

Career Objective

Experienced IAM Engineer with over 7 years of success designing and deploying secure Identity & Access Management solutions across Microsoft Entra ID and Okta environments. Proven ability to lead IAM architecture, policy enforcement, lifecycle automation, SSO, and RBAC configuration for large-scale organizations with 100K+ users. Strong background in compliance, governance, scripting, and integration of modern authentication standards (OAuth2, SAML, OpenID Connect).

Key Competence

- SSO & MFA: SAML, OAuth2, OpenID Connect, JWT, Conditional Access, Entra MFA, Zero Trust
- Microsoft Security: Microsoft 365 Defender, Purview Information Protection, Defender for Identity
- Provisioning & Lifecycle: SCIM, PowerShell, REST APIs, Entra Governance, PIM, RBAC
- Lifecycle Automation: PowerShell, Microsoft Graph API, SCIM, Microsoft Identity Manager
- SIEM & Monitoring: Sentinel, Splunk, Azure Monitor, Audit Logs | Incident Response
- Cloud Platforms: Microsoft 365, Azure, AWS | Hybrid Identity & Directory Synchronization
- Compliance & Governance: SOX, HIPAA, GDPR, ISO 27001 | Access Reviews, PIM, RBAC
- Tools: ServiceNow, Jira, Qualys, Nessus, Microsoft Defender, Sentinel, Copilot (AI-ready)
- AI Security Readiness: Automating identity insights, user behavior analysis, and incident triage

Work Experience

IBM Consulting

08/2022 – Present

Role/Client: **Identity and Access Management Engineer**

- Managed user account life cycle, including creation, provisioning, securing, and inactivation of access.
- Designed and implemented secure Azure IAM solutions including Entra ID, RBAC, Conditional Access, and Policy for 100K+ users
- Enforced Conditional Access Policies, Identity Protection, and MFA based on risk signals to align with Zero Trust architecture.
- Developed Azure Policy definitions to enforce governance and compliance.
- Managed Identity Governance features: Access Reviews, Entitlement Management, and Privileged Identity Management (PIM) using Microsoft Entra.
- Built PowerShell scripts for provisioning and auditing.
- Managed Azure AD Connect for hybrid identity sync.
- Integrated external applications using OAuth2, SAML, SCIM, and OpenID Connect, securing service-to-service communication via Managed Identities.
- Conducted training sessions and IAM workshops.
- Resolved authentication and access control issues.
- Developed Azure Policy definitions and implemented Access Reviews for continuous governance and audit readiness
- Developed Azure Policy definitions and access reviews to support compliance with SOX, HIPAA, and GDPR.
- Implemented Privileged Identity Management (PIM) for Just-In-Time access, reducing risk exposure across Entra roles and admin access.
-

- Ensured standard processes and procedures were implemented when rolling out new provisioning and role management points.
- Automated provisioning, deprovisioning, and reporting using PowerShell, Graph API, and Microsoft Identity Manager.
- Enforce company policies and procedures related to identity and access management, mitigating security risks, and ensuring compliance.
- Proven ability to define and enforce identity lifecycle management processes, including provisioning, deprovisioning, and role-based access control (RBAC).
- Troubleshoot security and workflow issues independently or in collaboration with other Information Systems teams and/or stakeholders, adhering to internal service standards.
- Onboarded applications and enforced compliance through token lifetimes, auditing, and token mapping in OAuth server configurations.
- Ensured dormant accounts/records were disabled; eliminated access for those who no longer needed applicable information.
- Maintained detailed documentation on standard operating procedures, system configurations, and technical settings for internal team use, end user support, and other IS teams as needed.
- Supported the enrollment of Multifactor Authentication (MFA), Single Sign-on (SSO), Electronic Prescribing of Controlled Substances (EPCS), and Mobile Device Management (MDM).
- Staffed a 24x7 on-call rotation 365 days a year to ensure ongoing operations.
- Designed, implemented, and managed Splunk deployments for log aggregation, monitoring, and analysis across multiple environments.
- Configured and maintained Splunk Universal Forwarders, Indexers, and Search Heads for optimal performance and scalability.

