EXPERIENCE

SQL Server Database Administrator (DBA) | CSI | Jacksonville, FL

Jan 2024 – Present

- Develop and implement long-term data storage and expansion strategies to meet organizational growth and performance needs
- Design, implement and manage a robust backup and recovery strategy, following Microsoft best practices and SLA requirements
- Deploy and manage Disaster Recovery and High Availability (HA) solutions, ensuring business continuity and minimal downtime
- Manage & apply SQL Server patches & Windows updates to maintain optimal performance & abide with organizational standards
- Install, configure and manage SQL Server Integration Services (SSIS) & SQL Server Reporting Services for efficient data integration
- Oversee SQL Server database administration, including installations and security configurations to guarantee data integrity
- Implement and enforce database security protocols, including user access control and auditing, to protect sensitive information
- Collaborate with cross-functional teams to align data management practices with logistic goals, including governance and quality

SQL Server Database Administrator (DBA) | MILAYO | Atlanta, GA

Jan 2022 – Dec 2023

- Supported the development and maintenance of ETL processes, ensuring seamless integration of data from multiple sources
- Troubleshoot and resolved SQL Server service outages promptly, providing on-call support during after-hours and weekends
- Executed SQL Server upgrades, including migrating from SQL Server 2012 to SQL Server 2019 through side-by-side upgrades
- Developed comprehensive documentation for database processes and troubleshooting steps to facilitate timely issue resolution
- Monitored and enforced database access controls, ensuring appropriate permission levels were assigned based on user roles
- Developed and maintained reporting solutions using SQL Server Reporting Services (SSRS) to deliver actionable business insights
- Stayed updated with SQL Server advancements and industry trends, ensuring the team leveraged effective tools and practices
- Collaborated with cross-functional teams, including system administrators, network engineers, application developers, and software engineers, to promote team cohesion and effective project execution

SQL Server Database Administrator (DBA) | SHILLOH INC | Houston, TX

Jan 2019 – Dec 2022

- Designed & monitored automated maintenance plans and SQL Server Agent jobs for regular backups & index defragmentation
- Led planning, installation, and configuration of Microsoft SQL Server, ensuring seamless integration with systems and alignment
- Managed and enforced database access policies by provisioning and deprovisioning users according to company security protocols, ensuring secure, appropriate, and compliant access to sensitive data across all platforms
- Coordinated with vendors and internal teams to apply SQL Server and Windows patches, ensuring systems were up to date with the latest security fixes, performance improvements, and compliance requirements
- Implemented various types of database backups and restoration procedures, utilizing SQL Server Agent for job scheduling and setting up Database Mail for alerts, notifications, and proactive monitoring
- Configured and managed High Availability (HA) and Disaster Recovery (DR) solutions, utilizing technologies such as Always On Availability Groups and traditional Failover Clustering (WSFC) to ensure data protection and minimal downtime

Team Leader, Corporate & Commercial Practice | Gravida Attorneys | Lagos, Nigeria

Jan 2014 – June 2018

- Ensured client adherence to government regulations, completing documentation and processes on time to avoid penalties
- Identified fraud within a client's organization, developing and implementing a recovery strategy to reclaim millions in assets
- Actively participated in hazard identification and risk assessments, contributing to the development of safety protocols that minimized workplace risks and ensured operational continuity
- Developed and negotiated Service Level Agreements (SLAs) between clients and vendors, ensuring clear expectations, defined performance metrics, and strong partnerships to foster successful business relationships
- Conducted comprehensive security assessments and site surveys, providing clients with strategic recommendations on best practices for enhancing security measures and mitigating risks
- Managed the renewal process for all operating licenses, certificates, and legal documentation, ensuring clients remained compliant, up-to-date, and fully aligned with industry requirements and regulations

TECHNICAL SKILLS

Database Management Systems: Ms Sql Server 2012-2019, Always On Availability Groups, Failover Clustering, Log Shipping

Database Tools: Sql Server Reporting Services (Ssrs), Sql Server Integration Services (Ssis), Powershell, T-Sql

Backup And Recovery: Database Backup & Restore, Disaster Recovery Solutions, High Availability Solutions

Performance Tuning: Query Optimization, Indexing, Database Performance Monitoring

Security: Database Security Management, User Access Control, Data Encryption, Compliance & Auditing

Automation And Scripting: Powershell Scripting, Sql Agent Jobs, Automated Database Maintenance

Data Integration: Etl (Extract, Transform, Load), Data Migration, Data Replication

Disaster Recovery And Business Continuity: High Availability Configuration, Failover Clustering, Data Recovery Strategies

Troubleshooting And Diagnostics: Database Issue Resolution, Performance Bottleneck Identification, Root Cause Analysis

Compliance And Standards: Regulatory Compliance, Data Governance, Security Standards (Gdpr, Hipaa)

EDUCATION

Master in International & Commercial Law- LLM, University of Buckingham, Buckingham, United Kingdom, 1141691

Bachelor in Law -BL, University of Benin, Benin, Edo, Nigeria, 300213
