

Bhaskar Ramachandran: Ph: 650-245-7256
Email: bhaskaramachandran@gmail.com

Summary:

- About 18+ years experience in various capacities (.Net expert/Architect, Release Engineering using Installshield, and SQL Server DBA) leading to complete projects involving latest technologies.
- Excellent experience working on .Net, C#, Visual Basic, Flash, ASP.NET, Javascript, Ajax, VC++, COM/DCOM, ASP and SQL Server, Salesforce Marketing and Oracle Database Management, and Crystal reports.
- Extensive experience in AWS for CI/CD, S3 data storage and redshift warehouse.
- Microsoft Certified Professional (MCSD).
- Extensive experience in SAAS companies.
- Ability to build, coach my team and motivate them to adhere to quality standards and delivery schedules.
- Have consistently produced results in high-pressure environments. Highly flexible and adapts to change in technology and project deadlines with ease and synergizes team to do the same.
- Excellent communications skills to build a quick rapport with both internal and external customers.

Technical Skills:

- **Operating systems:** WinNT 3.51/4.0, Win XP, Windows Server 2008/2003/2000/98/95, UNIX
- **Languages:** C#2.0/3.5, Visual Basic 4.0/5.0/6.0, VB .Net, VC++ 6.0, C++, C#, Java, FORTRAN, COBOL
- **Web Applications:** MVC4, MVC3, Web API, ASP 2.0/3.0, Adobe Flex(Flash), ASP.Net 1.0/2.0, HTML, CSS, JAVASCRIPT, AJAX, Angularv version 1.4, Node.js, React.Js version 16.9.0
- **.Net Framework:** 2.0,3.0/3.5,4.0/4.7.2/.Net Core 1.1
- **RDBMS and Related Technologies:** Oracle 8.1, SQL SERVER 6.0/6.5/7.0, SQL Server 2005, ETL, SQL Server Reporting Services, Crystal Reports and MS Access 2.0, RDO and ADO
- **Reporting Tools:** Looker (a Tableau like tool for reporting)
- **Middleware Technologies:** Web API, MVC4, MVC3, ASP.Net, Silverlight 3.0/4.0, WPF, WCF, LINQ, NHibernate, Web Services, COM/ATLCOM/DCOM/COM+, MSMQ/NTS, ASP, HTML, VBSCRIPT, JAVASCRIPT, JQuery, IIS, ActiveX
- **Web Tools:** Visual Interdev, FrontPage
- **Enterprise tools:** Sharepoint 2013
- **Design Methodology:** Microsoft Solutions Framework , Microsoft GUI Guidelines, MVC, SOA, SAAS, Enterprise Templates
- **Design Tools:** Microsoft Visio, Visual Modeler
- **Version Control and Issue Tracking Tools:** Visual SourceSafe, Rational Rose, Perforce, Visual Intercept, SVN Tortoise, Bugzilla, JIRA
- **General Tools:** Visual Interdev, Excel, Power Point

Skill	Years used	Last used
Visual Basic	16	Current
C# 2.0/3.5	16	Current
ASP.Net 2.0/ASP 2.0/3.0	16	Current
Visual .Net	16	Current
VB.NET	16	Current
Adobe Flex(Flash)	2	Current
WPF,WCF	5	Current
SQL Server 2000/2005	8	Current
SQL Server Reporting Services	2	Current

Visual C++	6	2010
MS Access	6	2004
Crystal Reports	4	Current
Database Design	9	Current
Oracle PL/SQL	5	2002

Education:

Madras Institute of Technology, India: Bachelors in Technology (Instrumentation)

Madras University, India: B.S (Mathematics)

WorldPantry Inc

Location: San Francisco, CA

Role/Designation: Architect/Team Lead

June 2015 to Present

Lead a team of 8 developers and 2 QA to integrate WorldPantry with external food products vendors enabling customers to purchase food items online

