

SUMMARY:

A creative and professional team player with over all 15+ years of experience in Informational Technology with emphasis on Software Testing/Quality Assurance which includes, **Extensive Experience in JIRA SME Administrator (11 Years of experience as a JIRA/Confluence, JSM Atlassian tools Architect /Administrator)** and leading the QA teams to **setup QA environment** and to perform successful testing. **Experience** in testing **Standalone, Cloud and Data Center, Client Server**, and Manual testing techniques including White Box testing. **Configuration of Test Management and Change Request tracking tools** like ALM, JIRA, Confluence, Bitbucket, JSM, Jira Align, ITSM, and Atlassian third-party tools.

- Extensive experience **Migrating SME JIRA Server or Data Center to Cloud**, creating a **roadmap for migration strategy process and steps (Pre-assessment, Evaluate, Plan, Prepare, Test, Migrate and Launch)**.
- Extensive experience in JIRA – Atlassian Tools assist with the technical design and manage, **implementation, configuration, development, Upgrade, Migration and Administration**. Designed the target architecture and environment, focusing on scalability, performance, security, and compliance requirements. Coordinating, planning and analysis of user requirements, procedures, and problems to automate processing or to improve existing systems.
- Primary responsibility was as a consultant on **full-scale JIRA Atlassian tools migration strategy** and Audit from Datacenter to Cloud for all company projects.
- Experience in setting and configuring QA Environments for different business domains such as Healthcare, Finance,
- Banking, HR, Broadband Communications Services (Telephone/Wireless), Retail and Energy.
- Configuring, maintaining, administering, **Building Custom Dashboards and reports with 3rd party add-ons**, Data Analysis, Data Reports and enhancing **JIRA Core, JIRA Align, JIRA Crowd, Microsoft Azure AD, LDAP, JIRA Software, JIRA Service Desk, Jira Service Management, Confluence, AIO Reports** - other key components, Single Sign – On (SSO) and add-ons.
- Expert **Third-Party Tool Transitions**, **Analyze and migrate** data and workflows from non-Atlassian tools in to JIRA, Confluence or other Atlassian products.
- SSL implementation for both JIRA and other Atlassian tools (Installing VeriSign SSL certs on the VIP's on Load balancer and copying the SSL Certs of Atlassian tools application in to JIRA server and vice versa to get the Application Links working between JIRA and Confluence or Atlassian tools).
- Configured instance access for third party application utilizing JIRA REST API.
- LDAP/Active directory integration with JIRA (using the Atlassian Crowd and the JIRA User Directories).
- Jira **Insight** (Asset Management) Expertise in IT Service Management (ITSM) processes creating Teams, add Program, team members, Modules, and components. **EazyBI, Script Runner, Zephyr, Xray, JSU, Power Bi, Check List, Advanced Roadmaps, Statuspage.**
- Migrate incidents, requests, Asset Management, and other workflows from multiple existing tools to Jira. Researches, recommends, and configures plugins to enhance Jira/BitBucket and other Atlassian tools functionality and meet specific business requirements.
- Onboard new teams into JSM, **maintain Object Schema and Attributes in Insight Asset Management**.
- Creating and manage day-to-day operations of user management, permissions, complex jira workflows, Automations, API, Post Functions. setting up dashboards and generating reports. Design and develop customizations and plugins.
- Extensively involved in various phases of Software Development Life Cycle (SDLC) with experience in managing testing lifecycle
- (STLC) using Waterfall, **Agile**, MSF, V-Model, RUP, and RAD Models.
- Create and maintain custom workflows, fields, screen schemes, dashboards, metrics, reports, permission schemes and notification schemes to meet business needs.
- Expertise in **Migration from QC/ALM/Rally to JIRA**. Support, compile and troubleshoot **Atlassian tools, Design custom JIRA workflow. Integration with JIRA to HP ALM and other tools.**
- Experience in **Migrating and upgrading** from any version of **Test Director to Test Director or Quality Center** to JIRA.
- Compile and analyze development and operational **bug reports. Support JIRA Project Administration involving custom, complex projects, workflows, security schemes, custom fields, and dashboards, Screens, and reports configurations.**
- **Provided KT sessions and Trainings to technical and non-technical teams to use Atlassian tools.**
- Designing the infrastructure architecture and **migration plan** aligned to **organization process & guidelines.**
- **Web based applications** using Automation tools, **Building Custom Dashboards and reports with 3rd party add-ons.**

