PH: 3145371026

.NET Full Stack Developer

Summary:

- ♦ Software Engineer with **9+ years** of extensive experience in Analysis, Design, Development, Testing and Implementation of **client/server, web based** and **n-tier** business/commercial applications.
- ♦ Solid understanding of Object-Oriented Analysis and Design (**OOAD**), **UML** and **RDBMS** concepts. Experienced in all phases of software development life cycle (**SDLC**).
- ♦ Experienced in working with Iterative **Agile Programming Methodologies, Waterfall methodologies, Scrum and Test-driven development (TDD) Domain-driven design (DDD)**.
- ♦ Successfully implemented various multi-tiered .NET applications using **C#, .NET Core, Json.NET, ASP.NET MVC, Dapper, ADO.NET, IIS, PostgreSQL, SQL Server 2019/2017, DB2 7.0, ADO.NET Entity Framework 6.0, Oracle, SSIS, SSRS and SSAS**.
- ♦ Leveraged advanced **C# 10.0** features (**global using directives, record structs, constant interpolated strings**) for improved code maintainability, implemented **multithreading** with **Task, Parallel.ForEach, and async/await** to boost performance, and utilized **collections** like **List<T>, Dictionary<TKey, TValue>, and LINQ** for efficient data processing.
- ♦ Experienced in applying **OOP principles** and **design patterns**—including **Abstract Factory, Singleton, Object Pool, Dependency Injection, MVVM, and MVC**—in .NET, and skilled in creating **design diagrams (use case, class, sequence, component)** to model system architecture.
- ♦ Proficient in architecting applications with a range of architectural patterns, including **N-tier, MVC, Onion architecture, and Microservices**. Successfully deployed Microservices-based solutions using **Docker containers**.
- ♦ Skilled in leveraging frameworks such as **ASP.NET Core Web App, ASP.NET Core Web API, ASP.NET MVC, and REST APIs** to build scalable and maintainable software with a **Microservices architecture**.
- ♦ Well-versed in implementing robust solutions using **Web Services, WCF, REST, SOAP, and NHibernate**.
- ♦ Proficient in using **ORM frameworks** including **ADO.NET, Entity Framework 6.0, and Entity Framework Core**.
- ♦ Proficient in using data formats such as **JSON** for **lightweight data exchange and APIs**, and **XML** for **complex document-oriented applications**.
- ♦ Experienced in leveraging **Azure Cloud services**, particularly **Azure API Management and API Gateway**, to secure and manage APIs. Proficient in implementing **OAuth2 authentication, SSL encryption, and JWT validation for robust API security**.
- ♦ Proficient in front-end technologies including **React.js (with Hooks, Context API, Redux), Angular (10+ with TypeScript), AngularJS, NodeJS, HTML5, CSS3, JavaScript, Bootstrap, jQuery, and Ajax** for building dynamic, responsive web applications.
- ♦ Experienced with **SQL databases (SQL Server, PostgreSQL), NoSQL (MongoDB), and graph databases (Stardog)**, and skilled in building **ETL solutions** for data warehousing using **SQL Server Integration Services (SSIS)**.
- ♦ Proficient in developing **PL/SQL** stored procedures, functions, and triggers, and in creating various reports (**Tabular, Matrix, Drill Down, and Drill Through**) with **SQL Server Reporting Services (SSRS)**.
- ♦ Experienced in implementing message-based communication using message queues such as **RabbitMQ and MSMQ** to enable reliable and scalable asynchronous processing in distributed systems.
- ♦ Experienced in **unit testing** business logic with **MS Test and XUnit frameworks**, and proficient in using front-end testing tools such as **Karma, Jasmine, Jest, Mocha, and Chai** to ensure robust functionality.
- ♦ Skilled in automating web services testing using tools like **Cucumber and Citrus** to validate API functionality and ensure seamless integration across microservices.
- ♦ Hands-on experience with API testing tools such as **Postman, SOAP UI, and Swagger UI**.
- ♦ Experienced in setting up and managing **CI/CD pipelines** using **Azure DevOps, automating build, test, and deployment** processes across multiple environments to ensure rapid and reliable software delivery.
- ♦ Proficient in developing and deploying **cloud-based applications** using **Microsoft Azure and AWS** services, including **Azure App Services, Azure Functions, AWS Lambda, and S3**. Skilled in leveraging **cloud-native tools** for scalability, performance optimization, and cost management.
- ♦ Experience in using **Source Code Control Systems** like **Team Foundation Server (TFS), Visual Studio Team Services (VSTS), Azure DevOps Server (ADS), SVN and Git**.
- ♦ Proficient in using build tools such as **Visual Studio, Visual Studio Code, and SQL Server Management Studio** for developing, debugging, and deploying applications.
- ♦ Expertise in **logging tools** such as **Log4Net, NLog, Serilog, and ELMAH**, ensuring effective

