QA MANAGER

Sr SOFTWARE TEST ENGINEER ◆ **CERTIFIED SCRUM MASTER (CSM)** ◆ **AGILE PRINCIPLES**

Solutions-focused and analytical Senior Quality Assurance Software Engineering professional with a wealth of experience leading QA teams, testing software, and innovating new automation methods. Navy Veteran who served our country with pride, commitment, and a sense of duty focusing on mission accomplishment. Expertise in software testing of web-based and client/server applications, manual testing, automated testing, and user acceptance testing (UAT). Adept in Agile and Waterfall methodologies with experience and extensive knowledge of managing products and projects. Demonstrated ability to manage cross-functional teams with strong teamwork skills resulting in meeting budgets and deadlines and exceeding performance metrics.

AREAS OF EXPERTISE

QA, DevOps, Test Cases, Test Plans, Acceptance Testing, Defect Metrics, Communication, Agile Software Development, Software Development Process, Scrum, Test Automation, Behavior-driven Development, Perforce, Innovation Management, Management, Project Management, C#, Jira, Jenkins, Confluence, GitHub, Artifactory, Version Control, Microsoft Visual Studio, Git, Bug Tracking System, Continuous Integration, Testing Heuristics, Splunk, Automated Testing, Visual Studios, AWS

ACCOMPLISHMENTS

- Won the yearly "Bold and Courage at Intuit" award for enabling the DevOps team to complete their migration on time.
- Innovated and implemented a new automated release structure at Intuit to increase the speed and accuracy of production to less than an hour; previous releases took two weeks to complete.
- Volunteered at Intuit to migrate the C++ TPS Calc Engine code from Perforce to GitHub and introduced Property Sheets to a 30-year-old code base during this time, which jump-started the ability for the team to update from a 32-bit to 64bit desktop app.
- Constructed and implemented a feature for Intuit customers to self-repair patch issues saving 1000+ hours in yearly support calls.
- Engineered and migrated BioFire's Film Array operating system into a Windows 7 Embedded OS, creating an OEM customizable and secure product, improving manufacturing fidelity per unit, and speeding up imaging and testing durations.
- Successfully led the early verification and validation test cases for a design history file on the Torch project for early submission to the FDA for BioFire.

PROFESSIONAL EXPERIENCE

Sr. Quality Assurance Engineer SME - THADD Training | Higher Echelon | Huntsville, AL

Oct 2022 - Feb 2025

- Witness test events, Audits, Institute Agile and SCRUM principles. (secret clearance)

Sr. Quality Assurance Analyst - ProSeries Engine Team | Intuit | San Diego, CA

Dec 2016 - Feb 2023

- Constructed and executed manual & automated tests for the ProSeries Desktop Tax product for Intuit.
- Served as the Sprint Owner in rotation with other team members providing DevOps support for releases and innovating new ways to release the ProSeries engine desktop application in SaaS cadence.
- Pioneered advanced ProSeries automation testing with new domain-specific language combined with a simple config file to change how desktop integration tests were performed, created a stable test structure without requiring frequent code updates to accommodate changes, and automated with nightly builds.
- Innovated performance logs for performance testing, created a performance dashboard to use and engineered and automated a virtual machine solution to implement release automation testing for the continuous integration of a desktop application.

Software Test Engineer III | BioFire Diagnostics | Salt Lake, UT

March 2013 - Aug 2016

- Served as the subject matter expert on the FilmArray systems responsible for writing and executing test cases for the FDA 510k submission to verify and validate the FilmArray 1.5, FilmArray 2.0, and Torch systems.
- Developed a QA training program to learn and use SQL and improved the efficiency and effectiveness of the QA department.

Lead Software Quality Assurance Analyst | Certiport | American Fork, UT

June 2007 - January 2013

- Promoted to Lead QA Engineer, overseeing quality-assurance testing and teams for client software and systems development projects and performed system, unit, performance, load, regression, stress, and data interface testing.
- Formed the development team and partnered to rethink, engineer, and deploy a new release process that eliminated errors during deployment to production, the most egregious problem for customers, led the changes to get approved and implemented.
- Assisted in implementing Agile and Scrum for the software development team.

Convergys | Orem, UT

2000 - 2004

Microsoft Installation Specialist

- Provided tech support for Microsoft products Windows 98, Windows 2000, and Windows XP-related calls.
- Resolved installation, performance, and networking issues over the phone for the Microsoft project.

EDUCATION & CERTIFICATES

Certified ScrumMaster (CSM) | **Microsoft Office Specialist** | **IC3 GS4** | **Adobe Certified Associate CS3 & CS4** | **MCSE**

2000