TECHNICAL SKILLS

Hardware	IBM PC, HP Workstation
Operating System	Windows 2000 Server & Professional, Windows NT, Windows 95/98/ME, Unix, Linux
Database	Oracle 9.2/10.2 0.4. SQL server 2003,2005,2008
Languages	COBOL, SQL, TSL, Visual Basic 4.0//5.0/6.0, Crystal Reports.
Web server	IIS 6.0, JBoss, Java Web Server
Networking/Web	FTP, Telnet, TCP/IP, and VPN
SDLC Tools	Mercury Interactive QuickTestPro 6.5/8.0/9.0, Win Runner Test Director, Quality center 9.0/10, Load Runner, Track Record 6.0/5.0, Mantis BT, PR Tracker, Test Track Pro, TRAC, Fogbugz. TASKTOP. JIRA, AIO Reports, Confluence. Script Runner, Zephyr, Xray, JSU, Plans, JEMH, Power Bi, Check List, Insight, Asset Management. ServiceNow, ALM, Salesforce.EazyBI, Script Runner.

PROFESSIONAL EXPERIENCE

Jira Administrator - Atlassian Migration Consultant

KPMG, Montvale, New Jersey – Consultant

FEB 24 – FEB 25

KPMG firms operate in 143 countries and territories across the globe, offering audit, tax and advisory services. KPMG Digital Nexus is the firm's technology organization, committed to serving our professionals and clients through a best-in-class technology experience. The Digital Nexus organization is divided into 7 groups.

As an **Jira Administrator SME- Atlassian Tools**, leading JIRA and Confluence **Data Center Migration from On prem to Cloud** designing, implementing, monitoring, configuring, issue tracking, troubleshooting, and managing 5 offshore team members. From 1713 projects to 521 projects migrated in 2 batches Non-Zephyr and with Zephyr projects including Advance Roadmaps with 5,000 JIRA users.

Roles and Responsibilities:

- Developed and executed a comprehensive **migration strategy (Pre-assessment, Evaluate, Plan, Prepare, Test, Migrate, Launch)** outlining the approach, objectives, timeline, and key milestones.
- Created a detailed migration plan, including tasks, **run books, checklists**, and responsibilities based on the **Statement of Work (SOW)** for each **migration phase**.
- Designed the target architecture and environment, focusing on scalability, performance, security, and compliance requirements.
- Maintained consistent communication with stakeholders, providing weekly status reports and coordinating weekly meetings with the migration manager, Zephyr, and Atlassian teams.
- Integrate Jira and Confluence Data Center with other systems, workflows, custom fields, Configure, Support, Coach, collaborate, and guide cross-functional teams to gather, scope, and design requirements, filters, permission schemes, apps configs, automations, boards, scripting, analytics, etc.
- Test Migration UAT, load data onto target system. Design & configure target system, extract data from source, transform & prepare data and scripts. Validate data migration, provide post-migration support.
- Developed and executed pre- and post-migration testing strategies to ensure the integrity and success of the migration plan.
- Managed sign-off for deliverables and confirmed migration completion for all migrated projects. Documented pre- and post-migration checks and user acceptance testing (UAT) reports.
- Created an inventory of all projects, detailing configurations, workflows, and custom fields. Identified project dependencies and compiled a comprehensive dependency checklist.
- Assessed data compatibility between **JIRA Server and JIRA Cloud, setting up Atlassian Access (SSO) for external directory integration**.
- Verified **JIRA Server compatibility** with the migration assistant, enabling service accounts and permissions for the migration process.
- **Cleaned up unused data, validated user accounts, and resolved invalid or duplicate email addresses** and user IDs.
- Enabled JIRA configurations in the target cloud environment, installed JCMA, performed pre-migration checks, and addressed existing issues.
- Conducted UAT testing to identify migration issues and validate data and user accounts in JIRA Cloud, notifying support of the migration plan.
- Reviewed public access settings, archived 1,288 projects, Zephyr data, and ensured proper setup of JIRA Server, JVM heap size, and resolution of email address issues.

Environment: Zephyr, ServiceNow, Salesforce, Windows Server 2012 R2, SQL Server 2014, Microsoft IIS 8.5, SNAP, MS Office, Nexus, JBOSS, Java, J2EE. Microsoft Windows 10, Sales Force, MS Office 2016. Groovy Scripting, SQL.

Jira – Atlassian Administrator

Hyland Software, Westlake, Ohio

NOV 20 – DEC 23

Hyland is a leading content services provider that offers a range of cloud-based technologies, solutions, and services for managing content across the enterprise. With over 4,000 employees located in dozens of countries worldwide.