Technical Skills:

Programming Languages	C++, C# 8.0/7.0/6.0/5.0, VB.NET, T-SQL, PL/SQL, COBAL
Microsoft Technologies	.Net Core 3.0/2.0, .NET Framework 4.X, ASP.NET Core, Web API, Dapper, Silverlight, ASP.Net MVC Ajax 3.0, Win Forms, WPF, WCF, Web Services, ADO.NET
Web Technologies	HTML5/4, CSS3, JavaScript, Typescript 3.0, JQuery, Angular 13.0
Xml Technologies	XAML, XML, XDOCUMENT, XSLT, XPATH, XSL
IDE Tools	VS 2022/2019/2017/2015/2013, VS Code SQL Server Management Studio
ETL Tools	SQL Server Integration services (SSIS 2016), Data Transformation Services (DTS)
Databases	MS SQL SERVER 2019/2017/2016, Oracle 12c/11g/10g/9i, SQL MS Access
ORM	Entity Framework, Dapper, NHibernate
Servers	Windows Server 2016/NT, Microsoft IIS (10.0/8.5/8.0/7.5, 7.0)
Version Control Tools	Azure DevOps Server, Team Foundation Server

Professional Experience:

Merck, New Jersey.
Full Stack .NET Developer

April 2022 – Present

Responsibilities:

- ♦ Implemented **Agile** methodologies for software development, utilizing daily scrums and continuous integration to deliver high-quality software rapidly.
- ♦ Designed and extended a custom domain-driven **Microservices** architecture built on top of **ASP.NET Core Web API** and **HTTP** protocol using **Domain-Driven Design (DDD)** concepts to support complex pharmaceutical workflows.
- ♦ Developed **RESTful APIs** using **ASP.NET Core Web API** with **JSON** for efficient data exchange, and integrated **Azure API Gateway** for secure microservices communication.
- ♦ Configured **Entity Framework Core** with **CQRS** pattern and implemented **Mediator Pattern** for business logic handling.
- ♦ Implemented **MVC architecture** with **ASP.NET Core Razor Views**, **Dependency Injection (DI)**, and **EF Core** according to UI layouts and business requirements.
- ♦ Created different **WEB API** endpoints for UI interaction and applied validations across handler layers.
- ♦ Migrated codebase to **.NET Core 3.0** and assisted in establishing **CI/CD pipelines** using **Azure DevOps**.
- ♦ Implemented asynchronous update-able **ASP.NET Core View Components** and integrated **jQuery Unobtrusive Ajax**.
- ♦ Implemented **OAuth 2.0** for Single Sign-On across multiple projects using **Identity Server**.
- ♦ Created **Angular 10** components and shared utilities, utilizing **HTML**, **CSS**, **JavaScript**, **Bootstrap**, and **TypeScript** for front-end development, including **Angular Material** styling and lifecycle hooks.
- ♦ Developed **Angular libraries** with reusable form controls and components and created a library of customized grid functionalities.
- ♦ Implemented and executed **Angular Unit tests** using **Karma** automated test tool and **Jasmine Framework**. Implemented testing with **XUnit** and component tests for .NET and utilized **Cucumber** for BDD in web services automation.
- ♦ Leveraged **Apache Kafka** to build scalable, fault-tolerant message queues.
- ♦ Employed **Protractor** for **Angular** end-to-end testing, used **Postman** for API testing, and **Swagger UI** for API documentation.
- ♦ Deployed and managed infrastructure on **Azure** (App Service, SQL Database, and Storage) for high availability and Utilized **Git** for version control throughout the development process.