- Designed and developed the database schema for multi-tenant operations
- Designed and developed a complete suite of dlls to handle business logic using .Net Core 2.1
- Designed REST services for data transfer for internal and external sites using .Net Core 2.1
- Designed scalable integrations using Salesforce Marketing and Commerce Cloud APIs for creating Journeys and data extensions.
- Integrated the WorldPantry system with external CRM system CircleCommerce with the use of MSMQ and RabbitMQ for data transfer.
- Designed and developed an WPF based application called CircleCommerceIntegrator to integrate with Circle Commerce. This application enabled a complex work flow from the time an order is imported to the time when it is shipped and fulfilled.
- Designed and developed the UI with MVC framework with .Net Core 2.1.
- Was responsible to integrate the Worldpantry ecommerce platform with Facebook, Paypal and Salesforce.
- Converted or updated the existing C# libraries to J2EE dlls to promote open source code development along with Node.js and Angular.js development.
- Developed a complete REST Api framework based on Node.js. This API was used to connect the existing E commerce portals to Paypal, Facebook and Salesforce and also provide data for enterprise level reports.
- Developed REST based Web APIs on .Net core to build a data conduit for disparate systems within Worldpantry. The data access layer to the Sql Server DB was based on Entity Framework and relied on LINQTO SQL to translate the data to WorldPantry business entities. This project also used Unity Framework for dependency injection.
- Developed a enterprise level suite of reports with Angular.js version 1.4 framework which got data from the REST API developed with Node.js
- Created a suite of reports based on React.js and moved over reports developed with angular to React.js version 16.9.0., Both the new reports and the ported reports got data from REST APIs developed with node.js
- Created enterprise reports with Redshift warehouse as repository and Looker (a tableau like reporting tool) on the cloud.
- Developed a test suite with Winforms and integrated with legacy system using WCF.

Yellow Pages Inc

Location: San Francisco, CA

Role/Designation: Architect/Team Lead

September 2014 to June 2015

Managed/Lead a team of 10 developers and 3 QA personnel to design and execute projects for increasing Advertising revenue and Yellow pages digital products revenue.

- Designed and developed multiple projects involving technologies like MVC Web APIs, Queuing technologies like RabbitMQ and MSMQ and Service Stack and Node.js to provide to various front end web sites that are part of the Yellow Pages online suite.
- Designed Web sites with frameworks like JQuery and Angular.js to provide customers ability to track the traffic volume and call generation when working with YP Search. Used Telerik controls in some sites to enhance appearance and code clarity
- Involved in performance improvement of various systems with the help of tools like Red Gate Antz and New Relic

Quinstreet Inc

Location: Foster City, CA

Role/Designation: Architect /Team Lead

February 2013 to August 2014

Managed/Led a team of 8 developers to design and execute MVC based projects

- Designed a MVC4 based Web API project to enable external publishers to access Quinstreet Inc System data and to post leads in Insurance vertical. Extensive use of queuing technologies like RabbitMQ and MSMQ for data transfer between in house applications
- Updated existed Asp.Net projects for Insurance.com to MVC4 based application to capitalize on improved testing provided by the MVC4 framework.
- Improved the conversion margin with respect to Insurance Policies sold by improving the performance of the system through various optimization techniques with respect to database and to the code. Used performance and memory profilers to track processes/methods that consumed more memory and CPU cycles and simultaneously implement solutions to remove the bottlenecks.
- Implemented modifications to existing projects to lend itself to better Search Engine Optimizations
- Designed databases and stored procedures for various projects.

Visa Inc

Location: Foster City, CA

Role/Designation: Lead Software Engineer

May 2012to January 2013

Led a team of 5 to design and execute Web based and Windows based projects

- Designed a MVC3 based project to enable external users to access the Visa Mobile Gateway services
- Worked on NFC based projects to provide mobile handsets (Cell phones) to make payment with Visa mobile application cards.
- Designed databases and stored procedures for various projects.
- Developed solutions for integration of various departments within Visa using WCF based web services
- Developed simulators to be used by developers and external customers to simulate Visa Internet Processing(VIP)
- Designed and developed IBM WebSphere MQ and MSMQ based project within a WCF framework to transport data to and fro from Mobile handsets to the VMG(Visa Mobile Gateway)

Prosper Market Place Inc

Location: San Francisco, CA

Role/Designation: Lead Software Engineer

February 2012to May 2012

- Designed WCF service projects to enable Prosper to authenticate users and get credit details
- Designed databases for enabling storage of data related to the new listing services on Oracle.
- Worked on legacy projects having .Net remoting and migrated them to WCF services.
- Worked in an agile environment to develop third party APIs for external users to access Prosper data and bid for listings

Genentech**Location: South San Francisco, CA****Role/Designation: Architect/Team Lead****September 2010 to February 2012**

Led a team of 5 members to successfully complete projects to enable Genentech to generate submissions to be sent to the FDA for approval and subsequent licensing

