

SUMMARY

Business Analyst with 4+ years of expertise in SDLC, Agile/Scrum, and process automation, driving measurable results through data-driven reporting, predictive analytics, and workflow optimization. Skilled in SQL, Python, Tableau, and Power BI for real-time reporting and automated solutions, focusing on aligning technical outcomes with business objectives. Producing key project documentation such as BRD, FRD, SRS and Use Cases with expertise in Salesforce, ERP, and CRM systems. Proven ability to translate manual processes into automated workflows (e.g., NLP-driven data retrieval, financial forecasting models) and deliver 20-40% efficiency gains. Adept at managing the product lifecycle and conducting A/B testing, regression analysis to optimize customer lifetime value stakeholder communication, cross-functional collaboration, and creating actionable insights for Governance, Risk, and Compliance (GRC) readiness.

SKILLS

Methodologies: SDLC, Agile/Scrum, Waterfall
Language: Python, SQL, R
Packages: NumPy, Pandas, Matplotlib, SciPy, ggplot2
Documentation: FRD, BRD, SRS
Project Management Tools: MS Project, MS SharePoint, Jira
Business Intelligence Tools: Tableau, Power BI, SAS
Data Analysis Tools: Excel (advanced), SPSS, MATLAB
Analysis Skills: Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis
GRC-Relevant Skills: Real-time dashboards, compliance reporting, data aggregation, predictive analytics
Tracking/Other Skills: Jira, Microsoft Visio, HP Quality Center, JAD, Rational ClearQuest, RTM, UAT
Soft Skills: Time management, Leadership, Problem-solving, Negotiation, Decision-Making, Documentation

EDUCATION

Master of Science in Business Analytics | DePaul University, Chicago

Dec 2024

Bachelor of Technology in Electrical and Electronics Engineering | Himalayan University, Itanagar, India

Mar 2019

EXPERIENCE

Morgan Stanley, IL | Aug 2024 - Current | Business Process Analyst

- Automated financial forecasting processes by developing and deploying a predictive analytics model using SQL for data aggregation, Python for model development, and Power BI for interactive dashboard creation, reducing operational costs by 20% through data-driven financial planning.
- Led Agile teams, defining 50+ user stories, acceptance criteria, and sprint plans for successful Salesforce projects.
- Collaborated with cross-functional stakeholders, translating business needs into actionable requirements, achieving a 20% improvement in alignment.
- Led and managed the ERP system migration (Infor SyteLine, AS400), ensuring accurate data integration, process alignment, and improved financial reporting accuracy.
- Engineered a suite of performance dashboards and reports in JIRA, enabling executive stakeholders to track project milestones and identify bottlenecks; boosted project efficiency by 25% and reduced time to-decision by 30%.
- Developed GRC-aligned predictive models for budget risk forecasting, enabling proactive mitigation strategies that reduced compliance-related costs by 15%.
- Conducted thorough business process analysis, identifying and implementing improvements, leading to a 25% increase in operational efficiency.

Infinite Infolab, India | Jan 2022 – Feb 2023 | Business System Analyst

- Spearheaded the implementation of SDLC and Agile/Scrum methodologies, optimizing CRM system enhancements and reducing project timelines by 20%.
- Implemented Python scripts utilizing Pandas and NumPy libraries in conjunction with SQL queries to perform ETL processes, resulting in a 40% reduction in data processing time and ensuring 99% data accuracy for reporting and analysis.
- Directed the development of visually compelling reports and dashboards in MS Excel, PowerPoint, Tableau, and Power BI, enabling stakeholders to make data-driven decisions and drive strategic planning initiatives with a 25% increase in revenue.
- Conducted a comprehensive impact, GAP, risk, and SWOT analyses of the healthcare landscape, identifying key strengths, weaknesses, opportunities, and threats to inform strategic decision-making and drive operational. enhancements. This analysis led to a 25% increase in patient satisfaction scores by optimizing care processes.
- Utilized tracking tools, including GIT, Test Director, MS Visio, and HP Quality Center, to organize project documentation and ensure compliance with industry regulations and standards, ensuring seamless project management and regulatory adherence.
- Performed competitive benchmarking and regulatory compliance assessments to ensure product offerings aligned within industry standards and legal requirements, reducing compliance risks by 25%.

Orion Technolab, India | Apr 2019 – Dec 2021 | Business Analyst

- Applied Agile methodologies within the SDLC framework to lead projects from conception to implementation, collaborating with cross-functional teams and deploying tools such as Confluence and MS Project to track progress and ensure timely delivery, resulting in a 30% reduction in planning time.
- Utilized analytical skills to assess healthcare data, executing in-depth analysis of cost/benefit ratios, impact assessments, GAP analysis, and risk evaluations to drive strategic decision-making and operational efficiency.
- Documented functional requirements (FRD), business requirements (BRD), and system requirements (SRS) using UML and RTM methodologies, ensuring clear understanding and alignment of project objectives across stakeholders.
- Automated data processing workflows using natural language processing (NLP) techniques, enhancing data retrieval times by 40% and increasing the accuracy of sentiment analysis models
- Utilized Google Analytics and Mix Panel to analyze user behavior, leading to a 20% improvement in product feature adoption and customer engagement.
- Directed Agile Scrum meetings that drove a 95% on-time project completion rate, boosted cost efficiency by 20%, and reduced planning time by 30% through effective tracking and meticulous analysis.
- Conducted A/B testing and predictive analytics to optimize marketing strategies, resulting in a 30% increase in conversion rates and revenue growth.
- Played a pivotal role in ERP system selection, vendor evaluation, and implementation, contributing to a 15% reduction in operational costs

PROJECTS

Reyes Holdings Fleet Management (Real-Time Project):

- Examined 700,000+ records to uncover fleet incident trends, pinpointing high-risk clusters in the West Coast and Midwest regions.
- Automated manual reporting processes using Tableau, R Studio, and Python, enhancing coachable event accuracy by 70%.
- Diagnosed coaching gaps and optimized coaching and van reset processes, cutting incidents by 17% and enhancing driver efficiency by 23%.
- Recommendations are projected to save \$1.2M annually by reducing incidents, fuel, and insurance expenses.
- Overhauled XRS and ELD systems to drive data-centric safety enhancements across fleet operations.
