

Arun Kumar Ashok Kumar (Tableau Desktop Certified)

+1 (512) 769- 2886 | arunkumar1989@gmail.com | Austin, Texas | [Public Profile](#) |

Over 13+ years of experience in business intelligence space predominantly in the banking sector and Claims health sector specialized in transforming complex data into actionable insights that drive strategic decision-making and operational efficiency. Strong expertise in designing and developing interactive dashboards and reports in Tableau and Power BI. Proficient in data visualization, data analysis, and business intelligence solutions, with a strong ability to communicate complex data insights effectively.

Technical expertise

- Experienced in leading Business intelligence/Analytical projects using tools including Tableau AI, Desktop, Tableau Server (Cloud), Tableau Prep, Qlikview, Power BI and integrating reports in Web frameworks.
- Improved Project Management processes through the implementation of a new business case template with enhanced project visibility to determine project status for Executive decision-making
- Experienced in LOD expressions, KPI calculations, Data blending, administering users, user groups, and scheduled instances for reports in Tableau/Power BI.
- Established Best Practices for Enterprise Tableau Environment and application intake and Development processes.
- Worked on developing SQL Database objects like Tables, Stored Procedures, Views, Indexes, Triggers, Constraints, CTE, Temporary Tables, User defined data types and functions using PL-SQL.
- Performed data migration tasks from SSRS to Tableau.
- Profound experience in performing data Ingestion, migration, data Processing (Transformations, enrichment, and aggregations).
- Experienced in creating incremental refreshes for data sources on Tableau server.
- Experienced in troubleshooting and performance tuning of reports and resolving issues within Tableau Server.
- Experienced in adapting and following SDLC methodology like Jira and waterfall life cycle.
- Expert in Alteryx ETL tool for data mining, cleansing and loading.
- Proficient in performing UAT testing by collaborating with the testing team.
- Installed patches on server and documented upgrade plan Tableau versions.
- Extensively used Tabadmin and Tabcmd commands in creating backups and restoring backups of Tableau repository.
- Helped with pattern recognition of financial time series and forecasting of returns.

Technical skills

BI Tools: Tableau Desktop 2023.1, Tableau Server, Tableau Prep, Power BI, SAP Business Objects v4.2, Amazon Quick Sight, PowerBI, IBI Webfocus, Salesforce Cloud.

Languages: R, Python, C, JAVA, SQL, XML, D3.js, NoSQL

Databases: Azure, Databricks, MSSQL, Microsoft SQL Server, Oracle 11g, Impala, Teradata, DB2, AWS Redshift, Hadoop, Hive, Oracle, Datastage ETL, MapR, Sharepoint

Platforms: Windows/Oracle, AIX/DB2, Solaris/Oracle, AWS Quick Insight Express

Project Management: JIRA, HP Quality Centre (QC)

Education

Masters in Business Analytics , 2024- Present, Trine University,United States

Bachelor of Science in Electronics and Instrumentation Engineering, June 2011, St.Peter's University, Chennai, India.

Post graduate in Data Science - University of Austin and Great Lakes University

Work Experience

Senior Tableau Cloud Administrator

Cuboid IT Solutions - Austin,United States

(May 2024 – Present)

Environment: Database Management (Aws Redshift,Tableau Cloud,Tableau Prep,IBI Webfocus, SaS instance,Salesforce,Data Visualization (Tableau), Salesforce,Power BI Admin,Tableau Server, D3.js,V4.2,Python,AWS.

Responsibilities

- Administered and maintained Tableau Cloud environments, ensuring high availability and performance.
- Implemented security protocols and ensured compliance with HIPAA regulations for handling sensitive patient data.
- Optimized workbooks and dashboards to improve performance and reduce load times for healthcare analytics.
- Managed user roles,licenses and permissions, ensuring appropriate data access for healthcare professionals.
- Involved in migration of dashboards from Power BI to Tableau.Hands on experience as Power BI admin.
- Developed data extracts, schedules, and refresh cycles to maintain up-to-date reports.
- Integrated Tableau Cloud with SQL databases, AWS, and healthcare data warehouses.
- Expertise in migrating AWS services to Tableau cloud and monitor their impact on Tableau deployments.
- Scheduled and maintained data refreshes through Tableau Bridge(to access organization's behind firewall data).
- Worked on identity management and authentication protocols (SAML, OAuth, Okta, Duo).
- Provided training and support to analysts and business users on Tableau best practices.
- Collaborated with data engineers and analysts to design scalable BI solutions for healthcare data.

