Summary Objective

- Recent undergrad graduate seeking a software and IT position
- Looking for an environment that prioritizes growth and impactful work
- Eager to use undergrad and intern experience with seasoned professionals

Education

Kennesaw State University

Kennesaw, GA

Bachelor of Science, Computer Science

August 2020-May 2024

Emphasis, Software Design and Computer Graphics

Relevant Coursework

Data Structures, Objected-Oriented Programing, Operating Systems, Discrete Mathematics, Database Systems, Algorithm Analysis, Probability & Data Analysis, Parallel & Distributed Computing, Data Mining, Information Retrieval, Cloud Computing, Computer Graphics

Technical Skills

Programming Language: Java, HTML, JavaScript, Python, C++

Operating Systems: Linux, Windows

Database: SQL Server, MS Access

Software: MS Teams/Excel/Word, Zoom

Relevant Experience

Tulix Systems, Inc

Software IT intern

- Wrote Bash scripts to convert book repositories into accessible .wav audio files
- Built an HTML to track visitor data and help guide future company plans
- Set up CentOS servers and packages to handle growing storage needs
- Used PHP in Visual Studio to update graphs showing key project timelines

Projects

Budget App, Mobile App Programming

- Built a React.js budgeting app with bank account connectivity for users
- Implemented secure login using Firebase, creating a clean and user-friendly interface
- Coordinated weekly progress reports and scheduled team meetings to drive efficient planning

TCP Protocol, Programming

- Developed distributed system transferring various file types to measure speed scalability
- Measured how varying file types (.txt, .mp3, .wav) impacted transfer speed

Certification

- Microsoft Azure 900 certified – 2025: <https://learn.microsoft.com/en-us/users/penielawlachev-4887/transcript/dlomuekl8y8p54d>
