

Christian Faust

Senior Software Engineer | C#, .NET, AWS, Azure, React, Angular
+1 813 434 1409 • chris33faust@gmail.com • Lake Mary, Florida

SKILLS

C#, .NET, ASP.NET MVC, .NET Core, React, Angular, Blazor, AWS, AWS Lambda, EKS, Azure, Azure functions, Azure Devops, AKS, MS SQL Server, PostgreSQL, MySQL, Amazon DynamoDB, Azure CosmosDB, Entity Framework, EF Core, ADO.NET, Dapper, Docker, Terraform, Git, Agile/Scrum, XUnit, NUnit, Microservices, RabbitMQ, Datadog

EXPERIENCE

Bowery Farming

Jan 2021 – Oct 2024

Senior Software Engineer

- Developed scalable backend services using **.NET Core 7**, and **AWS** to support farm automation, IoT integration, and data analytics.
- Architected and deployed 10+ microservices on AWS, leveraging **Lambda**, **API Gateway**, and **DynamoDB** to process large-scale real-time farm data.
- Implemented event-driven architectures using AWS **SQS**, **SNS**, and **Lambda** to streamline farm operations such as automated irrigation and climate control.
- Enhanced security and compliance, integrating **IAM** policies, **AWS Cognito**, and **OAuth2** authentication for secure access control.
- Developed a web-based farm monitoring dashboard using **React** and **Redux**, enabling 100+ farm operators to track crop health, environmental conditions, and automation workflows in real time.
- Engineered **LINQ** with Lambda for CRUD operations on **SQL/NoSQL**, optimized performance using **Redis Cache**, and coded LINQ queries to customize data from AWS **Dynamo DB** in Web API actions, while reducing response times by 40% through query optimizations, caching, and database indexing.

Massey Services, Inc

Apr 2020 – Dec 2020

Software Developer

- Leveraged **ASP.NET Core 6** and **Angular** within an **Azure** cloud-native microservices architecture for modernizing an on-premises, monolithic legacy **EHR** system originally built with **ASP.NET Web Forms**.
- Integrated **SignalR** for real-time data updating on a patient-enrollment system, handling 1,000 concurrent users for each data pool and increasing user satisfaction through integrating with 2+ **Salesforce** and **CRM** tools.
- Implemented **Azure DevOps** for **CI/CD** pipelines, automating build, test, and deployment processes, utilizing **Datadog** to monitor applications deployed on Azure.

Olive

Jan 2017 – Feb 2020

Software Engineer

- Optimized a legacy **ASP.NET MVC** app, achieving 20% faster page loads and 40% higher user connections after migrating to **ASP.NET Core**.
- Influenced complete **SDLC** including analysis, design, implementation, testing, and maintenance for 3 applications with agile and scrum methodology.
- Conducted **code reviews** and mentored 2 junior developers, fostering a collaborative environment and strengthening a team of 7 developers.

EDUCATION

University of Central Florida
Bachelor's Degree, Software Development

Aug 2014 – Dec 2016