Tableau Admin/Developer

ICICI Bank

(June 2021 – Nov 2023)

Projects

Tech Retail Assets Analytics

The goal of this project is to build tableau dashboards,maintain the dashboards in Tableau cloud for the assets analytics team by analyzing complex data, providing insights and recommendations for diverse support leadership teams.

Responsibilities

- Deployed and managed **Tableau Server** before transitioning to **Tableau Cloud**.
- Created **interactive dashboards** for tech retail asset providers, improving insights.
- Led **performance tuning initiatives**, reducing dashboard load times by **30%**.

- Collaborated with **IT teams** to implement **single sign-on (SSO) authentication** for secure access.
- Monitored system health and resolved **incidents** related to performance and connectivity.
- Conducted user training and actively promoted adoption of Pardot, Design, implement, and monitor for automated loan campaigns across email and web, and advise customers on how to optimize further.
- Automated Ad-hoc manual data requests into tableau dashboards for TAM engagements
- Partnered with the technology team and engineering team to define new data models needed in the AWS redshift data warehouse where Data Models are automated through Airflow and Python scripts.
- Utilized Tableau AI to accelerate time to value and reduced repetitive tasks for the data analysis with smart suggestions and in-product guidance.
- Thoroughly QA new and modified dashboards for accuracy and functionality.
- Developed a solid grasp of knowledge on support delivery metrics such as CSAT, time to respond (TTR) and key business drivers to make recommendations and influence strategic decisions.
- Strong expertise in documenting Project tracker with project dependencies and communicated appropriately in terms of time required to complete.

Senior Tableau Business Intelligence Developer

Wipro

(Apr 2019 – Jun 2021)

Environment: Database Management (on Prem Hadoop , Business Objects, Alteryx ETL, MapR, Data Visualization (Tableau), Salesforce Cloud, Amazon S3, Tableau AI, D3.js,Sharepoint, Python, Power BI Admin,SAP Business objects V4.2,Python.

Projects

Human Resource Analytics(HR Analytics)

The goal of this project is to lead the tableau and Power BI dashboards and business intelligence team to new and expanded compliance requirements applied to the management and accounting firms among the SOX Act mandates.

Responsibilities

- Lead the Data Visualization DV Working Group, serving as the Tableau subject matter expert to solve quantitative business problems and provide decision analytics.
- Led multi-functional technology teams and key contributor and mentor for analytical team and resources; managed development of innovative analytical systems and applications.
- Expert in Salesforce Database Managements Systems.
- Managed Salesforce requests and resolved daily usage issues, reducing the median time to resolution by 20% within my first three months.
- Served as Business Intelligence SME and transformed raw data insights with custom-made Alteryx ETL application to prepare unruly data for reporting.
- Performed data migration tasks from Business objects to tableau and focused on the dashboard and reporting.
- Utilized Tableau AI to generate insights on Key metrics,generate charts based on data.
- Used Tableau Prep to perform fuzzy clustering and turn repetitive tasks, like grouping by pronunciation, into one click operations.
- Created custom list Forms for all the Main lists, custom Ribbon buttons for document library & custom list. Custom web-parts with custom web part properties, custom user controls used in

- Manage Production, Test and Development environments including installation of patches, security administration and access controls in Tableau.
- Reviewed, assessed, and promoted adoption and standardization of Tableau support solutions.
- Defined and derived KPIs and utilized custom date functions to calculate YoY (year over year) and month over month comparisons.
- Designed and developed Data Lake architecture and handled complex queries, ETL/SSIS packages, stored procedures, Unions and triggers.
- Designed, developed Tableau Server/Desktop BI Reports, Dashboards and Alerting solutions.
- Worked on Oracle cloud platform and to address the entire analytics process including data ingestion and modeling, data preparation and enrichment.
- Created parameters for custom filters and advanced actions and custom tooltips.
- Creating users, groups, projects, Data connections, settings as a tableau administrator.
- Creating new Schedule's and checking the task's daily on the server
- Maintaining server activities, user activity, and customized views on Server Analysis.
- Involved in back-end activities like configurations, installing tabcmd to schedule the reports and setup email reports using command lines.
- Created numerous dashboards in Tableau Desktop based on the data collected from Campaigns by importing and blending data from MS Excel and CSV files along with Business objects Databases.
- Deployed Tableau dashboard using Tableau API in a web framework, utilized tools like TeamCity and Octopus for deployment.
- Maintained UAT Test Log and wrote Test Evaluation, Summary Reports.