Environment: .NET Core 3, .NET Framework 4.6, C#, Angular 13, ASP.NET Web API, Mediatr, Microservices, HTML5, CSS3, AJAX, LINQ, JavaScript, Typescript, Knockout JS, Node JS, XML, IIS 10, Oracle 12c, RabbitMQ, Angular Material, Log4Net, Identity Server, Git, Dapper ORM, Docker, Azure DevOps, Visual Studio 2022, VS Code.

Responsibilities:

- ♦ Worked on **Agile SCRUM methodology** to achieve smooth collaboration between self-organizing cross-functional teams, actively participating in daily stand-up meetings, go-no-go meetings, and bi-weekly sprint meetings.
- ♦ Adopted **Onion Architecture** for modularity and maintainability, ensuring a clean separation of concerns and dependency inversion.
- ♦ Involved extensively in developing components for Business and Data tier using **C#.NET** and created controllers/View Models to handle events raised on **Razor Views/Partial Views** in **ASP.NET MVC framework**.
- ♦ Created **RESTful services** using **ASP.NET Core Web API**, built HTTP services, and formatted responses using web API media type formatter to **JSON**.
- ♦ Created and deployed **Web Services** using **ASP.NET MVC** and **C#.NET**, generating proxy class files based on the web services for consumption in web applications.
- ♦ Modernized data access by updating to **Entity Framework Core**, extensively utilizing it for data retrieval, querying, storage, and manipulation using **LINQ**.
- ♦ Ensured efficient data exchange by formatting responses to **JSON** using web API media type formatter.
- ♦ Integrated **Azure API Gateway** for secure communication with microservices and implemented **OAuth 2.0** authentication for enhanced security.
- ♦ Migrated application from an older JavaScript framework to **React**, improving SPA capabilities with performance and modularity, and extensively used **HTML, CSS, JavaScript**, and **Bootstrap 3.0** for a responsive UI design.
- ♦ Developed user controls using code-behind classes integrated with **AJAX-enabled Infragistics .Net** Advantage controls like the Ultra Web Tree for extended functionality and rich presentation layers.
- ♦ Created stored procedures, functions, and triggers using **PostgreSQL database** to insert, update, and delete data inside tables.
- ♦ Leveraged **RabbitMQ** for scalable messaging between distributed systems.
- ♦ Transitioned testing frameworks from NUnit to **XUnit**, ensuring robust unit testing for .NET applications.
- ♦ Implemented **React unit tests** using **Jest** and **React Testing Library**, ensuring high-quality front-end functionality.
- ♦ Utilized **Postman, Swagger UI**, and other tools for API testing and documentation.
- ♦ Implemented **CI/CD pipelines** via **Azure DevOps**, automating build, test, and deployment processes for enhanced efficiency.
- ♦ Deployed applications on **Azure Cloud**, leveraging services like App Service and PostgreSQL Database for high availability and scalability.
- ♦ Utilized **Git** for version control throughout the development process.
- ♦ Leveraged **Visual Studio** and **Visual Studio Code** as primary development tools.

Environment: Visual Studio 2015, .NET Framework 4.6.1, C#, ASP.NET MVC 5.0, Web API, HTML5, CSS3, AJAX, LINQ, JavaScript, Angular 2.0, XML, IIS 8.0, JQuery, SQL Server 2014, DB2, Infragistics 15.1, TFS.

Responsibilities:

- ♦ Involved in the complete **Software Development Life Cycle** including Analysis, Design, Implementation, Testing and Maintenance, using **Agile** methodology with daily scrums and continuous integration to deliver high-quality software rapidly.
- ♦ Utilized **MVC architecture** in developing the application, ensuring separation of concerns and maintainable code structure.
- ♦ Developed the project using **ASP.NET MVC 5.0**, implementing model-view-controller architecture with **Razor views** and **dependency injection**.
- ♦ Deployed and managed application services on **AWS** using **EC2** for hosting, **RDS** for relational database management, and **S3** for scalable storage.
- ♦ Created & hosted **WCF Services** using different bindings to make them available to various clients.
- ♦ Implemented **AWS API Gateway** and **Lambda** for serverless execution, enabling seamless integration with **microservices** and reducing infrastructure overhead.