- Designed and developed a Web application based on Silverlight 4.0(GCTDWeb) for enabling GCTD submissions to be sent to the FDA. This application was an intranet application. Designed and developed the database schema for the commercial software platform at Crescendo. The idea was to develop in SOA and with SAAS (Software as a service) model. Used RabbitMQ and MSMQ for data transfer in Windows NT services
- Designed the database schema with Oracle 9i as the RDBMS.
- Used ETL within Oracle 10g to translate data from legacy databases to the new schema. Also used ETL in SSIS to incorporate data from Oracle databases to MS SQL databases to facilitate data warehousing.
- Used NHibernate along with Linq (Linq to Nhibernate) to develop the ORM and access the data.
- Developed reports with SSRS for corporate personnel.
- Developed multithreaded services to enable submissions to be processed simultaneously around the world.
- Designed and developed an Asp.Net MVC3 web app for a system called GPRS. This project involved the extensive use of JQuerys to provide AJAX functionality. This used SQL server 2010 as the database. This web app helped users to create reports for clinical and non-clinical studies.

Crescendo Bio Science**Location: South San Francisco, CA****Role/Designation: Technical Manager/Team Lead****May 2010 to September 2010**

- Designed the commercial software portal for lab information systems based on Silverlight 4 business application model. Used Telerik controls for Silverlight to design the web pages.
- Designed and developed the database schema for the commercial software platform at Crescendo. Used LINQ technologies (LINQTOSQL and LINQTOENTITIES) to access data.
- Designed and developed reports for the portal with SSRS.
- Designed and developed an Asp.Net MVC web app which was called Physician Portal to enable physicians to track patient progress and patient health care related activities like tests and prescriptions. This used SQL server 2008 as the database

Right90 Inc**Location: Foster City, CA****Role/Designation: Architect/Sr Software Engineer****August 2008 to May 2010**

Right90 Inc is a company that follows a SAAS (Software as a service model) to deliver Sales Forecasting solutions to customers. It provides sales forecasting tools through a web site which can be accessed via the browser and also through a rich set of APIs.

- Responsible for designing and developing the Right90 website with a combination of ASP.net 2.0 and Flash. Flash was used to create swf files hosted in the aspx pages to construct RIAs (Rich Internet Applications). Design included use of JavaScript, JQuery, CSS, AJAX and other Web 2.0 techniques.
- Design and develop a rich set of API using ASP.Net web services to provide data access, administration and data manipulation of the client data hosted in the Right90 database.
- Enhanced existing web services projects to use WCF, .net framework 3.5 to provide flexibility to switch between using HTTP and TCP protocols.
- Designed database schemas for single and multiple tenants/clients. I was responsible for writing many of the stored procedures and fine tuning them to increase performance. Database management tasks included creating Jobs, Maintenance Plans and index tuning.
- Updated database accessing projects to use LINQ2SQL, LINQ to streamline access to disparate data sources.
- Develop middleware using C# 2.0/C# 3.5, .Net framework 2.0/3.5 to build a complete multi tier environment.
- Responsible for developing the integration framework for linking Salesforce and Oracle systems with Right90.

- Training the team to use Bugzilla for change request management and SVN tortoise for source control.

Philips Medical Systems

February 2008 to August 2008

Location: Foster City, CA

Role/Designation: Architect/Senior Software Engineer

Philips Medical Systems is a leading provider of state of the art medical equipment for hospitals and the software for EDP of images and medical records all over the world. It has made major acquisitions in the past few years to upgrade the systems that are installed in the hospitals and reduce maintenance downtimes and high quality patient monitoring.

- Responsible for leading a team of ten engineers to upgrade iSite systems, involving latest installer technologies like Installshield, WIX.
- Providing technical support for juniors on Active Directory programming and Windows 2003 server replication technologies.
- Designed the security of the iSite system using group policy objects.
- Improved on the existing web projects using ASP.Net web 2.0 features like master pages and providers.
- Improved the SQL Server stored procedures using query monitoring techniques.
- Responsible for upgrading systems from ASP to Asp.Net.
- Providing technical leadership for projects for the entire SDLC's.

FujiColor Processing (US):

March 2003 to Jan 2008

Location: Grater Boston, MA

Role/Designation: Senior Software Engineer

Fujicolor Processing Inc ("Fujicolor Processing") is a wholly owned subsidiary of Fuji Photo Film U.S.A., Inc. The company provides traditional and digital photofinishing services for a large number of national, chain and independent retail store accounts throughout the United States. Operating facilities nationwide, Fujicolor Processing is responsible for the overnight processing of customer orders. A comprehensive distribution routing system is operated together with a sales and retail support group responsible for developing new accounts and aiding store level customers

Fujicolor Processing offers a complete range of conventional, digital and internet photo services and support, anchored by a nationwide network of quality overnight services.