Boomi

03/2019 – 08/2022

Role: IAM Analyst

- Managed user access provisioning, de-provisioning, and role-based access control (RBAC) for over 5,000 employees.
- Conducted regular access reviews and audits to ensure compliance with company policies and regulatory requirements.
- Implemented Single Sign-On (SSO) solutions and Multi-Factor Authentication (MFA) to enhance security.
- Collaborated with IT and security teams to design and implement IAM policies and procedures.
- Developed and maintained IAM documentation, including process workflows, policies, and training materials.
- Assisted in the integration of IAM solutions with various enterprise applications and systems.
- Monitored and responded to IAM-related security incidents and threats.
- Managed user identities and access privileges across multiple platforms, ensuring compliance with security policies and procedures.
- Automated repetitive IAM tasks using PowerShell, Python, and Graph API, aligned with enterprise AaaS strategy.
- Registered and secured enterprise applications with Entra ID; configured SCIM provisioning, consent permissions, and OAuth scopes.
- Implemented Identity Governance processes, including role review, attestation, and access request policies via Entra ID and Okta.
- Implemented SCIM provisioning and advanced token mapping.

- Conducted regular access reviews and audits to ensure compliance with internal policies and regulatory requirements.
- Developed and enforced policies for role-based access control (RBAC) and least privilege principles.
- Collaborated with IT and security teams to develop and implement security best practices.
- Responded to security incidents and access-related issues, providing timely resolutions and root cause analysis.
- Provided training and support to end-users regarding access management policies and procedures.

Deloitte LLC

10/2017 – 03/2019

Role: Solutions Specialist/ AWS Cloud Engineer

- Designed and implemented cloud security architectures for AWS environments, ensuring robust protection of data and applications.
- Managed and maintained cloud infrastructure across AWS and Azure, ensuring high availability and performance.
- Configured and administered Okta for Single Sign-On (SSO), Multi-Factor Authentication (MFA), and user provisioning.
- Developed and implemented automation scripts for cloud operations using Python and PowerShell.
- Monitored and optimized cloud resources to ensure cost efficiency and performance.
- Collaborated with security teams to enforce IAM policies and best practices.
- Conducted regular cloud environment audits and ensured compliance with industry standards (ISO 27001, GDPR).
- Provided 24/7 support for cloud infrastructure, resolving incidents and performance issues.
- Application performance monitoring using CloudWatch, Flow Logs etc. to meet company regulations and compliance. Supported cloud infrastructure management, including provisioning, monitoring, and troubleshooting.
- Assisted in the implementation and administration of Okta for user access management.
- Performed regular maintenance and updates on cloud systems to ensure stability and security.
- Collaborated with cross-functional teams to resolve technical issues and improve cloud operations.
- Assisted in the development of automation scripts to streamline cloud workflows and processes.
- Implemented and configured IAM policies, roles, and permissions to control access to AWS resources securely.
- Automated IAM processes using AWS Identity and Access Management (IAM) policies, AWS Lambda, and AWS CloudFormation.
- Conducted security assessments and implemented security best practices, including encryption and key management using AWS KMS.
- Optimized AWS resources for cost-efficiency and performance, utilizing AWS Cost Explorer and Trusted Advisor.
- Collaborated with DevOps teams to integrate IAM controls into CI/CD pipelines for automated deployment and security compliance.
- Provided technical guidance and mentoring to junior team members on AWS best practices and IAM principles.

Westgate Resort

10/2013 – 10/2017

Role: Oracle DBA Administrator

- Managed and maintained multiple Oracle databases (versions 11g, 12c, 19c) across production, development, and testing environments.

- Performed database installation, configuration, patching, and upgrades to ensure optimal performance and security.
- Conducted regular performance tuning and optimization, including SQL tuning, indexing, and resource management.
- Implemented backup and recovery strategies using RMAN, Data Pump, and Oracle Secure Backup.
- Monitored database health and performance using Oracle Enterprise Manager (OEM) and other monitoring tools.
- Ensured database security by implementing user access controls, encryption, and auditing.
- Coordinated with application development teams to design and optimize database schemas, queries, and stored procedures.
- Worked closely with software developers and DevOps to debug software and system problems. Assisted in the administration and support of Oracle databases, ensuring availability and performance.
- Performed database backups, restores, and recovery operations to safeguard data integrity.
- Conducted database monitoring and troubleshooting to identify and resolve performance bottlenecks.
- Assisted in the implementation of database security measures, including user management and encryption.
- Collaborated with development teams to design and deploy database solutions for various applications.
- Maintained database documentation, including configurations, procedures, and best practices. Conducted database performance assessments and provided recommendations for optimization.
- Automated routine DBA tasks using shell scripting and PL/SQL.
- Provided 24/7 support for critical database systems, resolving incidents and performance issues promptly.
- Mentored and trained junior DBAs and support staff on Oracle database administration best practices.

Certifications

- AWS Certified Solutions Architect – Professional
- AWS Certified Security – Specialty
- Microsoft Certified: Azure Security Engineer Associate
- CompTIA Security+
- Okta Certified Professional

Education

Bachelor's degree in computer science

University of Buea, Cameroon
