SUMMARY

Data Engineer with 5+ years of experience in designing and optimizing scalable data solutions across Azure and AWS. Skilled in developing data pipelines, automating workflows, and leveraging big data technologies (PySpark, Apache Airflow, Databricks) to deliver actionable insights. Expertise in Python, SQL, and machine learning integration, with a focus on data integrity, security, and HIPAA compliance. Adept at using Power BI and MS Excel for data visualization, driving data-driven decisions, and improving operational efficiency. Proven track record of enhancing collaboration across teams and fostering data literacy to support business growth in fast-paced environments.

TECHNICAL SKILLS

Programming & Automation: Python, SQL, PySpark, Automation of Data Workflows, Performance Monitoring
Data Engineering & Architecture: Data pipeline development, ETL processes, Data Architecture, Data Manipulation, Data Analysis
Cloud & Big Data Technologies: Azure (Data Factory, Data Lake, Databricks, Machine Learning, Synapse Analytics), AWS (Lambda, S3, Redshift, Glue), Apache Airflow
Machine Learning & Statistical Analysis: Predictive modeling, Statistical Analysis, Machine Learning Integration
Data Visualization: Power BI, MS Excel
Data Quality & Security: Data Quality Assessment, Data Integrity, HIPAA compliance
Methodologies & Collaboration: Agile, Scrum, MS Teams, Cisco Webex
Other Skills: Data Warehousing, Real-Time Data Processing, System Integration, Data Cataloging, CI/CD Pipelines, Data Governance, Data Lifecycle Management

PROFESSIONAL EXPERIENCE

Data Engineer Oct 2023 – Present
Worthington Industries, Columbus, OH

- Collaborating closely with teams to identify and resolve data inefficiencies in Azure SQL and Synapse Analytics, streamlining data pipelines and improving the accuracy of insights, which has led to a 25% reduction in data report processing time.
- Automating manual data processes by transitioning forecasting models to Azure Data Factory and Python, increasing the speed of inventory predictions by 30% and enhancing the reliability of resource planning.
- Developing Azure Data Lake solutions that transform raw data into actionable insights, contributing to better warehouse space utilization and a 20% improvement in operational efficiency.
- Consistently leveraging Azure Databricks, PySpark, and SQL to clean and validate large datasets, ensuring data accuracy for reporting and analytics, which has resulted in a 40% improvement in overall data quality.
- Working closely with supply chain, operations, and finance teams to implement seamless data solutions in Azure, enabling faster decision-making and improving cross-departmental collaboration, which has led to a 15% increase in project success rates.

Data Engineer Aug 2020 – Jul 2022
Amazon Development Center, Hyderabad, India

- Engineered and maintained robust data processing systems using SQL, Python, and Apache Airflow, significantly improving ETL processes and enhancing reporting capabilities, which led to a 30% increase in report accuracy.
- Leveraged AWS Lambda to implement serverless functions, ensuring real-time data availability and effectively reducing both infrastructure costs by 15% and operational complexity.
- Designed scalable data architectures that aligned with business objectives, creating intuitive and easily accessible dashboards and metrics, resulting in a 25% faster decision-making process.
- Utilized Amazon S3 for secure, scalable data storage, implementing lifecycle policies to optimize data management and reduce operational costs by 20%.
- Collaborated closely with cross-functional teams to automate data workflows and seamlessly integrate diverse data sources, shortening project timelines by 30% and increasing data accessibility by 40% through AWS Glue.

- Delivered high-quality datasets for machine learning initiatives, contributing to the enhancement of applications like Alexa's speech recognition, leading to a 15% performance improvement, and optimized Amazon Redshift query processing time by 20%.

Data Engineer

Feb 2019 – Jul 2020

Infosys Ltd., India

- Developed and managed real-time Azure Data Factory pipelines to ensure reliable access to patient records and lab data for the healthcare provider client, resulting in a 25% increase in data retrieval speed.
- Ensured the security and compliance of sensitive healthcare data by leveraging Azure Data Lake and Blob Storage, maintaining full HIPAA compliance with no reported security breaches.
- Integrated Electronic Health Records (EHRs) and medical devices with Azure services like Event Hub, enabling real-time data flow and contributing to a 15% improvement in patient monitoring efficiency.
- Applied PySpark to process and analyze large datasets, increasing data transformation speeds by 40% and significantly enhancing reporting capabilities for healthcare analytics.
- Optimized data models in Azure SQL Database and Synapse Analytics, facilitating real-time reporting and faster, data-driven decisions, which led to a 30% increase in actionable insights.

Data Engineering Intern

Aug 2018 – Jan 2019

Infosys Ltd., India

- Contributed to the design and implementation of Azure Data Factory pipelines for processing live healthcare data, improving data access speed by 20%. Helped integrate on-premise hospital systems with Azure SQL and Synapse Analytics, boosting operational efficiency by 15%.
- Supported real-time data validation using Azure Data Lake and Databricks, ensuring HIPAA compliance with zero issues. Collaborated with healthcare professionals and data scientists to develop cloud-based solutions that improved patient monitoring and increased clinical trial efficiency by 10%.
- Assisted in monitoring and optimizing Azure resources, resulting in a 40% reduction in data processing times. Troubleshoot data workflows, reducing error rates by 30%, and played an active role in supporting ongoing healthcare operations.

EDUCATION

Master of Information Systems

Aug 2022 – May 2024

Cleveland State University, Cleveland, OH

Bachelor of Biotechnology

Sep 2015 – Jul 2019

National Institute of Technology, AP, India
