

Bhavana (Application Developer)

(404) 666-6546 | bhavanachowdary.rc@gmail.com

LinkedIn: <https://www.linkedin.com/in/bhavana97/>

PROFESSIONAL SUMMARY

Detail-Oriented Application Developer having rich of experience in administration, configuration, customization, Development, QA testing, and support on .NET and Salesforce.com platform. Academically well-grounded with master's in computer science, I bring a blend of theoretical knowledge, hands-on expertise to address diverse technical challenges.

TECHNICAL SKILLS

- **Programming Languages:** C#, .NET Core 6+, JavaScript, Python, TypeScript, OOPS concepts
- **Frameworks:** .Net Framework 4.5/4.0, ASP.NET MVC, Web API, Entity Framework, Blazor, Razor Pages, SPFx, Node.js
- **Front-End Technologies:** Angular 18/14/12, ReactJs, HTML5, SASS, CSS3, Bootstrap, Tailwind CSS, jQuery, RxJs
- **DB Management:** SQL Server 2019/2022, MySQL, PostgreSQL, MongoDB, Snowflake, UML
- **Cloud/ ORM Tools:** Entity Framework, LINQ, Microsoft Azure, AWS, Salesforce
- **DevOps & CI/CD:** Azure DevOps, Jenkins, Docker, Kubernetes, GitHub Actions, PowerShell, Terraform, OpenShift
- **Version Control/security:** Git, TFS, SVN, Jira, Octane, OAuth, JWT, ASP.NET Identity, SAML2.0, Coding Standards
- **Testing & Debugging:** XUnit, NUnit, Moq, Postman, Swagger, Splunk, Cypress, Selenium, Crystal Reports, Power BI.
- **Real-Time Communication & others :** SignalR, RabbitMQ, Azure Service Bus, Kafka, Visual Studio 2022/2019

WORK EXPERIENCE

CIBC Bank USA | .NET Full Stack Developer

Illinois, USA Jul 2024 – Present

Responsibilities:

- Involved in various phases of SDLC of the application using C# and .Net by applying layered architecture, design patterns
- Created interfaces using ASP.NET MVC, Razor Syntax, Bootstrap, Angular, TypeScript, adhering to WCAG standards.
- Developed dashboards and integrated live chat app using Node.js, React, Socket.IO, for clients-server communication.
- Proficient in SSRS and SSIS for report configuration, user access management, data workflows with Import/Export Wizard.
- Integrated and secured payment gateways in compliance with PCI DSS standards for secure transaction processing.
- Integrated eSignature workflows via DocuSign APIs, encrypted document handling with Azure Blob, role-based access.
- Tested APIs with tools like Postman, FastAPI's built-in OpenAPI, and documented them with Swagger.
- Designed dashboards using Power BI, SSRS to visualize real-time loan pipeline metrics, approvals, and processing backlogs.
- Implemented ETL processes using SSIS to transform and sync loan data into SQL Server from multiple sources.
- Optimized data layer using SQL Server, MongoDB, and Redis for high-throughput mortgage processing.
- Leveraged Azure Functions, App Services, and Blob Storage to implement cloud-based solutions for the mortgage system.
- Automated deployments via CI/CD pipelines using Azure DevOps, with container orchestration on Docker and Kubernetes.
- Supported infrastructure deployments, modified Terraform files, triggered deployments along with CI/CD pipelines
- Monitored system logs and performance using Splunk, setting up alerts to pre-empt loan transaction failures.
- Developed Event Driven architecture using RabbitMQ and Kafka for real-time responsiveness of loan mortgage workflow.
- Developed and executed Unit tests with xUnit reducing regression issues , reported consolidated results of (UAT).
- Fixed bugs tracked issues in TFS and used GitHub Copilot for code documentation and updates.

Takeda Pharmaceuticals International | .NET Developer

Bannockburn, Illinois, USA | Jul 2023 – May 2024

Responsibilities:

- Worked on Agile (Kanban, Scrum) and delivering updates to Business team, Project Manager following SDLC
- Collaborated with the team to automate the validation and processing of EDI 834 transactions and secure file transfers with Sftp using scripts, meeting strict HIPAA compliance standards.
- Modernized legacy systems by refactoring VB.NET and ASPX applications into more maintainable C# implementations.
- Built interactive Angular applications to process EDI reports and audit trails efficiently.
- Developed a Blazor WebAssembly interface with SignalR integration for real-time appointment scheduling and updates.
- Developed and integrated RESTful APIs using ASP.NET Core, streamlining data communication between multiple systems.
- Automated data security tasks with PowerShell scripts, for safe storage and access using AWS (KMS) and Amazon S3.
- Customized Microsoft Dynamics 365 CRM forms and dashboards to enhance business workflows and user experience.
- Implemented WCMS platforms such as Sitecore to manage CMS-driven content and optimize digital content delivery.
- Designed UI screens using Power Apps, Automated data security and implemented SharePoint workflows.
- Integrated data from SQL Server / AWS RDS and DynamoDB for NoSQL requirements, to generate and format 834 files.
- Deployed Amazon CloudWatch for tracking system performance, API latencies to monitor hardware resource utilization.

