

BELOMI TEMFACK TSAGUE

SENIOR DEVOPS ENGINEER

Conroe, TX 77302 | +1 (646) 886 0321 | tbelowwork@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

DevOps & SRE professional with 8+ years building and operating production-grade AWS and Kubernetes platforms. I design secure, observable, cost-efficient infrastructure; automate delivery with Terraform, Helm, and CI/CD; and tighten feedback loops so teams ship faster with fewer incidents. Strong record reducing deploy times, hardening cloud environments, and meeting reliability targets in networking, consumer tech, and healthcare.

SKILLS

Cloud: AWS (EC2, S3, RDS/Aurora, VPC, Lambda, CloudWatch), Azure (VMs, AKS, Azure Functions, Blob Storage, Key Vault), GCP (Compute Engine, GKE, Cloud Storage, Cloud Functions, Secret Manager)

Containers & Orchestration: Docker, Kubernetes, EKS, Helm, Argo CD, Karpenter, Cluster Autoscaler

IaC & Automation: Terraform (modules, workspaces), Terragrunt, Ansible, Packer, Make, Bash, Python

CI/CD: Jenkins, GitLab CI, GitHub Actions, Artifactory, SonarQube, Trivy/Grype, Snyk, OWASP ZAP

Observability: Prometheus, Grafana, Loki, ELK/EFK, CloudWatch, OpenTelemetry, PagerDuty

Security & Compliance: IAM, SCPs, GuardDuty, Security Hub, Config, Secrets Manager, HashiCorp Vault, CIS Benchmarks, SOC 2, HIPAA

Networking: VPC design, TGW, NAT, Site-to-Site VPN, PrivateLink, mTLS, service mesh (Istio)

Ways of Working: SRE (SLO/SLI/Error Budget), GitOps, Blue/Green & Canary, Trunk-based Dev, Agile/Scrum

Soft Skills: Problem-Solving, Analytical Thinking, Collaboration & Teamwork, Communication, Leadership & Mentoring, Adaptability, Stakeholder Management, Decision-Making, Continuous Learning

PROFESSIONAL EXPERIENCE

ANALOG DEVICES SENIOR DEVOPS ENGINEER | NOV 2024 – PRESENT

- Spearheaded design and optimization of scalable cloud infrastructure on AWS, leveraging Kubernetes (EKS) for container orchestration to ensure high availability and seamless deployment of applications.
- Automated CI/CD pipelines using GitHub Actions, Jenkins, ArgoCD, and Kubernetes, reducing deployment time by 45% and improving overall release reliability.
- Implemented infrastructure-as-code with Terraform and Helm charts, ensuring consistent provisioning across multi-environment deployments.
- Enhanced observability by integrating Prometheus, Grafana, and ELK Stack, lowering MTTR for production incidents by 30%.
- Collaborated with cross-functional teams to enforce DevOps best practices, increasing productivity and reducing deployment failures.
- Strengthened cloud security by managing IAM policies, encryption, and vulnerability scans, ensuring compliance with governance standards.

GOLDMAN SACHS SRE / DEVOPS ENGINEER | JUN 2022 – OCT 2024

- Ensured 99.9% uptime of mission-critical trading and risk management platforms by proactively monitoring distributed systems and addressing incidents.
- Automated infrastructure provisioning using Terraform and Ansible, reducing manual setup efforts by 40% and improving deployment consistency.
- Designed and maintained CI/CD pipelines with Jenkins, GitLab, and Maven, accelerating application release cycles and cutting deployment time by 35%.
- Implemented containerized workloads with Docker and Kubernetes, enabling efficient scaling of microservices across AWS cloud.
- Improved system observability through Prometheus, Grafana, and Splunk dashboards, lowering MTTR for highseverity incidents by 20%.
- Conducted root cause analysis and incident postmortems, implementing long-term fixes to prevent recurrence of critical outages.
- Enhanced cloud security by managing IAM policies, encryption standards, and access controls across AWS.
- Replaced legacy systems with custom Ruby on Rails apps, boosting performance by 30%. □ Automated AWS Lambda cleanup using Python, saving over 10 hours/week.

SEAGATE TECHNOLOGY CLOUD ENGINEER / DEVOPS SPECIALIST | APR 2020 – MAY 2022

- Designed and deployed cloud infrastructure on AWS (EC2, S3, RDS, VPC) to support enterprise applications, improving scalability and reliability.
- Automated environment provisioning with Terraform and Ansible, reducing manual configuration by 35% and ensuring consistent deployments.
- Managed and optimized CI/CD pipelines using Jenkins, Git, and Maven, accelerating release cycles and reducing deployment time by 40%.
- Implemented containerization with Docker and orchestration with Kubernetes, enabling scaling of microservices applications.
- Enhanced monitoring and alerting using Prometheus, Grafana, and CloudWatch, reducing MTTR by 20%.
- Collaborated with development teams to integrate DevOps practices, improving productivity and minimizing downtime.
- Strengthened cloud security posture by configuring IAM roles, encryption policies, and automated patching, ensuring compliance.
- Documented architecture diagrams, deployment workflows, and postmortems to improve knowledge transfer and efficiency.

DEVOPS ENGINEER | FEB 2018 – MAR 2020

- Designed and maintained CI/CD pipelines using Jenkins, Git, and Maven, streamlining deployments and reducing release cycle by 40%.
- Automated infrastructure provisioning with Terraform and Ansible, enabling consistent environment setup across dev, staging, and production.
- Deployed and managed applications in AWS Cloud leveraging EC2, S3, and RDS, ensuring high availability and scalability.
- Implemented centralized logging and monitoring with ELK Stack and Prometheus, cutting incident resolution time by 25%.
- Supported Docker and Kubernetes-based workloads, optimizing resource utilization and improving scalability.
- Conducted root cause analysis of outages and implemented preventive measures, improving reliability.
- Enhanced system security by applying patches, managing IAM roles, and ensuring compliance with policies.

JUNIPER NETWORKS SITE RELIABILITY ENGINEER | JAN 2017 – JAN 2018

- Ensured 99.95% uptime of mission-critical applications by monitoring distributed systems and performing proactive response.
- Designed, deployed, and managed highly available Kubernetes clusters for microservices on AWS, improving scalability across production.
- Automated deployment, scaling, and rollback using Helm charts and Kubernetes manifests, reducing release times by 30%.
- Implemented horizontal and vertical pod autoscaling in Kubernetes, optimizing resource utilization under variable loads.
- Leveraged Kubernetes networking (Services, Ingress, Network Policies) to ensure secure inter-service communication.
- Collaborated with development teams to integrate CI/CD pipelines with Jenkins, Git, and Kubernetes, enabling automated delivery.
- Monitored cluster health and performance using Prometheus, Grafana, and custom metrics, reducing MTTR by 20%.
- Containerized legacy applications with Docker and deployed to Kubernetes, enabling consistent environments across stages.

EDUCATION

B.S., Mathematics & Computer Science — University of Dschang, Dschang, Cameroon

A.S., Computer Science — Bronx Community College, New York, NY

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- AWS Certified DevOps Engineer – Professional
- Certified Kubernetes Administrator (CKA)
- Professional Scrum Master I (PSM I)
- Google Cloud Associate Cloud Engineer
- Terraform Associate
