**Workflows & Orchestration:** Flow Designer, Workflow Editor, Approval Engine, Service Catalog, Record Producers

**Performance & Optimization:** Instance Performance Tuning, Query Optimization, Log Analysis, Database Indexing

**Reporting & Dashboards:** Performance Analytics, Data Visualization, Scheduled Reports, KPI Metrics

**Cloud & DevOps:** AWS, Azure, GCP, Docker, Kubernetes, CI/CD Pipelines, GitHub Actions, Jenkins

**Others:** Service Portal Development, Scoped Applications, Domain Separation, ACL & Security, Mobile App Development

**Operating Systems:** Windows, Mac, Linux

### WORK EXPERIENCE

---

#### Dell Technologies, USA | ServiceNow Developer

Aug 2023 - Present

- Led the implementation of ITSM, ITOM, and SecOps modules, achieving a 50% reduction in ticket resolution times and improving incident response efficiency.
- Engineered custom ServiceNow applications and enhancements using JavaScript, GlideScript, and Script Includes, increasing system automation by 45%.
- Integrated ServiceNow with AWS, Azure, and GCP for cloud infrastructure automation, optimizing resource management and cost efficiency.
- Developed and deployed Orchestration workflows for automated server provisioning and patch management, reducing manual intervention by 60%.
- Enhanced Service Catalog and Request Management processes, improving self-service adoption by 50% and reducing help desk dependency.
- Designed CI/CD pipelines using Jenkins and GitHub Actions, automating ServiceNow deployments and reducing release cycles by 40%.
- Configured and optimized ServiceNow MID Servers for secure data exchange between on-prem and cloud systems, improving integration performance.
- Implemented IT Asset Management (ITAM) and Software Asset Management (SAM), reducing license compliance issues by 30% and optimizing software costs.
- Spearheaded ServiceNow ACL and security hardening initiatives, ensuring 99.9% system uptime and compliance with enterprise security standards.

- Mentored junior ServiceNow developers, leading to a 25% improvement in code quality and overall platform stability.

## **Cue Tech Systems, India | ServiceNow Developer**

**Apr 2020 - Jan 2023**

- Developed and customized ServiceNow ITSM modules (Incident, Problem, Change, Service Catalog) using GlideScript, JavaScript, and REST APIs, improving workflow automation by 40%.
- Designed Service Portals using HTML, CSS, AngularJS, and jQuery, enhancing user experience and reducing issue resolution time by 35%.
- Implemented ServiceNow Discovery and CMDB for automated asset tracking, reducing manual asset management efforts by 50%.
- Integrated ServiceNow with third-party systems (SCCM, LDAP, SSO, OAuth) using REST and SOAP APIs, streamlining authentication and data synchronization by 30%.
- Optimized ServiceNow database queries and indexing techniques, reducing query execution time by 25% and improving platform performance.
- Automated workflows using Flow Designer and Workflow Editor, decreasing manual approvals by 60% and accelerating process completion.
- Developed and deployed custom-scoped applications in ServiceNow App Engine, enhancing business process automation across departments.
- Designed and managed Access Control Lists (ACLs) and Role-Based Access Control (RBAC) for security, ensuring 100% compliance with IT security policies.
- Built and maintained Performance Analytics Dashboards, enabling real-time data visualization and actionable insights for business stakeholders.
- Created technical documentation, user training materials, and SOPs, improving onboarding efficiency and reducing training time by 30%.