As an Jira/Confluence/Bitbucket Primary Atlassian Administrator, I was responsible for Atlassian tool designing, implementing, monitoring, configuring, issue tracking, troubleshooting, and **Migrating Jira from DC to Atlassian Cloud. Support more than 265 projects and 34 Project Managers**. Working with Hyland/Law Logix/Alfresco/Another Monday/Nuxeo (Five) Instances Jira, Confluence & Bitbucket. I Implemented Defect Module Standardization and upgraded Jira 8.2.4 to 8.7.1 and Confluence 6.15.9 to 7.11.1. Working on daily basis tickets ACR (Atlassian Change Request), Working with Change Management team, R&D Resource Request, and supporting offshore team.

Roles and Responsibilities:

- Configuring, maintaining, administering, Building Custom Dashboards and reports with 3rd party add-ons, Data Analysis and enhancing **JIRA Core, JIRA Align, JIRA Crowd, Microsoft Azure AD, LDAP, JIRA Software, JIRA Service Desk, Jira Service Management, Confluence**, other key components, Single Sign – On (SSO) and add-ons. **Advanced Roadmaps, Script Runner, Rich Filters**.
- Jira Atlassian Enterprise **Insight (Asset Management)** Expertise in IT Service Management (**ITSM**) processes creating Teams, add Program, team members, Modules, and components. Script Runner, **Zephyr, Salesforce, Xray, AIO Reports, Data Analysis, JSU, Plans, Power Bi, Check List**. Jira Advanced Roadmaps, Statuspage.
- Creating and Manage complex **jira workflows, Automations, API, REST calls, JEMH, Post Functions. setting up dashboards** and generating reports.
- Expert Plugin Management familiarity with evaluating, configuring, customizations, installing, maintaining plugins or add-ons to extend the functionality of Atlassian tools. **Expert implementing CI/CD** (Continuous Integration/Continuous Deployment).
- Expert in IT Service Management (ITSM) processes, particularly in the IT Asset Management (ITAM) domain
- Expert working with Splunk, Dynatrace, Clarity, Service Now, JQL, Custom Dashboards, Filters, and reports.
- Working on tickets ACR/R&D Resource Request Jira & Confluence: **Custom Fields, Fields, Workflows issues, Screens Issues, Permission Schemes, Manage Global Permissions, Notification Schemes, Screen Schemes, Issue types, Metrics, Users access issues, JSM, Dashboard and**

Kanban issues, Global Permissions issues, Shared filters - filters, group subscriptions, email notifications, Post Function Issues, Plans and other apps issues. Page restriction issues and Spaces permission issues. Automation, subscriptions.

- **Create, Manage, and support all administrative functions associated with Jira, Confluence, third party add-ons, and integrations.** AWS and Devops support, JIRA Data Center.
- Collaborates with stakeholders to gather requirements for **New projects creating, configure projects.** Building custom screens, screen schemes. Very good knowledge and experience in implementing plug-ins.
- **Customizing access using permission schemes, groups, role.** Integrate the Atlassian tools using Crowd to enable the Single Sign On (SSO).
- **Building custom workflows including use of conditions, validators, post-functions.**
- **Cloud Migration:** Audit Instances (Hyland Confluence & Jira,) Identify areas of improvement, Clean-up Instances, Implement R&D Standardizations, Consolidate Instances, Setup Cloud & Configure Environment, Configure Atlassian Access, Validate Data Migration, UAT, Go Live Data Migration & Go live. Also created Runbook and Check list.
- Mentor, coach, and train other team members. SME support. Implementing 3rd party add-ons.
- Operate as a trusted technical advisor; identify, **troubleshoot**, and resolve issues in a **timely manner.** Expertise and best practice knowledge to achieve broad, **innovative problem resolution.**
- Developed various customized reporting tools using API to generate complex test execution reports, User permission report etc.

Environment: Windows Server 2012 R2, SQL Server 2014, Microsoft IIS 8.5, SNAP, MS Office, Nexus, JBOSS, Java, J2EE. Microsoft Windows 10, Sales Force, MS Office 2016. Groovy Scripting, SQL.

HP ALM - Jira Atlassian Administrator - Consultant

PSE, Bellevue, WA

MAR 18 – AUG 20

Puget Sound Energy (PSE) is a Washington state energy utility providing electrical power and natural gas primarily in the Puget Sound region of the northwest United States.

My role as an ALM Admin supported 21 projects under Get to Zero program. Implemented Defect Module Standardization, also upgraded ALM 12.01 to 12.55 ALM including performance tuning/scaling, install and **created new JIRA and Confluence Instances.**

Support included more than 375 application teams and a large project management office (20+), that cared for all aspects of infrastructure stand-up, new domain, data conversion, extracts, data mapping, development, testing, implementation, and production support. Led status reporting and command center activities at Go-Live.

