Summary:

- Experienced SAP BTP Cloud Platform Integration (CPI) Consultant with over 10 years of hands-on expertise in designing, developing, and implementing SAP integration solutions (CPI), BTP-IS. Skilled in using SAP CPI to connect cloud and on-premise systems, improve business processes, and deliver high-performance results. Proven track record of successfully managing complex integration projects from end to end, ensuring alignment with company goals while maintaining smooth operations and security. Comfortable working with a variety of SAP tools and technologies, and known for strong problem-solving abilities and effective communication skills.
- Lead a team of 8 at the client site, ensuring that project tasks and quality management are carried out with precision and attention to detail. I have strong visibility and work closely with both managers and consultants at the client location. As a Senior Consultant, my role involves working closely with the functional team to fully understand the business requirements and then translating those into technical specifications. Before diving into coding, I conduct prototyping to ensure we're on the right track. My responsibilities also include coding, testing, and ensuring the technical quality of the integration objects. I have a solid understanding of the architecture and functionality of SAP CPI and am highly skilled in using various technical adapters like SuccessFactors, SFTP, IDOC, SOAP, REST, MAIL, FILE, JMS, ODATA and HTTP to deliver seamless integrations.

Key skills:

Groovy, SAP CPI, HANA Cloud Integration, EC Core, Integration Centre, XSLT, ServiceNow tool, JavaScript, Event Mesh

Certification:

SAP Certified Associate - Integration Developer
