PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience in delivering scalable, high-performance enterprise applications built with **Java**, **Spring Boot**, and modern front-end frameworks including **Angular** and **React**. Demonstrated expertise in secure **RESTful API** development, cloud-native deployments on **AWS** and **Azure**, and **CI/CD** pipeline automation. Recognized for optimizing performance, mentoring teams, and delivering innovative solutions across diverse industries.

SKILLS

- **Languages:** Java (Core, 8/11/17), Python, JavaScript, TypeScript, SQL
- **Backend & Frameworks:** Spring Boot, Spring MVC, Microservices, RESTful APIs, Spring Security, Node.js, Hibernate, Spring Data JPA, GraphQL, JSON, YAML
- **Frontend:** ReactJS (Hooks, Redux), AngularJS, HTML5, CSS3
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, EKS), Azure (AKS, Blob Storage), GCP, Docker, Kubernetes, Terraform, Jenkins, Ansible, Git, GitHub Actions, CI/CD Pipelines
- **Messaging & Big Data:** Apache Kafka, RabbitMQ, Azure Service Bus, Spark
- **Databases:** PostgreSQL, MySQL, MongoDB, Oracle, Cosmos DB, Redis, NoSQL, RDBMS
- **Testing & Tools:** JUnit, Mockito, TDD, BDD, Selenium, Cucumber, Postman, Maven, Gradle, JIRA, Agile/Scrum, Eclipse/IntelliJ IDE
- **Monitoring & Debugging:** Splunk, ELK Stack, Prometheus, Grafana

EXPERIENCE

Bank of America

Jun 2024 - Present

Senior Software Engineer

Charlotte, NC

- Designed and implemented high-performance **Spring Boot microservices** with **WebFlux** following **Microservices Architecture** principles, improving scalability and increasing transaction throughput by 15% for high-concurrency banking systems using **GraphQL**.
- Secured **REST** and **GraphQL APIs** with **Spring Security**, **OAuth**, and **JWT**, ensuring strict authentication and authorization, and compliance with banking and regulatory requirements.
- Built **ReactJS dashboards** with **Redux** using **TypeScript** to streamline loan and account management, reducing manual processing time and improving operational efficiency.
- Developed **GraphQL** services to optimize frontend data access, cutting API overhead and boosting performance for customer-facing platforms.
- Containerized and deployed microservices on **Azure AKS** with **Terraform**, implementing **Infrastructure as Code** for secure, scalable, and automated cloud deployments.
- Integrated **Apache Kafka** and **Azure Service Bus** for asynchronous event-driven payment processing, reducing system overloads and ensuring resilient workflows.
- Implemented DevOps best practices for continuous integration and continuous delivery (**CI/CD**), resulting in 10% faster deployment cycles.
- Automated CI/CD pipelines with **Jenkins**, **Maven**, **Docker**, and **Kubernetes**, decreasing release cycles from hours to minutes while reducing deployment errors by 12%.
- Strengthened quality through unit, integration, and **BDD** testing (**JUnit**, **Mockito**, **Selenium**, **Cucumber**), enhancing test coverage, performing code reviews and reducing production defects.

CVS HealthCare

Dec 2020 – Jul 2023

Software Engineer

Woonsocket, RI

- Modernized healthcare claims processing platforms by engineering Spring Boot microservices with **WebFlux** in **Java**, reducing average claim response times.
- Enforced **HIPAA**-compliant authentication and authorization with **Spring Security**, **OAuth2**, and **JWT**, mitigating compliance risks and lowering regulatory exposure by 15%.

- Designed **ReactJS** and **Angular user interfaces(UI)** using Javascript for claims adjudication and policy management, improving clinical and administrative workflows.
- Built **GraphQL APIs** to deliver patient and provider-centric data efficiently, minimizing over-fetching in analytical dashboards, and implemented query optimization and performance tuning techniques to improve API response times by 5%.
- Pioneered containerized microservices on **AWS EKS** using **Docker** and **Kubernetes**, establishing reproducible, secure cloud environments for claims and eligibility systems.
- Enabled real-time patient notifications and claims management by integrating **Kafka**, **RabbitMQ**, and **Azure Service Bus**, improving processing speed.
- Enhanced observability using **Prometheus**, **Grafana**, **Splunk**, **ELK**, **Datadog**, and **Appdynamics**, enabling proactive system monitoring, logging and reducing downtime by 11%.
- Contributed to analysis, design, development, and debugging of healthcare solutions, collaborating with **Agile** teams to align with patient care priorities and compliance mandates.

Costco

Jun 2018 – Dec 2020

Java Full Stack Developer

Issaquah, WA

- Developed **Java 8** and Spring Boot microservices for retail order processing, integrating seamlessly with inventory, payments, and fulfillment systems for real-time e-commerce transactions.
- Built and enhanced **Angular and ReactJS** applications with **HTML5**, **CSS3**, and **JavaScript**, reducing checkout errors and improving overall user experience.
- Integrated **GraphQL APIs** into **ReactJS** apps to optimize product search and filtering, cutting page load times and improving customer responsiveness.
- Developed **Node.js** automation scripts with **Kafka** integration for catalog synchronization and order reconciliation, reducing manual effort by 10% which improved data quality for financial reporting.
- Secured applications with **Spring Security** and **JWT**-based role management for both customer-facing portals and internal tools.
- Designed and managed **CI/CD** pipelines with Jenkins, including L2/L3 production support and troubleshooting, reducing downtime and accelerating release velocity.
- Migrated portions of a legacy monolithic system into **Spring Cloud**-based microservices, leveraging API Gateway and service discovery for scalability.
- Applied Agile practices with **JIRA** for backlog management and sprint tracking, improving collaboration and delivery timelines, and managed release management processes to ensure smooth deployments.

EDUCATION

University of Central Missouri

Master's in Computer Science
