

Bhanu Prasad

Java Full Stack Engineer

Bay Area, CA(Open for relocation) | +1 (321) - 381-7662 | Bhanuprasadpothagani066@gmail.com | [Linkedin](#)

SUMMARY

Java Full Stack Developer with 5+ years of experience designing, developing, and deploying scalable web applications and microservices across enterprise environments at companies like Intel and Meta. Proficient in Java, Spring Boot, Hibernate, RESTful APIs, and Microservices Architecture, with strong frontend expertise in React.js, TypeScript, JavaScript (ES6+), and responsive UI frameworks. Skilled in building high-performance, event-driven systems using Apache Kafka, Redis, WebSockets, and gRPC, and deploying applications on AWS, GCP, Docker, and Kubernetes. Experienced in CI/CD automation using Jenkins, GitHub Actions, and GitLab CI, containerization with Docker & Kubernetes, and infrastructure-as-code using Terraform and Helm. Strong background in system design, API security (OAuth2, JWT, RBAC), database management (PostgreSQL, MySQL, MongoDB), and performance optimization. Adept at writing clean, modular, production-ready code with a focus on scalability, maintainability, security, and cloud-native best practices.

PROFESSIONAL EXPERIENCE

Java Full Stack Engineer (Ads & Growth Engineering)

Sep 2024 - Present

Meta | Bay Area, CA

- **Designed and developed high-performance microservices** using **Java, Spring Boot, and gRPC**, powering ad delivery and campaign analytics for 10M+ daily active advertisers on Meta Ads Manager.
- **Built scalable data ingestion pipelines** using **Kafka + Apache Flink** to process real-time ad impression, CTR, and conversion events (>2B/day), enabling accurate advertiser insights with <200ms latency.
- **Developed full-stack features** for Ads Manager using **React.js, TypeScript, GraphQL (Relay)** and **Meta's internal React frameworks**, improving advertiser workflow efficiency and reducing drop-offs by **18%**.
- **Optimized backend API response time by 35%** using **Vert.x-based reactive programming, Redis caching, and asynchronous I/O**, improving system performance during peak campaign traffic.
- **Implemented role-based access control (RBAC)** and secure API integrations with **OAuth2 + Meta Identity Platform**, ensuring compliant data permissions for advertisers and internal teams.
- **Designed and deployed CI/CD pipelines** via **Jenkins + GitHub Actions + Buck/Bazel**, automating build, test (JUnit, Mockito, Cypress), and blue-green deployments across Kubernetes environments.
- **Integrated machine learning ad-ranking APIs** (Python services) into Java microservices, using **REST + gRPC bridges**, enabling better personalization and increasing ad click-through rate (CTR) by **12%**.
- **Developed real-time monitoring and alerting** using **Prometheus, Grafana, and OpenTelemetry**, tracking API latency, JVM memory, garbage collection, and Kafka consumer lag across production clusters.
- **Collaborated with product managers, data scientists, and infra teams** to align system design with revenue growth KPIs, advertiser spend optimization, and Meta's privacy & responsible AI guidelines.

Machine Learning Engineer

Apr 2020 – Jun 2023

Intel | India

- **Developed microservices using Java (Spring Boot, Hibernate, REST/gRPC)** for Intel's internal supply chain and manufacturing analytics platform, handling data from 500K+ semiconductor components daily.
- **Built responsive web applications** using **React.js + TypeScript (or Angular depending on team)** with reusable component architecture, improving UI load time by **30%** and enhancing user efficiency for operations teams.
- **Designed distributed systems and event-driven workflows** using **Apache Kafka + Redis Streams**, enabling real-time processing of equipment telemetry and inventory status across multiple fabrication plants.
- **Optimized PostgreSQL and Oracle database queries** using **JPA, indexing, caching, and connection pooling**, reducing query latency from 2.3s to under 700ms for high-volume data dashboards.
- **Developed internal dashboards and workflow automation tools** integrating **Java, React, Grafana, and REST APIs**, enabling real-time monitoring of production defects, test yields, and equipment downtime.
- **Implemented authentication and role-based access control (RBAC)** using **OAuth2, JWT, and Azure AD**, ensuring secure access to sensitive supply chain and manufacturing data.
- **Containerized and deployed services on Kubernetes (OpenShift)** using **Docker and Helm charts**, enabling blue/green deployments and reducing deployment-related downtime by **85%**.
- **Set up CI/CD pipelines in Jenkins and GitLab CI**, automating build, unit testing (JUnit, Mockito), SonarQube code quality checks, and deployment to staging/production environments.

TECHNICAL SKILLS

Programming & Scripting: Java, Python, JavaScript (ES6+), TypeScript, C/C++, Bash, SQL, HTML5, CSS3, MATLAB (if needed), JSON, YAMLFrontend

Development: React.js, Next.js, Angular, Redux, TypeScript, Tailwind CSS, Material UI, Bootstrap, Responsive Web Design, Progressive Web Apps (PWA)

Backend Development & APIs: Java (Spring Boot), Python (FastAPI, Flask, Django), Node.js (Express.js, NestJS), RESTful APIs, GraphQL, gRPC, WebSockets, Microservices, MVC Architecture

Databases & Storage: PostgreSQL, MySQL, MongoDB, Redis, Oracle DB, DynamoDB, Firebase Firestore, Elasticsearch, Database Normalization, Query Optimization, Indexing

Cloud Platforms & Services: AWS (EC2, S3, RDS, Lambda), Google Cloud Platform (GCP), Azure, Docker, Kubernetes, AWS Elastic Beanstalk, Cloud Run, Cloud Functions, API Gateway

DevOps & CI/CD Pipelines: Docker, Kubernetes (EKS/GKE/AKS), Jenkins, GitHub Actions, GitLab CI/CD, ArgoCD, Terraform, Helm, Ansible, Nginx, SonarQube, Logging & Monitoring (Prometheus, Grafana, ELK Stack)

Software Architecture & System Design: Monolithic & Microservices Architecture, Event-Driven Systems, MVC & MVVM Patterns, REST & GraphQL API Design, Load Balancing, Scalability & High Availability, Caching (Redis, Memcached), Message Queues (Kafka, RabbitMQ)

Version Control & Agile Practices: Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Agile/Scrum, Code Reviews, Branching Strategy (GitFlow), Unit & Integration Testing (JUnit, Mockito, pytest, Selenium, Cypress)

Security & Compliance: OAuth2.0, JWT, SSO, SSL/TLS, Role-Based Access Control (RBAC), OWASP Security Standards, API Rate Limiting, Data Encryption, Audit Logging

Testing & Automation: JUnit, Mockito, Cypress, Selenium, Postman/Newman, pytest, Load Testing (JMeter, Locust), Test-Driven Development (TDD), Behavior-Driven Development (BDD)

Deployment & Infrastructure: Docker Compose, Kubernetes Deployments, AWS EC2/ECS/EKS, Nginx, Reverse Proxy, Load Balancing, Blue-Green & Canary Deployments

UI/UX & Tools: Figma, Adobe XD, Responsive Layouts, Web Accessibility (WCAG), Component Libraries, Reusable Design Systems

Collaboration & Communication: Agile/Scrum, Sprint Planning, Technical Documentation, Cross-Functional Team Alignment, Mentoring & Code Review

EDUCATION

Master of Science in Computer Science

Florida Institute Of Technology
