SUMMARY

.NET Lead and Senior Software Engineer with 24 years of experience in enterprise software development and 22 years in .NET/C#. Deep expertise in .NET Core, C#, MS SQL Server, and Azure cloud platforms. Adept at leading modernization and integration efforts, particularly in transitioning legacy/mainframe systems into scalable .NET architectures. Proven leader in Agile environments, unit and regression testing, DevOps workflows, and delivering secure, maintainable applications that comply with evolving business requirements. Strong foundation in Domain-Driven Design (DDD), SOLID principles, and Event-Driven Architecture (EDA). Comfortable coordinating with multi-stakeholder teams and resolving high-priority production issues across complex environments.

TECHNICAL SKILLS

- **.NET & C# Development:** .NET (1.0–8.0), .NET Core, ASP.NET MVC, Razor Pages, Web API
 - **Databases:** SQL Server (24 years), PostgreSQL, Oracle, Cosmos DB, MongoDB, Dapper, EF
 - **Cloud & DevOps:** Azure Functions, App Services, Service Bus, Logic Apps, Azure DevOps, CI/CD
 - **Architecture & Design:** Domain-Driven Design (DDD), Event-Driven Architecture (EDA), SOLID Principles, Clean Architecture
 - **APIs & Integration:** REST, Swagger/OpenAPI, JSON, XML, SOAP, OAuth2, JWT
 - **Frontend Development:** JavaScript, Blazor, HTML5, CSS3, Bootstrap, jQuery
 - **AI/ML:** RAG, Azure OpenAI, Azure Document Intelligence, TensorFlow, PyTorch, Scikit-learn, NLP
 - **Testing & Monitoring:** xUnit, NUnit, Moq, Serilog, Seq, Azure Application Insights
-

PROFESSIONAL EXPERIENCE

Principal Software Architect

Dog Byte Software LLC • Jun 2024 – Present • Remote

- Led modernization and API development efforts for legacy systems transitioning to .NET Core microservices.
- Developed high-throughput APIs using C#, JSON serialization, Swagger, and SQL Server.
- Designed secure API gateways and OAuth2/JWT-based auth layers for public and internal services.
- Managed regression test coverage, pipeline deployments, and release validation using Azure DevOps and Docker.
- Interfaced with client technical teams to resolve integration bugs, align architecture, and prepare for releases.
- Authored technical documentation including component designs, process flows, and data models.

Director of Operations / Sr. Technical Architect • Resource Data Inc. • Jul 2008 – Jul 2024 • Boise, ID

- Oversaw modernization projects replacing Oracle/PLSQL and mainframe components with C#, .NET Core, and SQL Server.
- Delivered fault-tolerant systems using event-driven design and service bus queues across microservices.
- Collaborated with business units to define technical specs, review architecture plans, and lead end-to-end release cycles.
- Implemented regression test suites and post-deployment validation frameworks across dev/test/prod environments.
- Worked across teams to remediate production issues with performance tuning, logging instrumentation, and rollback strategies.

Technical Project Manager • Resource Data Inc. • Oct 2000 – Jun 2008 • Anchorage, AK

- Managed full SDLC for custom applications integrating with legacy systems.
- Developed SQL Server-based integrations and data migration scripts using T-SQL & ETL routines.
- Provided triage and response to production issues, identifying root cause and deploying fixes.
- Authored test plans, release notes, and documentation for QA and business teams.

SELECTED PROJECTS | [Project Portfolio](#)

Legacy Modernization – Monolith to Microservices Migration

Replaced a legacy ASP.NET Web Forms system with a .NET Core microservices architecture.

- Used .NET Core and Web API with Swagger, JSON, and Azure SQL for scalable integration.
- Refactored core logic into modular services with asynchronous workflows via RabbitMQ.
- Developed test automation pipelines and environment-specific CI/CD with Azure DevOps.
- Led API versioning and schema evolution during transitional integration with legacy backends.

Salmon Genetic Repository Modernization

Migrated a .NET Framework app to .NET 7 on Azure.

- Refactored configuration to use appsettings.json and introduced dependency injection and async/await.
- Designed new SQL Server schema for efficient scientific data queries and migrated using Azure DMS.
- Implemented automated unit and regression testing with rollback capability.
- Delivered full technical documentation for audit and deployment compliance.

EDUCATION

Bachelor of Science in Computer Science

University of Alaska Anchorage – May 2000

Microsoft Certified Solutions Developer (MCSD) – June 2015
