SUMMARY

MS in CS and Software Engineer with experience in full-stack development, focusing on system scalability, clean architecture. Adept at designing secure APIs, automating workflows and optimizing application performance in cloud-native environments.

PROFESSIONAL EXPERIENCE

One Community Global

Jul 2025 – Present

Software Engineer

Remote, USA

- Automated access provisioning across **Dropbox**, **Sentry** and **GitHub** using **Node.js** and **Express**, cutting onboarding time by 60% through daily cron-based synchronization.
- Developed an email platform in the **MERN stack** with Template, Sender and Tracking Dashboards using **Gmail APIs**; handled 1500+ weekly emails, improved reliability by 40% and replaced **Intuit MailChimp** to eliminate SaaS costs.
- Diagnosed and delivered hotfixes for production issues in the application, cutting recurring **Sentry** error alerts by 20%.

University of Missouri - Kansas City

May 2024 – Jan 2025

Software Engineer

Missouri, USA

- Engineered secure network communication and API routing across FastAPI microservices, configuring **DNS** and **reverse proxies** to enhance reliability, reduce latency by 30%, and align with **Zero Trust** security principles.
- Redesigned the file upload/download system in **Python**, **FastAPI** using chunked streaming, eliminating large-file failures for 1K+ users and improving speed by 45% while reducing server **CPU** and **RAM** usage by 60%.
- Implemented JWT authentication with ABAC, audit logging, achieving 100% traceability of user actions for compliance.
- Introduced and developed six **ReactJS** dashboards integrated with FastAPI and **OpenAI APIs**, automating data summarization and insight generation from program datasets, reducing manual analysis time by 70%.
- Designed a schema-driven Dynamic Form Builder using **React**, **FastAPI** and **PostgreSQL**, enabling non-technical staff to manage surveys and reduce form turnaround from days to under **1 hour**.

Wipro Technologies

Sep 2021 – May 2023

Software Engineer

Telangana, India

- Developed an asynchronous export service using **Spring Boot**, **PostgreSQL** job queues, and **AWS S3** to generate large CSV reports, eliminating HTTP timeouts and improving reliability for 10K+ enterprise users.
- Engineered an **event-driven** email notification system using **Kafka** and the **Outbox pattern** with **SendGrid** mail APIs, achieving 99.9% delivery success and ensuring transactional consistency.
- Optimized **Spring Boot REST/gRPC APIs** through query tuning and database indexing, reducing latency by 60% and improving reliability under high-traffic conditions.
- Led optimization of 10+ Angular dashboards by introducing **Redis** caching with scheduled aggregation and lazy loading, reducing load times from 3–5s to 700ms and improving scalability and user experience for enterprise clients.
- Authored **gRPC** and testing onboarding guides, built reference modules, and led internal knowledge-sharing sessions, reducing new engineer onboarding time from 1 week to under 3 days.
- Built automated test suites using **JUnit** and **Mockito**, integrated **JaCoCo** and **SonarQube** gates into **CI**, achieving 90% coverage and reducing staging defects.

OPEN SOURCE CONTRIBUTIONS / PROJECTS

Highest Good Network App – [Link](#) | *JavaScript, ReactJS, Node.js, Express.js, MongoDB, Azure, GCP*

Personal Finance Microservice App – *Java, Spring Boot (Microservices), Angular, Docker, MySQL, Eureka*

AI Code Review Automation System – *Python, OpenAI GPT-4o, GitHub Actions, Docker, YAML, Bash*

TECHNICAL SKILLS

Languages: Java, Python, Go, JavaScript, TypeScript, C/C++

Backend: Spring Boot, FastAPI, Node.js, Express.js, Hibernate, Flask, Django, REST/gRPC, GraphQL, Microservices

Frontend: ReactJS, Angular, HTML/CSS

Cloud & DevOps: AWS, GCP, Azure, Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins), Linux

Databases & Messaging: PostgreSQL, MySQL, MongoDB, Redis, Kafka

AI & Data: OpenAI APIs, Anthropic Claude, GitHub Copilot, Generative AI (LLMs), Pandas, NumPy, Data Analysis

Core Competencies: Networking, API/System/Product Design, Distributed Systems, Data Structures & Algorithms, OOP

EDUCATION

University of Missouri - Kansas City

Aug 2023 – May 2025

MS in Computer Science (GPA: 3.94/4.0)

Kansas City, MO