- ◆ Designed and implemented the Dunning Letter system using **ASP.NET, Visual Studio 2015, SQL Server 2012, TestDriven.net, Crystal Report 2008, and Telerik Report**.
- ◆ Created **RESTful Web APIs** using **MVC 5.0** along with dependency injection repository patterns using **Microsoft Unity**.
- ◆ Used **Microsoft Entity Framework** Code First approach for the Data Access Layer and **LINQ**-based data access in the ASP.NET MVC application.
- ◆ Implemented **JSON** as the primary data format for efficient data exchange between client and server.
- ◆ Developed front-end UI using **HTML5, DHTML, XSL/XSLT, XHTML, CSS3, JavaScript, jQuery, Bootstrap, AJAX, AngularJS, SASS, LESS, and Kendo UI**.
- ◆ Created **TypeScript** reusable components and services to consume REST APIs using component-based architecture provided by **AngularJS**.
- ◆ Performed **AngularJS** form validation, displaying validation messages with ng-show and creating custom validation directives for comparing fields.
- ◆ Utilized both **SQL Server 2012** for structured data storage and **MongoDB** for handling unstructured data to improve application performance.
- ◆ Assisted in production **OLAP cubes**, wrote queries to produce reports using **SQL Server 2008/2012 Analysis Services (SSAS)** and **Reporting Services (SSRS)**.
- ◆ Used **SSIS** to create ETL packages for validating, extracting, transforming, and loading data to transactions.
- ◆ Implemented unit testing using **N-Unit** frameworks to ensure code quality and reliability.
- ◆ Managed version control using **Team Foundation Server (TFS)** for efficient collaboration and code management.
- ◆ Leveraged **Visual Studio, Visual Studio Code, and SQL Server Management Studio** as primary development and database management tools.
- ◆ Implemented **Log4Net** for comprehensive application logging, enabling better error tracking and system monitoring across the application.
- ◆ Used **TFS** for project management and ticket tracking, facilitating smooth workflow and task allocation.
- ◆ Worked on application software development efforts from deployment through the maintenance support process.

Environment: Visual Studio 2015, Microsoft SQL Server 2012, C#, VB.NET, ASP.NET, MVC 5.0, Web API, jQuery, HTML5, JavaScript, CSS3, WCF, AJAX, Angular JS, Entity Framework, LINQ, VSTO, IIS 7.5, NUnit, TFS.

T Rowe price Owings Mills, MD
.NET Developer

June 2015- August 2016

Responsibilities:

- ◆ Worked with the architects to develop Business logic, processes, classes and sequence diagrams using **Agile** methodology.
- ◆ Used **ASP.NET MVC 4.0** for Presentation layer and **SQL Server 2012** for Data Layer, implementing extensive development using **ASP.Net** and **C# 4.0** with Web Applications and OOPs Concepts.
- ◆ Deployed and managed cloud-based applications on **Microsoft Azure**, utilizing **Azure App Services, Azure SQL Database, and Azure Storage** for scalable and secure application hosting.
- ◆ Worked on **SOAP** Service API using **WCF 4.0**, which returns **XML** and **JSON** data using WCF attributes.
- ◆ Implemented **Entity Framework** with **C#** in **Visual Studio 2013** to establish connections between server-side web application and **SQL Server 2012** database.
- ◆ For front end development, actively used **HTML, CSS, JSP, JavaScript, jQuery, AJAX controls, AngularJS, Kendo UI, and Telerik Controls**.
- ◆ Applied AngularJS client-side validation using **HTML5** attributes and AngularJS form and input state.
- ◆ Used JavaScript functions to enable and disable buttons to prevent missing information for records.
- ◆ Handled **ASP.NET** vulnerabilities like **Cross-site scripting (XSS)** by encoding the input data.
- ◆ Involved in the creation of interface to manage user menu and Bulk update of Attributes using AngularJS and jQuery.
- ◆ Created database tables, schemas, user-defined functions, stored procedures, views, and dynamic SQL queries in **SQL Server 2012**.
- ◆ Implemented Custom mapping for Stored Procedures using **Entity Framework**.
- ◆ Created packages in **SSIS** with error handling and worked with different methods of logging in SSIS.
- ◆ Created custom data flow items for different SSIS packages using the **VB.Net** script.
- ◆ Used SSIS to read flat files, CSV's and Excel files and import to SQL Server 2012.
- ◆ Experienced in creating reports (**SSRS**) in Drill mode using tables, matrix and charts in SQL Server 2012.

