PROFESSIONAL EXPERIENCE

Lead Salesforce Administrator / Developer

Travelers Haven - Denver Co. | 12/2021 - 06/2025

- Developed and maintained Salesforce solutions across multiple business units using Apex, Visualforce, CPQ configuration to enhance user experience and system efficiency. Hands-on experience with AWS services and skilled in building user-friendly Lightning Web Components (LWC) to enhance Salesforce functionality.
- Configured and deployed workflows, dashboards, and automation to optimize business operations.
- Built and maintained integrations via REST and SOAP APIs, connecting key systems and tools.
- Integrated calls, texts, calendars, and data systems to ensure seamless synchronization between Outlook/Google and Salesforce—eliminating double bookings, improving scheduling accuracy, and maintaining compliant SMS opt-out functionality.
- Led the design and deployment of scalable Salesforce solutions from concept through implementation.
- Partnered with senior leadership to align technical solutions with strategic business goals.

Salesforce Administrator / Developer / Marketing Cloud Specialist

Hotel Engine - Denver, Co. | 01/2017 - 12/2021

- Developed dynamic, data-driven email templates using AMPscript, HTML/CSS, and SQL, increasing open and click-through rates with targeted content.
- Delivered custom Salesforce solutions that streamlined workflows, improving efficiency by 30%.
- Integrated Marketing Cloud with Salesforce Core and external systems through REST/SOAP APIs to ensure real-time data synchronization and accurate reporting.
- Managed sandboxes and change control processes including UAT, documentation, and user training for successful deployment and adoption of new features.

Salesforce Administrator / Developer

Travelers Haven - Denver Co. | 08/2009 -01/2017

- Developed dynamic, data-driven email templates using AMPscript, HTML/CSS, and SQL, increasing open and click-through rates with targeted content.
- Delivered custom Salesforce solutions that streamlined workflows, improving efficiency by 30%.
- Managed sandboxes and change control processes including UAT, documentation, and user training for successful deployment and adoption of new features.