Lead Senior Tableau Admin/Developer
Prime Tech Solutions

(Aug 2015 - Jan 2019)

Environment: Tableau desktop, Tableau Prep, Alteryx, Tableau Online, Power BI, Agile methodology life cycle, Oracle Analytics Cloud Platform, Salesforce, SAP BO, Databricks, NoSql, Python, Blob storage, Apache Spark, Alteryx, SSIS, Tableau API.

Projects

Finance Performance Analysis

This project draws data insights and includes recommendations of venture capital and private equity firms tied up with payments. The dashboards developed improve equity services and performance and help to understand customer profiles and behaviors.

Responsibilities

- Lead a team of 10 members diversified in data analysis, business intelligence, testing and deploying the dashboards in server by following agile methodology life cycle.
- Performed statistical hypothesis analysis on the business problem by using ML algorithms.
- Acted as a lead in joint-venture with the private equity firms and designed a global road map to launch and manage third-party sites for AP and drive new revenue opportunities that have, to date, increased revenues by more than \$9 million on an ongoing annual basis in the very competitive business in Tableau.
- Used Tableau Prep for performing ETL tasks to find the data stack space for data transformation.
- Involved in end to end implementation and enhancements of Payments Insights process, data starting from requirement gathering and dashboards development in Tableau Desktop.
- Tableau Desktop/Admin Specialist with strong hands-on experience in fetching data from various data sources like salesforce cloud and creating meaningful reports using containers, actions, sets, groups, calculated fields, LODs, custom date, parameters and data blending.

- Worked as microstrategy administrator in maintaining production and development servers.
- Supported new oracle cloud business models and existing on-premises models to create analytics for integrating with tableau dashboards
- Migrated new/update microstrategy schema with new reports and all underlying objects.
- Worked on microstrategy complex reports using metrics, attributes, advanced filters and using many complex methods to resolve client report completion.
- Conducted data blending, data preparation using Alteryx and SQL for Tableau consumption and publishing data sources to Tableau server.
- Designed and set up Enterprise Data Lake to provide support for various use cases including Analytics, processing, storing and Reporting of voluminous, rapidly changing data.
- Efficient in finding out the best models for a dataset through model accuracy methods, test -train scores and other methods.

Lead Senior Tableau Admin/Developer
Perisoft Technologies

(Jun 2011 - Mar 2014)

Environment: Tableau desktop, Tableau Prep, Alteryx, Power BI, MongoDB.

Projects

The goal of this project was to develop reports and dashboards and provide strategic analysis and recommendation based on loans and deposits and perform trend analysis across regions.

Responsibilities:

- Created rich dashboards using Tableau and prepared user stories to create compelling dashboards to deliver actionable insights.
- Served as Business Intelligence SME and transformed raw data insights with custom-made Alteryx ETL application to prepare unruly data for reporting.
- Utilized NoSQL queries to retrieve data from DBMS like MongoDB.
- Setup and Deployed dashboards to server central location for portal integration.
- Published Dashboards on to Tableau and from there consumers would choose viewing medium laptop, pc, iPad
- Expertise in BW Performance Tuning: Performed tuning measures of Queries by maintaining Aggregates, roll up, Compression, partition, Process chains, indexing of info cubes and use of statistics for the same.
- Created Daily, Weekly, Monthly, quarterly, and Annually illustrative interactive dashboards to analyze the billing patterns of customers.
- Build the packages for the corresponding templates within ER Executive Reporting to design the report in desktop Intelligence according to the reporting requirements.
- Utilized corporation developed Agile SDLC methodology.
