applications to cloud-based services.
- Reduced development time by implementing reusable code components and libraries.
- Introduced performance monitoring tools to identify bottlenecks and optimize application performance.

Environment: HTML5, CSS3, Bootstrap, ReactJS, Tailwind, NodeJS, D3.js, Redux, Webpack, NextJS, AWS, GraphQL, DevOps, GitHub, AJAX, TDD, BDD, DynamoDB, React Native, Typescript

Associate Software Analyst

PurpleTalk India Private Limited

November 2016 – April 2021

Responsibilities:

- Involved in designing and developing the application using AngularJS, Bootstrap, JavaScript, jQuery, HTML5, and CSS3
- Built all applications using ReactJS, CSS/LESS, Redux, Jest, Webpack.
- Responsible for developing the UI pages using RXJS, Angular, HTML5, CSS3, JavaScript, Typescript, webpack and grunt, Angular Material, NGRX, and Bootstrap.
- Developed many JSP pages, used Dojo in Javascript Library, jQuery UI for client side validation.
- Built dynamic visualization components using chartJS, Mapbox, CSS in ReactJS components.
- Created API-driven interactive applications utilizing AJAX technology.
- Used Cucumber (BDD) to specify and test controller classes, models, view templates and helpers.
- Used Node Package Manager(NPM) to manage or install GULP, Express JS, mongoose, body-parser.
- Designed and implemented a Node.js based mobile text and voice messaging app and its cloud backend.
- Designed and implemented User using React JS components, Forms, Events, Keys, Router, Plus Redux, Animations and Flux Concepts.
- Configured webpack to transpile react and JSX to ES5 using Babel and react-loaders, Added css-loader and sass plug-in for pre-compiling SASS to css.
- Worked on Webpack, Rollup.

- Used NextJs for server-side rendering for better performance and for SEO.
- Developed responsive web design using Custom CSS3 and Bootstrap.
- Involved in developing RESTful web services using Node.js and Express.js frameworks.
- Responsible for developing a responsive web UI for ecommerce digital transformation website for mobile, tablet and desktop versions based on ReactJS, NextJS.
- Worked on to optimise the website pages using SEO techniques to make the pages to be maximum optimized and making sure there are no bad URLs.
- Used AWS S3 for storing and retrieving static content, AWS CloudFront for improving latency.
- Implemented request validations and module development using JavaScript.
- Used Jest and Enzyme for mocking functions and writing unit tests along with the setup for testing component coverage reports.
- Translated design team's UX wireframes and mockups into responsive, interactive features, using HTML, CSS, JavaScript and Bootstrap.
- Created prototypes with component based rendering using Webpack bundler and Babel Transpiler.
- Used JIRA as the bug tracking system to track and maintain the history of bugs/issues on an everyday basis.
- Used Devtools for debugging the code to inspect, debug and find the code fixes needed.
- Involved in solving the issues of cross browser compatibility like IE, Chrome and Firefox.
- Involved in writing the application level code to interact with APIs Web Services using AJAX, JSON and XML.
- Added interceptor logic for all REST Api's that adds headers for all Api calls and validates requests before sending to the server.
- Successfully mentor new team members through company-wide expectations and team processes.
- Document and circulate functional and design requirements, standards, and best practices.
- Used Redux for state management along with React JS.
- Using Redux and ReactJS fetched the API's from the back-end systems.
- Developed internal inventory tools for e-commerce companies using ReactJS.

Key Achievements:

- Streamlined development workflows, improving maintainability.
- Collaborated across teams to align project goals with client expectations.
- Played a critical role in the successful launch of several high-profile projects.
- Improved application performance by optimizing code and implementing caching strategies.
- Reduced deployment time by introducing automation tools for CI/CD pipelines.

Environment: HTML5, CSS3, Bootstrap, ReactJS, Tailwind, NodeJS, D3.js, Redux, Webpack, NextJS, AWS, DevOps, GitHub, AJAX, TDD, BDD, DynamoDB, AWS CloudFront, JIRA, React Native, Mongoose, CI/CD, Babel, Typescript

Core Competencies

- Technical Leadership & Team Mentorship
- Frontend Development (ReactJS, AngularJS, NextJS)
- Mobile Development (React Native, Cordova)
- Backend Development (NodeJS, Express.js)
- Cloud Solutions (AWS S3, Lambda, API Gateway, CloudFront)
- Database Management (MongoDB, DynamoDB)
- State Management (Redux, Context API)
- Performance Optimization and Code Reviews
- Pre-Sales Consultation & Project Estimation
- Cross-Functional Collaboration & Stakeholder Engagement

Education

Bachelor of Technology (B.Tech), Teegala Krishna Reddy college of Engineering
