

DUANE DAMON

817.992.5442 | Arlington, TX | DDAMON4@GMAIL.COM | [LINKEDIN.COM](https://www.linkedin.com/in/ddamon4)

Summary

Senior .NET MVC Developer with 15+ years of experience in building enterprise-grade web applications. Expertise in .NET MVC, SQL integration, and delivering scalable, secure solutions. Skilled in API development, front-end integration, and mentoring teams for efficient project delivery.

Technical Skills

Category	Technologies & Tools
Languages & Frameworks	.NET (C#, .NET Framework, .NET Core, .NET MVC), JavaScript, AJAX, JQuery, Blazor/MAUI
Frontend Technologies	HTML, CSS, Bootstrap, Responsive Design
API Integration:	RESTful APIs, Third-Party API Integration, SAOP, Webservices
Database Integration:	SQL Server: Database Design, Query Development, Stored Procedures, Real-time Data Sync
Other Tools	Azure, Visual Studio, Postman, SQL Server Management Studio, TFS, Git

Professional Experience

Senior .NET MVC Developer

Texas Health Resources | Oct 1997 – Feb 2025 | Arlington, TX

- Designed and developed C# .NET MVC applications with SQL Server integration for business-critical processes.
- Built a tuition reimbursement system with .NET and SQL Server for secure, efficient data handling. This used Bootstrap and JQuery for a responsive mobile UI.
- Developed a cost-saving BOT system using JavaScript, C# .NET MVC, and SQL Server to reduce Azure fees. This utilized Azure DevOps and automated pipelines for deployment.
- Designed and built an employee review system for over 28k employees using C# .NET, Bootstrap, JQuery, SQL Server. Allowed for multiple steps between manager and employee and final storage of official review document.
- Maintained a Physician Gift application written in C# Windows Forms.
- Wrote a data reporting app with frontend using Ajax to access APIs for data from SQL Server. It used Bootstrap and CSS for frontend design.
- Enhanced and maintained a systemwide error reporting tool in classic ASP and C# Windows Forms.
- Created reusable C# .NET MVC components with reliable SQL Server database integration.
- Wrote stored procedures and queries to handle large datasets, ensuring scalability and high performance.
- Created responsive frontend interfaces to SQL-backed data models for real-time functionality.
- Mentored developers on .NET MVC, API integration, SQL interaction, and best development practices.
- Built custom pages and applications to interact with SharePoint lists and sites for efficient data management.

Software Developer

Metasolv Software | April 1997 – Oct 1997

- Built and maintained PowerBuilder client-server applications for telecom provisioning systems.
- Designed and implemented efficient database queries and scripts for seamless integration with backend systems.
- Collaborated with clients to identify and resolve software issues, improving application performance.

Software Developer

Kaiser Permanente | 1995 – 1997

- Developed PowerBuilder systems for patient records and reporting with secure, reliable data management.
- Created custom reports by writing SQL scripts and integrating them into PowerBuilder applications.
- Collaborated with healthcare teams to enhance application usability and streamline reporting workflows.

Education

Tarrant County College (TCC) - Tarrant County, TX

Completed coursework in Computer Science, including C, C++, and Database Design
