Senior Database Administrator & Business Intelligence Leader

Innovative, results-driven IT professional with 20+ years of experience in database administration, business intelligence, and data architecture. Expertise in SQL Server, Azure, ETL automation, performance tuning, and reporting tools. Proven success leading BI initiatives, streamlining systems, and delivering optimized data solutions. Extensive experience supporting government and legal sector projects.

Technical Skills

- Databases: SQL Server (6.5–2022), Oracle 12c, PostgreSQL, MySQL, Azure SQL
- ETL & BI Tools: SSIS, SSAS, SSRS, Power BI, Azure Data Factory, Data Warehouse
- Languages: T-SQL, PL/SQL, Python, PowerShell, VB.NET
- Platforms: Windows, UNIX, Azure, AWS
- Other: Data Modeling, Performance Tuning, Replication, Automation, Data Security

Professional Experience

OmniSystems, Inc., McLean, VA

Senior Database Administrator | Feb 2017 – Mar 2025

Spearheaded database modernization and automation efforts supporting U.S. Virgin Islands government systems. Enhanced database performance, streamlined data processes, and implemented secure data transfers. Collaborated across multiple agencies to ensure accuracy, compliance, and usability of mission-critical data systems.

- Migrated three legacy SQL Server 2008 databases into a unified system on SQL Server 2016, reducing duplication and eliminating fraud/waste.
- Optimized performance by analyzing and restructuring indexes/queries/stored procedures.
- Automated data imports from systems such as NHTSA and financial databases.
- Developed secure data exports to US Selective Service, USVI Courts, and USVI Finance Department using SSIS/ADF.
- Built reporting infrastructure using SSRS and Power BI to support executive and operational decisions.
- Designed data models, enforced security protocols, and established database development standards.

Venable LLP, Baltimore, MD

Business Intelligence Architect | 2015 – 2016

Established and led the firm's business intelligence team, building its first enterprise data warehouse. Drove adoption of SSAS and reporting tools across departments to support decision-making. Championed process automation to improve data accessibility and report turnaround time.

- Led a new BI team and built the firm's first data warehouse and SSAS cubes.
- Automated delivery of attorney performance reports, reducing processing time by 95%.
- Created ETL processes to automate expense reimbursement workflows.

Senior Database Administrator | 2008 – 2014

Oversaw full lifecycle of the firm's database infrastructure across multiple versions of SQL Server (2000/2005/2008/2012). Directed database migrations, security, and maintenance of mission-critical systems. Pioneered automation strategies to streamline processes and enhance data accuracy.

- Administered and maintained all firm database systems including financial and document management.
- Migrated accounting systems, rewriting hundreds of database objects to match new vendor schemas.
- Created automated email alert systems and SSIS pipelines that reduced manual work by 95%.

Database Administrator | 2000 – 2008

Delivered robust database support and performance improvements across legal and financial systems. Played key role in data migration, query optimization, and standards enforcement during firm-wide system upgrades.

- Engineered LEDES billing system that cut client payment cycles from 30 to under 10 days.
- Migrated legacy accounting data from Informix to SQL Server 2000.

PC Applications Specialist | 1997 – 2000

Designed and supported custom database applications using MS Access. Managed Informix and SQL Server (6.5/7.0) databases, including configuration, security, and daily administration in a dual-platform environment.

Education

Bachelor of Business Administration (BBA) in Information Systems

Sellinger School of Business, Loyola College, Baltimore, MD
