SKILLS

JavaScript, TypeScript, React, React Native, Redux, Node, Express, Python, Django, CSS, GraphQL, SQL, SQLite

EXPERIENCE

Software Engineer

Springfield, MO

Digital Monitoring Products/SecureCom Wireless

August 2021 - Present

- Learned React Native, GraphQL, Relay, and TypeScript while also learning an incredibly complex security system
- Maintained and implemented new features on multiple products that synchronized the DMP security system network
- Work included a mix of new and legacy codebases with an ongoing migration of Redux to Relay/GraphQL for state management
- Regular use of React/React Native with Relay, Redux, and Context for front end and GraphQL on the back end with TypeScript on both sides
- Products ranged from various dealer network solutions as well as customer facing applications for commercial and residential users

Projects

Citrics – Web Developer

<https://citrics.vercel.app/>

For the young professionals who are looking to relocate. Citrics is an app that helps you relocate based on your requirements, and lets you view and compare city data.

React | Redux | Node | Express | Postgres

- As web developer collaborated with 8 developers 6 week build
- Poured through and learned from a dense codebase that had been through two iterations
- Converted legacy code from Context to Redux for better efficiency and readability
- Created a reverse user flow quiz that users can take to be given recommendations
- Redesigned the landing page and map view page to be able to get users important information 40% faster

Songify – Front End Developer

<https://songify.now.sh/>

For music lovers who want to discover and find new music. Simply input your song of choice and find suggestions based on the Spotify API.

React | Redux | Node | Express | SQLite

- As front end developer collaborated with 4 developers on 4 day build
- Solely built the app's front end from scratch while working with back end and data science developers
- Implemented Redux for state management
- Designed the web site and implemented the Material UI framework
