

# DEEKSHA VASANTH SUVARNA, PMP® Business Data Analyst

Jersey City, NJ • 949-683-9201 • deekshasuvorna370@gmail.com • [dsuvarna370](#)

## SUMMARY

Results-driven **Business Analyst with 5+ years** of experience in **Banking, Business Operations, Project Management, Corporate Finance, Compliance, Global Markets and Information Systems**. Proven expertise in **business requirements gathering**, coordinating **cross-functional teams, process & workflow optimization**, and **stakeholder management**. Skilled in data analysis to translate complex information into actionable insights, driving operational improvements, and supporting data-driven decision-making to optimize business outcomes and align project results with strategic objectives.

### Key Achievements:

- Managed project portfolios to optimize **resource management**, ensuring alignment with business goals and maximizing spending efficiency.
- Successfully coordinated business activities across **5+ projects**, delivering timely and optimized operational solutions.
- Created **30+ executive-level reports** using Excel (PivotTables, charts) and impactful PowerPoint presentations for senior management.

## EXPERIENCE

### Bank Of America, NJ | Business Data Analyst

May 2023 - Current

- Spearheaded end-to-end delivery of 3+ **Global Market Finance Change Management initiatives**, ensuring on-time and within-budget project implementation through detailed **Business Requirements Documents (BRDs)** definition and validation.
- Optimized the global cash reconciliation process by implementing **business transformation strategies**, improving data quality and data governance, increasing prompt nostro processing from 92% to 98%, improving cash flow accuracy by 6%, and eliminating reconciliation breaks through strategic upstream enhancements.
- Guided Executive Management Decisions by delivering data insights through executive-level reporting and stakeholder presentations, driving **portfolio management** strategies, and enhancing performance tracking and key scorecard metrics.
- Created and maintained core project artifacts including **Project Charters, Stakeholder Registers, Issue Logs, RAID logs, and RACI Matrices**, securing buy-in from 10+ key stakeholders, and implementing risk mitigation strategies.
- Collaborated with **Product Owners, Business SMEs, and Tech teams** to prioritize product backlog, define user stories and epics in JIRA, and manage sprint planning using Agile methodology.
- Designed and documented end-to-end process workflows using MS Visio, performing **process analysis** and **process improvement**, leading to a 10% improvement in operational efficiency through **process standardization** and **process re-engineering**, while ensuring compliance with **Sarbanes-Oxley (SOX)** regulations.
- Led **Agile pods** across cross-functional teams, implementing best practices in **product backlog grooming**, validating **epics** and **user stories**, and refining requirements for **sprint planning, agile execution**, and **test-and-learn initiatives**.
- Supervised the creation of clear **acceptance criteria**, verified 200+ **test scenarios**, and steered **User Acceptance Testing (UAT)**, leading to **zero** critical defects and 100% on-time migration.
- Managed project resources effectively, implementing robust **resource management strategies** and delivering comprehensive performance reporting dashboards, resulting in improved project delivery timelines and a 15% reduction in budget overruns.
- Facilitated cross-functional **release planning** sessions, aligning **Development, QA, and Product teams** to ensure timely delivery of prioritized features, manage sprint commitments, and coordinate cross-team dependencies for smooth production deployments.

### Shinhan Bank America, NY | Business System Analyst

July 2022 – April 2023

- Led the successful migration of **Currency Transaction Reporting (CTR)** from a legacy system to Oracle Mantas, resolving data integration issues through strategic **batch processing and parallel analysis**, ensuring a seamless transition for over 100 users.
- Collaborated with Product, Tech, and Compliance stakeholders to enhance **Oracle modules for BSA/AML (Bank Secrecy Act/Anti-Money Laundering) processes**, optimizing performance, increasing system response time, and reducing false positives.
- Utilized **advanced SQL** queries to extract, clean, and analyze large datasets from relational databases (e.g., Oracle, SQL Server), conducting trend analysis, forecasting, and variance analysis to support strategic planning and operational improvements.
- Conducted in-depth transaction reconciliation reviews and root cause analysis to escalate discrepancies, mitigate compliance risks, and develop proactive monitoring metrics for detecting unusual activity.
- Built dashboards using **Power BI**, analyzing data anomalies and presenting quarterly **Key Data Element (KDE)** insights to senior leadership.