- Responsible for managing the PAC (Production Automation Control) system to automate the FUJI COLOR photo labs.
- Responsible for handling the software requirement specifications and design specifications.
- Administered the SQL databases for the PFDF server to store its data.
- Completed two web based projects using ASP.net
- Created high quality reports using crystal reports in conjunction with Visual Basic .NET.
- Responsible for developing reports using SQL Server Reporting services.
- Supervised the development of the PFDF server and implemented the PFDF editor module using C# Winforms.
- Used Enterprise Library(**ENTLib**) for building validation blocks for developer reuse
- Responsible for ensuring projects followed .Net specifications using Microsoft FXCOP.
- Responsible for building assemblies using NAnt on test servers
- Responsible for guiding the team in unit testing using NUnit.
- Designed and developed the Batch Auditing Module for real time display of PFDF data in c# using winforms and event driven paradigm.
- Responsible for creating Setup CD's of finished products using Installshield 11.5
- Motivate team to adhere to the scheduled imposed on us by the individual labs cross the country

Environment: C#, ASP.NET, VB .Net, Javascript, MS SQL Server 2000/2005, ASP 3.0,IIS, ADO, ADO.Net, InstallShield 11.0, ATLCOM,VisualStudio.Net, Crystal Reports, SQL Server Reporting Services, Windows XP.

Gretag Imaging Inc:

March 2000 to March 2003

Location: Holyoke, Massachusetts

Role/Designation: Senior Software Engineer

Gretag Imaging Inc was a producer of Film processing machines and a software vendor for automating the process of film development in central labs in US and as well as Europe. It had labs all over the US and was the principal supplier of software to other film processing companies like Qualex Inc. Gretag Imaging also supplied film processing machines like mini labs to store chains like Brooks etc. The headquarters of Gretag Imaging was in Switzerland.

- Project leader for web based as well as non-web based projects. Responsibilities for the design of projects from scratch.
- Used Rational Rose to build the shell of each project to be built upon by team members
- Assigned tasks to team members and coached them to avoid bottlenecks, advocated the extensive use of object oriented programming thereby achieving a high-level modularity and scalability.
- Team lead with number of team players ranging from 4 to 6.
- Responsible for producing project specifications and ensuring that all documentation was synchronized with design changes.
- Responsible for tracking, monitoring project development, testing using advanced tools like Visual SourceSafe, Visual Intercept.
- Responsible for writing code in VC++ and Visual Basic to create DLLs and GUIs.
- Supervised the design of the database schema for backend for database accessing projects with Oracle 8.1 as the database engine
- Responsible for the Database administration and schema design.
- Used ATL COM to create many reusable components to achieve code reusability.
- Design of web pages for Intranet projects and creation of over the Intranet installs with an ingenious scheme by combining the power of the Installshield engine, Internet Information server and the Internet Explorer.
- Designed report based projects to act as real time management information systems.
- Created customized Active X controls that could be used by any programmer outside the team.
- Created multithreaded applications that were required to be NT services.

Environment: Visual basic, VC++ 6.0, MS SQL Server 2000, ASP ,IIS, ADO, ATLCOM, Crystal Reports, SQL Server Reporting Services, Windows NT.

Advanced Technology Labs:

March 1999 to March 2000

Location: Chennai, India

Role/Designation: Team Lead/Software Engineer

Advanced Technology Labs was the first company in India to introduce Com technology in software development. ATL's main thrust was to develop reusable Com components for various vendors.

- Project leader for teams comprising of 5 members assigned to complete component-based projects using newly introduced ATL COM technology.
- Created multi-tier applications using SQL server as database engine and Internet Information server as the web host.
- Designed the database schema as well as web pages.
- Responsible for producing project specifications and ensuring that all documentation were synchronized with design changes

Environment: Visual basic, VC++ 6.0, MS SQL Server, ASP ,IIS, ADO, ATLCOM,DCOM, Crystal Reports.

Steel Authority of India Ltd:

August 1995 to March 1999

Location: Bokaro, India

Role: Role/Designation: Team Lead/Software Developer

- Supervised projects that involved process control. I
- Trained team members to coordinate with process engineers to arrive at optimum solutions for their process Control requirements.
- Responsible for supervising project design and scheduling of deliverables.
- Responsible for producing project specifications and ensuring that all documentation were synchronized with Design changes
- Created testing procedures to produce zero defect process control applications.
- Designed the GUI using Visual Basic and classes using Visual C++.
- Designed database schemas for projects that required data storage ability.
- Designed crystal reports to provide real time information to the management.
- Responsible for monitoring the progress of the project and ensuring adherence to Object Oriented programming.

Environment: Visual basic, Crystal Reports, VC ++
