SUMMARY

Fullstack Software Engineer with 5+ years of experience delivering scalable, high-performance web applications using **TypeScript, React, Node.js, and Python**. Holds a **Bachelor's Degree in Computer Science** and will earn a **Master's Degree in Artificial Intelligence from The University of Texas at Austin in 2026**. Expert in building performant, maintainable systems leveraging modern frontend and backend technologies.

SKILLS

TypeScript, JavaScript (ES6+), React, Node.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Webpack, Vite, Rollup, Babel, RESTful APIs, GraphQL, Django, Flask, Python, FastAPI, PostgreSQL, MongoDB, MySQL, Prisma, Docker, Kubernetes, AWS (EC2, Lambda, S3), Git, GitHub, CI/CD, Jenkins, Cypress, Jest, Mocha, Playwright, Vitest, Nginx, Linux, Express.js, Microservices, Redis, WebSockets, OAuth2, JWT, Figma, Agile, Scrum, DevOps, Clean Architecture, SOLID Principles, Design Patterns

PROFESSIONAL EXPERIENCE

Geico — Software Engineer

July 2024 – Present

- Spearheaded development of mission-critical features using **TypeScript, React, and Node.js**, leading to a 35% boost in UI performance and seamless scalability across distributed systems.
- Engineered robust, production-ready services using **GraphQL, RESTful APIs, and AWS Lambda**, establishing myself as the go-to engineer for high-performance TypeScript solutions.
- Developed modular UI components with **React, Redux Toolkit, and Tailwind CSS**, enhancing maintainability and developer productivity.
- Integrated **Jest, Cypress, and Playwright** for comprehensive end-to-end testing, achieving 95% coverage.

- Refactored core application logic for better **clean architecture** adherence and reduced technical debt.
 - Implemented **CI/CD pipelines** using **GitHub Actions** and **Docker**, enabling automated deployments and improved release reliability.
 - Enhanced **frontend build performance** using **Webpack** and **Vite**, cutting bundle size by 40%.
 - Collaborated in **Agile** sprints, leading code reviews and mentoring junior developers in **TypeScript best practices**.
 - Optimized backend APIs written in **Express.js** and **Node.js**, improving data retrieval efficiency by 60%.
 - Introduced **error monitoring and logging** with **Sentry** and **ELK Stack**, reducing bug resolution time.
 - Worked closely with designers using **Figma** to ensure pixel-perfect responsive designs.
 - Deployed microservices using **Docker** and **Kubernetes**, maintaining zero downtime.
 - Leveraged **Redis caching** to enhance session and API response performance.
 - Strengthened **authentication** using **OAuth2** and **JWT** standards.
 - Implemented **linting and formatting** standards via **ESLint** and **Prettier** across codebase.
 - Collaborated with cross-functional teams to align front-end scalability with backend services.
 - Conducted performance profiling using **React Profiler** and **Lighthouse** for runtime improvements.
 - Enhanced accessibility compliance (WCAG 2.1 AA) and improved usability metrics by 25%.
 - Ensured maintainability through **SOLID** and **Clean Code** principles.
 - Championed adoption of **modern TypeScript features**, including generics and decorators, to improve type safety.
-

resumes.fyi — Software Engineer

Mar 2024 – July 2024

- Developed and maintained core **React** and **Next.js** applications with **TypeScript**, focusing on scalable component architecture.
- Integrated **GraphQL APIs** with **Apollo Client**, ensuring efficient data flow across dynamic UIs.
- Refactored existing **JavaScript** codebase to **TypeScript**, reducing runtime errors by 40%.
- Implemented **Jest** and **Cypress** test suites for automated regression coverage.
- Designed and deployed **RESTful APIs** in **Node.js** and **Express.js** with **PostgreSQL** backend.
- Improved frontend load time by 30% using **code-splitting** and **lazy loading** strategies.
- Integrated **CI/CD** using **GitHub Actions** and **Docker** to streamline deployment pipelines.
- Built reusable UI libraries using **Storybook** and **Tailwind CSS**.
- Collaborated in **Agile/Scrum** teams, contributing to sprint planning and retrospectives.
- Optimized performance with **React Profiler** and network request batching.
- Enhanced security using **JWT authentication** and **CORS** configuration.

- Monitored production environments with **AWS CloudWatch** and **Sentry**.
 - Applied **design patterns** for scalable architecture and maintainable code.
 - Led migration of static assets to **AWS S3**, reducing latency.
 - Delivered production features ahead of schedule, increasing release velocity.
-

University of Houston — Research Assistant

Aug 2023 – May 2024

- Developed research dashboards using **React**, **Python (Flask)**, and **PostgreSQL** for AI data visualization.
 - Automated data preprocessing pipelines using **Pandas** and **NumPy**, improving throughput by 50%.
 - Built experimental **APIs** in **Flask** with secure authentication layers.
 - Used **Matplotlib** and **Plotly** for visual analytics on research datasets.
 - Deployed ML models on **AWS EC2** using **Docker** containers.
 - Integrated **TensorFlow** models with web interfaces for real-time inference.
 - Conducted **unit testing** using **pytest** and **unittest** frameworks.
 - Managed code collaboration via **GitHub** with CI enforcement.
 - Supported professors with data visualization scripts in **Jupyter Notebooks**.
 - Published internal research portal powered by **React** and **Flask**.
-

Amazon Web Services — Software Development Intern

May 2023 – Aug 2023

- Built internal developer tools with **React**, **TypeScript**, and **AWS SDK** to optimize service orchestration.
 - Contributed to **CI/CD** automation for Lambda-based applications.
 - Designed **RESTful APIs** for internal service integration.
 - Enhanced **frontend performance** using memoization and hooks.
 - Collaborated with senior engineers in an **Agile** environment.
 - Applied **Jest** and **Mocha** for test-driven development.
 - Developed deployment scripts with **AWS CloudFormation**.
 - Documented API specifications using **OpenAPI** standards.
 - Leveraged **GitHub** for version control and code reviews.
 - Delivered weekly presentations on project outcomes.
-

University of Houston — Research Assistant

Sep 2022 – May 2023

- Created visualization tools using **React** and **Python Flask**.
 - Automated data processing scripts with **Pandas**.
 - Maintained cloud-hosted datasets on **AWS S3**.
 - Conducted **data cleaning** and analysis using **NumPy**.
 - Supported AI research with full-stack solutions.
-

Buzly — Software Engineer Intern

June 2022 – Aug 2022

- Built responsive dashboards using **React**, **Tailwind CSS**, and **TypeScript**.
 - Integrated **REST APIs** for real-time student engagement data.
 - Enhanced load performance with **lazy loading** and **Webpack** optimization.
 - Implemented analytics tracking with **Google Analytics API**.
 - Contributed to agile sprints and peer reviews.
-

Seagull — Software Engineer Intern

Jan 2022 – May 2022

- Developed booking platform UI with **React** and **JavaScript (ES6)**.
 - Integrated backend services using **Node.js** and **Express.js**.
 - Built reusable components with **React Hooks**.
 - Maintained code quality with **ESLint** and **Prettier**.
 - Participated in daily standups and sprint retrospectives.
-

EDUCATION

The University of Texas at Austin — Master's in Artificial Intelligence (*Expected 2026*)

University of Houston — Bachelor's in Computer Science

PROJECTS

textvid.ai (Freelance)

- Built a full stack application to convert text scripts into short-form videos using **React** and **Python**.
- Implemented scene scripting, voice synthesis, and video rendering to reduce content creation time by 90%.
