EXPERIENCE

Sr Software Engineer

February 2023 - June 2024

JLAN DSD LLC | Washington State, WS

- Provided mentorship to junior developers, enhancing their coding skills and problem-solving abilities. Diagnosed and resolved critical production issues through debugging and log analysis. Maintained and improved existing software with bug fixes and enhancements. Trained and assisted customer service teams in tracking and resolving user-reported issues.

CTO/Sr Software Engineer

November 2018 - February 2023

jLAN Technologies Inc | Miramar, Florida

- Experienced in managing documents and workflows to enhance productivity, executing functional and integration testing, and supporting software delivery. Skilled in designing and developing embedded systems, optimizing application performance, and conducting code reviews to maintain high-quality standards. Expertise in database design, UI/UX development, and modernizing legacy systems while ensuring seamless functionality. Continuously explores new technologies and refines best practices to deliver efficient software solutions tailored to client needs.

Sr Software Engineer

August 2012 - October 2016

JLAN Technology Inc | Hollywood, Florida

- Experienced in software development, optimization, and system modernization, implementing enhancements and bug fixes while ensuring high performance through profiling, refactoring, and caching strategies. Skilled in legacy system migration, software integration, and best practice development, collaborating with cross-functional teams to deliver efficient solutions. Conducted code reviews, functional testing, and debugging to maintain software quality and compliance with customer needs. Evaluated new technologies, libraries, and open-source tools for project integration. Specialized in UI/UX design, system feasibility analysis, and adapting software to evolving hardware and industry trends to enhance user experience and operational efficiency.

It Technician and Developer

May 2007 - July 2012

Sun Digital Inc | Ocala, Florida

- Experienced in IT support, network management, and system security, ensuring stability through regular maintenance, software updates, and security patch installations. Skilled in technical support for end-users, mobile device management, and remote assistance, resolving issues via phone, email, or on-site visits. Managed network installations, performance monitoring, and large-scale IT projects, including server migrations and infrastructure upgrades. Maintained detailed documentation for system configurations and support procedures while evaluating new technologies for potential implementation. Participated in after-hours on-call rotations to address urgent technical issues, ensuring continuous system reliability and security.