- Leveraged AWS API Gateway, ensuring data communication between applications and third party agency.
- Involved in CI/CD with AWS CodePipeline and CodeBuild to automate deployment of PowerShell scripts

Capgemini-Sky BBH | Software Engineer

Bangalore, India | Jun 2021 – Jul 2022

Responsibilities:

- Documented client requirements in Jira under Agile methodologies.
- Integrated React elements like Google Maps API for displaying hotel locations and nearby attractions and integrated JavaScript, jQuery, AJAX for real-time updates in user-facing media applications.
- Developing web forms using C# .NET MVC, Web API and connected using ADO.NET and SQL Server to manipulate data
- Designed and implemented RESTful APIs using ASP.NET Web API to integrate internal systems like bookings, modifications, cancellations for smooth communication and data exchange between front-end and back-end services.
- Improved database performance using ORM tools like Entity Framework and optimized SQL queries and stored procedures for high-performance, implemented performance tuning for high-traffic content systems
- Improved web page performance by 20% through techniques like resource minification, image optimization, and asynchronous JavaScript loading, applied ASP.NET validation controls
- Integrated OData APIs with Power BI to enable data analysis and visualization, for advanced querying capabilities
- Implemented OAuth and JWT, securing user data and ensuring proper authentication and authorization for Sky Italia.
- Streamlined API documentation and testing with Swagger for testing and integration.
- Configured TeamCity to trigger automated builds and generate artifacts, which then deployed across Dev, QA, and Prod environments using Octopus Deploy, ensuring consistency and reducing deployment failures.

Capgemini-Sky Italia | Software Engineer

Bangalore, India | Feb 2021 – Jun 2021

- Increased sales force productivity by over 10 % with configuration management, cutting into production outages.
- Developed and conducted manual testing for mobile application across Android, iOS devices, validating functionality, performance, UI with software testing methodologies like TDD and BDD.
- Executed test cases, reviewed results, obtained business approval for UAT on salesforce.com platform.
- Gained hands-on experience with automation tools, Selenium WebDriver, writing simple scripts for regression testing.
- Leveraging AWS CloudWatch for monitoring resource utilization, identifying bottlenecks during load testing with JMeter.
- Hands-on experience with Xcode, iOS applications, debugging simple issues, and exploring Swift for basic functionalities.
- Exposure to Jenkins, Cucumber, version-control tools, and other office tools.
- Hands-on experience in preparing, reviewing, and implementing Artifacts like Requirement (Analysis & Review), Test Plan Document, Test Scenario, Test Case, Requirement Traceability Matrix (RTM), Test Metrics, Test Reports, Test data

Carrefour | Jr Software Developer

Hyderabad, India | Oct 2019 – Dec 2020

Responsibilities:

- Built .NET applications using ASP.NET Core, MVC, RESTful APIs, for CRM under Agile/Scrum methodologies
- Implemented state management using NgRx and RxJS Observables, managing application state, and developed custom forms and validation logic using Angular Reactive Forms and Template-Driven Forms.
- Implemented GraphQL queries to efficiently fetch customer data, order details, and inventory information.
- Integrated third-party libraries such as Material-UI, Recharts, Stripe, and React-Leaflet for viewing sales data, payment gateway and map integration by embedding within Angular wrapper components.
- Applied OWASP practices to mitigate SQL injection, XSS for integrating applications with CRM.
- Experience with PowerShell and Batch scripting for automation and system configuration tasks.
- Designed retail solutions for inventory, orders, and customer engagement in C#. and worked with DevOps team for automated deployments via Azure DevOps & Jenkins.
- Conducted lazy loading, performance tuning for Angular Modules with Visual Studio Profiler, Application Insights.
- Developed data processing solutions with SQL Server, SSRS, Entity Framework, and LINQ, optimizing retail analytics.
- Built serverless workflows with Azure Functions and monitored apps with Application Insights.
- Implemented NUnit and XUnit for backend validation, while leveraging Jest and Cypress for front-end testing.
- Debugging API failures and handling CORS issues, troubleshooting and resolving React UI issues.

EDUCATION & CAMPUS COMMUNITY INVOLVEMENT

- MS in Computer and Information Sciences (MSCS) UNT, TX **2022-2024**
 - Worked as **Student Assistant-Jr Web Developer (UNT)** **2023**
 - Member of ISF (**IETE student forum**)
 - Bhavana K, Voice Controlled Notice Board Display with Android Application, Feb 2020, 5, IJEAT **2020**
- [International Journal of Engineering & Advanced Technology \(IJEAT\)](#)