- ◆ Performed Unit testing on the AngularJS UI for Performance issues and data integration.
- ◆ Implemented unit testing using **XUnit** framework for .net to ensure code quality and reliability.
- ◆ Worked closely with **QA** for bug fixes to ensure the efficiency and accuracy of the code.
- ◆ Managed version control using **Subversion (SVN)** for efficient collaboration and code management.
- ◆ Implemented **Azure DevOps CI/CD pipelines** for automated build, testing, and deployment, ensuring efficient and reliable software delivery across environments.
- ◆ Utilized **JIRA** for project management, bug tracking, and sprint planning, enhancing team collaboration and project visibility throughout the development lifecycle.

Environment: C# 4.0, ASP.NET MVC 4.0, ADO.NET, Entity Framework, Angular JS, Kendo UI, VB.NET, HTML, JavaScript, WWF, Windows Azure, SSIS, SQL Server 2012, Visual Studio 2013, IIS 7.0, TFS, MS Excel.

IBM, India

July 2014 - May 2015

Application Developer

Responsibilities:

- ◆ Implemented the **Waterfall methodology** for project development, following a sequential approach to software design, development, and testing.
- ◆ Developed the application Framework in **ASP.NET WebForms** primarily using **C#.NET** with the business logic implemented using **.Net Assemblies**.
- ◆ Written the business logic in classes using **C#.Net** language and used in **Web Forms**.
- ◆ Created and maintained the framework and layout of each portal with **CSS**.
- ◆ Utilized **C# Generics, Collections, Delegates, Events, Extension methods, Anonymous types, and Lambda Expressions**.
- ◆ Developed and consumed **RESTful Web Services** and **ASP.NET Web API** for inter-system communication.
- ◆ Worked with **Web APIs** to make calls to web services using URLs, performing GET, PUT, POST and DELETE operations on the server.
- ◆ Employed **ADO.NET** for data access and manipulation, leveraging their powerful features for database operations.
- ◆ Prioritized **XML** as the primary data format for data exchange and configuration.
- ◆ Developed dynamic **ASPX** web pages for Application using **ASP.NET WebForms, C#.NET, XML, XSL/XSLT, HTML, JavaScript, JQuery and Ajax**.
- ◆ Migrated the database from **Oracle** to **SQL Server 2012**, optimizing queries and stored procedures for improved performance.
- ◆ Generated server-side **T-SQL** scripts for data manipulation, validation and materialized views for remote instances.
- ◆ Developed **T-SQL** triggers on master tables for automatic creation of primary key values.
- ◆ Created data extraction process and performed required business transformation using **T-SQL**.
- ◆ Performed unit testing using **XUnit** framework according to the business requirements.
- ◆ Used **Subversion (SVN)** for source code control, project related document sharing and team collaboration.
- ◆ Worked with **ASP.NET MVC 4.0** to improve application load times and processing efficiency.
- ◆ Developed **Angular/.NET** web application using **Angular JS, JavaScript, ASP.NET MVC 4.0, C#, Visual Studio 2010**.
- ◆ Designed, documented **REST/HTTP APIs**, including **JSON** data formats and API versioning strategy.
- ◆ Developed **RESTful services** using **WCF** framework and used **Angular JS** for getting data.
- ◆ Created Stored Procedures, Functions, and Triggers using **T-SQL** to insert, update, and delete data inside tables.

Environment: Visual Studio 2010, .NET Framework 4.0, C#.NET, ASP.NET, ADO.NET, WCF, Oracle 10g, PL/SQL, HTML, CSS, JavaScript, Angular JS, AJAX, XML, MVC 4.0, IIS 7.0, JQuery, TFS.

Education:

ICFAI University Hyderabad, India.
Bachelor of Business Administration

June 2011 – May 2014
