Education Background

- B. E (Electronics and Communication Engineering) – June 2012
Rajalakshmi Engineering College, Chennai
CGPA – 8.75
- Higher Secondary (12th) – April 2008
St. Ann's matric Higher sec school
Aggregate: 94%
- Matriculation (10th) – April 2006
St. Ann's matric Higher sec school
Aggregate: 90%

Award

- Spotlight Award at Comcast – 2024
- High Five Award at Comcast – 2024, 2023 and 2021
- Pinnacle Award at Comcast – 2022
- Champ Award at Tata Elxsi – 2015

Engineer 3, Quality and Automation Engineering – Comcast:

April 2019 – March 2022

- End to End Testing the whole home setup with Video, Broadband devices.
- Writing test cases for the new features coming in and automating them using Automatics tool.
- Logging into devices and monitoring its performance during entire testing for its performance.
- Logging bugs and triaging them, owning the bugs till closure.
- Monitoring Field issues and help in reproducing them.
- Sending daily reports to the Release team about the build quality and the bugs.

Engineer 2, Quality and Automation Engineering – Comcast:

Feb 2017 – March 2019

- Full suite regression testing for all the new releases happening which includes different streams testing, MPEG, QAM, IP, different audio testing like, stereo, surround, dolby, atmos, video testing like 4K/non 4K, App testing, recordings, diagnostics, Bluetooth, Wifi, OTT Testing.
- Logging into settop box and monitoring its performance during entire testing for its performance.
- Defect Validation and New Feature testing on release branches.
- Defect Logging and tracking the defects to closure.

Senior Engineer – Tata Elxsi

August 2014 – Jan 2017

- Identifying main API's for the RDK components and preparing test cases for the same.
- Writing stubs and wrapper functions for these components using Python.
- WEBUI testing are done using selenium.
- Writing scripts for these test cases in TDK Automation tool.
- Configure test cases, primitive test data, inputs and devices along with their IP for execution.
- Running the scripts and verifying the functionality.
- Identifying the bugs, consolidating them and reporting.

Engineer – Tata Elxsi:

July 2012 – July 2014

- Identifying test cases for the entire full cycle and sanity testing for all the STB Features.
- Driver level testing for STB like CDI FOSH, CA FOSH using HFL studio FOSH testing tool.
- Loader testing QC FGDL, which is mainly to test the tuning of STB to various frequency, FEC, modulation type etc
- Identifying the bugs, consolidating them and reporting. Updating them in bug tracking tool clear quest
- Using different hardware tools like Oscilloscope, Attenuators, RF Signal Generators and other lab headend support devices for various testing.