Roles and Responsibilities:

- **Upgraded HP ALM / PC 12.01 to 12.55.** And Assisted in **Decommissioning** 150 servers. Created **Disaster Recovery Plan** for Micro Focus ALM/PC 12.55. Migrated HP ALM instance to **HP ALM and JIRA.**
- Created **Dashboards** using **AIO Reports** and **Kanban boards**, for all teams and executives to use **during 5 Mocks and Go-Live** time to **track bugs and action items.** Expert in creating and **configure project boards** through **AIO reports real-time.**
- Developed various customized reporting tools using API to generate complex test execution reports, User permission report etc.
- **Install and Configuration** of Atlassian **Jira, Scripting, Devops, Bitbucket, Bamboo, Devops, EazyBI, AWS, Fisheye, HP ALM**
- Design custom HP ALM/JIRA **workflow**, Plan, evaluate, deploy, operate, and maintain tools to suit the expanding user-base.
- Maintaining customizations Custom Issue Type, across versions of **JIRA workflows, field permission schemes, notification schemes, screens schemes, etc.** Working on SNAP tickets.
- Administer the JIRA instances on a day-to-day basis including performance tuning/scaling the instances, storage, indexing, etc.
- Determine ways to optimize/improve JIRA and **JIRA Agile setup** and process **workflows**, as well as identify where functionality can/cannot meet user requests.
- **Archived 485 projects backup to ALM repository.** Also **Defect Workflow standardization customization.**
- **Customizations Custom Issue Type**, across workflows, **field permission schemes, notification schemes, screens schemes, etc.**

Environment: Windows Server 2012 R2, SQL Server 2014, Microsoft IIS 8.5, SNAP, MS Office, Nexus, JBOSS, Quick Test Pro, Java, J2EE. Microsoft Windows 10, DPL, Pega, M6, SAP. Sales Force, Sterling7, MS Office 2016.

HP ALM - Jira Atlassian Administrator - Consultant - CTS

Travelport, Centennial, CO

JUL 10 – FEB 18

Travelport is a Travel Commerce Platform, focused on providing distribution, technology, payment and other solutions for the \$8 trillion global travel and tourism industry. Travelport serve over 170 countries globally. **Travelport Galileo** Web Services uses Web Service technologies offering pre-built services to transfer data between client travel applications and the **Travelport Apollo.**

Implemented Defect Module Standardization, bringing down to 120 projects from 485 projects, **Project Template standardization**, also upgraded ALM 11.5 to 12.2 ALM including performance tuning/scaling the instances and users around the world 170 countries 4850 users plus.

Created new instance domain migrated all open defects issue from RTC/ALM to JIRA. Introduced JIRA and HP ALM Integrated multiple JIRA instances with HP ALM instance for Open Defects and Requirements modules and successfully **transferred the data in bidirectional** with **TASKTOP** application with **attachments.** **Migrated** 155 products with 450 application instances to **JIRA from RTC/HP ALM.**

Roles and Responsibilities:

- Implemented integration of these tools using **ConnectALL** and HP **ALM Synchronizer.**
- Working on TISSC tickets daily basis users issue resolved during the period 2800 plus tickets issue resolved. **Customization of HP ALM Defect Module** to map to the JIRA sorties. Designed the infrastructure architecture and migration plan aligned to organization process & guidelines. **Upgrade HP ALM 11.5 to 12.2.**
- **Archived 365 projects backup to ALM repository.** Also **Defect Workflow standardization customization.**
- Developed various customized reporting tools using API to generate complex test execution reports, User permission report etc.
- Customizations Custom Issue Type, across versions of **JIRA workflows, field permission schemes, notification schemes, screens schemes, etc.**
- Create **issues/queries** both in JIRA and ALM, the set of queries are for Epic, Story, and bug issue types.

- Worked directly with QA and Development Team to coordinate requirements, Test Plan, and Test Lab.
- Created and **Setup Users, Groups, Filters, and Reports**. Designed and rolled out of **standard template across all projects**.

Environment: Windows XP, Oracle 10g, ALM 11, ALM 11.5, ALM12.2 SQL Developer, Putty, TISSC, MS Office, Orbiter, Nexus, JBOSS, Quick Test Pro, Java, J2EE.

QC /HP ALM Admin - Consultant - CTS	
PepsiCo, Plano. TX	FEB 06 – JUN 10
Performance Tester Consultant– Satyam Computer Services	
Satyam, Hyderabad, India	MAY 02 - NOV 05

Bachelor of Commerce - Osmania University- Year 1987. Hyderabad, India
