

ARPIT CHATURVEDI

SDET

PROFESSIONAL SUMMARY

As a Senior QA Engineer at Experian, I develop, maintain, and execute automated test scripts using Java and Selenium for regression and integration testing. I also design and implement scalable and maintainable test frameworks using Java and Selenium WebDriver to support automated testing efforts across different projects and product lines.

With a Master's degree in Computer Information System and IT from University of Central Missouri, I have gained strong skills in Selenium Test Automation, Java, RESTful WebServices, SQL, Postman, Jenkins, Agile and Test Planning. I have applied these skills in various domains, such as insurance, health care, and election solutions, delivering quality and efficiency for end users and stakeholders. I am motivated by the challenge of building automatic and transparent solutions that improve the user experience and the business outcomes.

EMPLOYMENT HISTORY

SENIOR QA ENGINEER May 2024 - Present Experian Costa Mesa Lead QA efforts, ensuring software quality and reliability for web and mobile applications. Implemented automated testing, reducing manual testing time by 40%.

Collaborate with developers to identify and resolve defects, enhancing software performance. Analyze test results to provide actionable insights, improving overall product quality. Mentor junior QA engineers, fostering a culture of continuous improvement. Developed comprehensive test plans and strategies, ensuring high-quality releases for critical software applications.

Automated regression testing, reducing release cycle times by 25%, enhancing product delivery speed.

Provide ongoing support and guidance to QA team members, ensuring adherence to best practices and continuous skill development.

SENIOR QA ENGINEER Feb 2023 - Jan 2024 IEHP Rancho Cucamonga Develop and maintain automated test scripts using Java, Selenium for comprehensive testing. Write SQL Queries for database testing.

Collaborate with QA team and stakeholders to define test strategies and ensure thorough coverage.

Execute and analyze automated tests, report defects, and track resolutions to closure. Integrate automated tests into CI/CD pipelines using Jenkins, GitLab CI/CD, ensuring continuous delivery.

Conduct in-depth analysis of automated test results to identify patterns and root causes, driving continuous improvement in testing processes.

Conduct thorough analysis of test results to identify root causes, driving continuous improvement and enhancing overall software quality.

Implemented robust test automation frameworks, significantly decreasing manual testing efforts and accelerating release cycles by 30%.

TEST AUTOMATION ENGINEER May 2019 - Jan 2023 Clear Capital

Executed test plans including automation, unit, regression, smoke, and functional tests, ensuring robust software quality.

Logged and tracked bugs through JIRA, improving issue resolution efficiency. Wrote and maintained automation code using IntelliJ and Java, enhancing test coverage. Built and maintained an automation framework, streamlining testing processes. Designed, developed, and maintained test cases, ensuring comprehensive test scenarios. Created GIT pull requests for code reviews, ensuring code quality before merging. Developed automation scripts for functional and regression testing using Selenium WebDriver and Java.

Utilized Jenkins for continuous integration, maintaining consistent build quality. Ran

regression jobs for release testing, reviewed results, and ensured stable releases.

QA AUTOMATION ENGINEER Dec 2018 - May 2019 *Smartmatic Santa Monica* Tested voting application in agile environment using Node JS, ensuring robust performance and reliability.

- Developed step definitions with Cucumber and implemented them using Python, enhancing test automation.

- Authored acceptance criteria for user stories, improving clarity and alignment with project goals.

- Created and reviewed test plans with team, ensuring comprehensive coverage and quality assurance.

- Executed application tests on Ubuntu via command line, validating functionality in a virtual environment.

- Developed headless browser automation with Cucumber hooks, streamlining testing processes.

- Performed endpoint and web service testing using Postman, ensuring API reliability and performance.

- Wrote Cucumber scripts in Gherkin language, facilitating clear and effective test scenarios.

QUALITY ASSURANCE ENGINEER Aug 2017 - Nov 2018 *IEHP Rancho Cucamonga*

Generated and managed test cases, ensuring comprehensive coverage and accuracy. Executed test plans including automation, unit, regression, smoke, and functional tests, identifying critical issues.

- Logged and tracked bugs through TFS, leading to timely resolutions and improved software quality.

- Managed testing environments, facilitating smooth and efficient testing processes. Analyzed integration issues on live environments, providing actionable insights for resolution.

QA ENGINEER Sep 2015 - Jul 2017 *Nationwide Des Moines* Developed and executed functional and regression test automation scripts using Selenium suite.

- Enhanced test cases with Java, improving test accuracy and reliability.

- Identified and fixed errors in test cases, ensuring seamless execution.

- Analyzed application requirements, generating effective test cases.

- Reported and tracked defects, contributing to overall software quality.

EDUCATION

MASTER'S DEGREE, COMPUTER INFORMATION SYSTEM, AND IT 2014 - 2015 *University of Central Missouri Warrernsburg, MO*

BACHELOR OF ENGINEERING - BE, COMPUTER SCIENCE 2009 - 2013 *SWAMI VEVEKANAND COLLEGE OF ENGINEERING*