### Capital One, NY | Business Data Analyst

January 2022 – May 2022

- Engineered a new payment workflow within the **fraud detection system** for new product platform transactions, establishing a scalable framework that enhanced fraud prevention and improved end-to-end cash management processes.
- Developed **Use Cases, UI mockups**, and performed **Impact analysis, Gap analysis, SWOT analysis** using Agile practices; contributed to a 15% improvement in application performance.
- Visualized and mapped out detailed **wireframes** using **Balsamiq**, translating business requirements into user-friendly application designs.

- Conducted **volumetric analysis and root cause investigations** to identify fraud detection gaps, implementing Excel-based automation (**VLOOKUP, Index/Match, PivotTables, Macros**) to reduce false positives by 15%.
- Designed and maintained **Key Performance Indicator (KPI)** dashboards in **Power BI** to monitor transaction and alert disposition status, identifying operational bottlenecks and enabling a 15% reduction in alert processing time by implementing changes in business procedure.
- Validated **120+ test scenarios** as part of the product enhancement roadmap by creating detailed test scripts linked to **JIRA tickets** including **test evidence** for regular **business reviews**, supporting **QA/UAT** cycles, and ensuring requirements traceability (RTM) across systems.

| Birlasoft, Mumbai   Business Analyst                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | November 2018 – December 2020 |

## SKILLS

### Methodologies & Frameworks:

SDLC, Agile (Scrum & Kanban), Waterfall, Business Process Reengineering & Improvement (BPR/BPI), Requirements Elicitation, User Story Writing, Use Case Development, Business Case & Objectives, Project Scope Definition, Prototyping, Documentation, Compliance Testing, Control Standards

### Project Management & Execution:

End-to-End Project Management, Cross-Functional Team Collaboration, Vendor Management, Change Management, Issue Resolution, Prioritization, Resource Allocation, Risk Mitigation, Release Planning, Project Charters, Roadmap Definition, Business Strategy Alignment, Process Optimization, Business Process Mapping (BPM), Technology Management, Product Management, Stakeholder Communication & Support

### Agile & Product Development:

Sprint Planning & Execution, Backlog Grooming, UAT (User Acceptance Testing), Test-and-Learn Initiatives, Epics & User Story Validation, Product Roadmap Management, Kanban Boards, Agile Team Collaboration

### Data Analysis & Reporting:

Data Analytics, Data Visualization (Tableau, Power BI, Excel), Data Reconciliation, Root Cause Analysis, Data Mapping, Key Data Elements (KDE) Monitoring, Key Risk Indicators (KRI) Reporting, Cost-benefit Analysis, Business Case Development, Data-Driven Decision Making, Data Processing, Data Aggregation, Data Extraction

### Financial Concepts & Markets:

Capital Markets, Fixed Income, Equity, Securities, Derivatives, Financial Compliance, Trade Lifecycle, Financial Crime Compliance, Nostro Reconciliation, Fraud Detection, Payment Processing, SWIFT Network, Wire Transfers, FINRA Compliance, Risk Assessment

### Tools & Technologies:

Jira, Confluence, Azure DevOps, MS Project, Smartsheet, Lucid chart, Visio, Balsamiq, TOAD, ServiceNow, CRM, SQL (Oracle, MySQL, SQL Developer), Jira Query Language (JQL), Excel Macros, Microsoft Office Suite (PowerPoint, Word, MS Project, MS Access, Outlook).

### Soft Skills & Interpersonal:

Strong Verbal & Written Communication, Leadership, Team Management, Stakeholder Engagement, Critical Thinking, Problem Solving, Decision Making, Attention to Detail, Time Management, Organization & Prioritization
