EDUCATION

Bachelor of Science, Biomedical Engineering

Rose-Hulman Institute of Technology—Terre Haute, IN

- **Biomedical Concentration:** Biomechanics
- **Related Courses:** Biomedical Engineering Design, Principles of Biomedical Engineering Design, Engineering Statistics, Research Methods, Biomaterials, Biomechanics, Instrumentation and Measurements, Design for Manufacturing

SPECIALTIES

Medical Device Industry, Pharmaceutical Industry, Commissioning, Documentation, Manufacturing, Remediation, Validation, Qualification, FDA regulated Environment, ISO Standards, Microsoft Office, SolidWorks, Minitab.

EXPERIENCE

CAI—Indianapolis, IN

Validation Engineer

FEB 2023–NOV 2023

- Worked in the contract pharmaceutical industry, specifically in the areas of commissioning, qualification, and validation
- Oversaw the commission and validation of manufacturing equipment and utilities worth approximately 50 million dollars
- Drafted and reviewed CSV, risk assessment, cGMP, process simulation studies, and GxP documentation for the installation, commissioning, and qualification of new manufacturing lines in a clean room environment
- Liaised multi-department team to keep them up to date with current projects and deadlines

Cook Medical—Spencer, IN

Documentation Specialist

DEC 2021–SEP 2022

- Provided documentation support for product development, including Process Validation plans and templates, CSV protocols, installation qualification, operation qualification, manufacturing instructions, data migration, calibration qualification, and training
- Lead multi-department team in document troubleshooting, deviation management, quality management, and multi-step revision processes

- Coordinated updates and actions across project management software within deadlines, while gathering clinical knowledge and input for the document revision
- Proofread and reviewed FDA-regulated documents, with a skilled eye for details, in order to ensure high quality

Zimmer Biomet—Warsaw, IN

Manufacturing Engineer

MAY 2019–APR 2020

- Reviewed and amended manufacturing, component processing, cleaning validations, process validations and quality control procedures, protocols, and processes
- Lead multi-departmental teams in resolving conflicting priorities for the successful delivery of proposed changes in the process of finalizing product manuals, process lifecycle report activities, and process validations per FDA standards within deadlines
- Initiated and completed over 50 medical device reviews, change orders, and updates per week

Wahoo Frontier Toppings—Buffalo, WY

Production Manager

JUL 2018–APR 2019

- Established and worked to maintain the consistency and integrity of product standards based on FDA standards
- Assisted in the manufacturing and handling of products
- Managed warehouse activities, including inventory management, packaging, and shipping scheduling

Restoration Medical Polymers—Columbia City, IN

Polymer Engineer CO-OP

NOV 2017–FEB 2018

- Authored test-method validations and process validations for new material verification tests, in accordance with ASTM standards, setting the standard for how future procedures are written
- Supported root-cause analysis of non-conforming product and assisted in CAPA implementation
- Manufactured and conditioned over 100 different lots of polyethylene specimens, supporting multiple customers and ensuring on-time delivery of all lots
- Served as lead test engineer, testing material properties, data collection, and analysis of polyethylene specimens
- Identified defects to avoid unnecessary future work hours, which resulted in significant cost savings to the company
- Installed and calibrated \$10K worth of test equipment for the lab, using ISO standards; ensured proper testing on all future specimens, resulting in high quality polyethylene for the customer

ADDITIONAL BENEFICIAL SKILLS

Proficient in MATLAB, ISO 9001, ISO 13485, Microsoft Office SolidWorks, Minitab, AutoCAD, U.S. Title 21 CFR Part 211, U.S. Title 21 CFR Part 210, Regulation, Process Verification, U.S. Title 21 CFR Part 820, Computerized System Validation (CSV), Good Manufacturing Practice (GMP)
