

Dagmawi Getachew

(832) 441-7864 | Houston, TX | dagi.bek@outlook.com

PROFESSIONAL SUMMARY

SQL Server Database Administrator (DBA) with over 7 years of hands-on experience managing, optimizing, and securing enterprise databases across SQL Server 2012–2022 and Azure SQL environments. Expertise in installation, configuration, migration, performance tuning, backup/recovery, disaster recovery, and high availability (HA/DR) solutions. Adept in improving database performance, automating maintenance and reducing downtime using tools such as PowerShell, SSIS, SSRS, and Azure Monitor. Skilled in query optimization, indexing strategies, security management, TDE encryption, and replication technologies.

TECHNICAL EXPERTISE

- **Databases:** SQL Server 2012, 2014, 2016, 2019, 2022, Azure SQL Database, PostgreSQL, MySQL, Oracle Database
- **Operating Systems:** Windows Server, Linux
- **High Availability & Disaster Recovery:** Always On Availability Groups (AG), Failover Clustering, Log Shipping, Database Mirroring, Replication, Backup/Restore, Disaster Recovery Planning, Azure Site Recovery
- **Performance Tuning & Optimization:** Query Optimization, Index Tuning, Execution Plans, DMVs, SQL Profiler, Extended Events, Deadlock & Lock Analysis
- **Scripting & Automation:** T-SQL, PowerShell, Python, Bash Shell, SQLCMD, Terraform, Ansible, Jenkins, GitHub Actions, CI/CD Pipelines,
- **Security & Compliance:** SQL Server Authentication & Authorization, Role-Based Access Control, Object-Level Permissions, Transparent Data Encryption (TDE)
- **Migration & Maintenance:** On-Premises to Azure SQL Migration, Patch Management, Upgrades, Database Maintenance Plans, Oracle GoldenGate
- **Monitoring & Alerting:** Redgate SQL Monitor, SQL Server Management Studio, Activity Monitor, Azure Monitor, Prometheus and Grafana
- **Business Intelligence Tools:** SQL Server Integration Services (SSIS), SQL Server Reporting Services (SSRS), Microsoft Visual Studio, Power BI, Tableau

WORK EXPERIENCE

Citibank | Tempa, FL

SQL Server DBA

November 2023 – Present

- Managed over 150 SQL Server instances across production and test environments, ensuring 99.9% uptime and optimal performance.
- Executed database migrations and upgrades from SQL Server 2016 to 2022, reducing downtime by 30% through efficient planning and testing.
- Optimized critical stored procedures and queries, achieving faster transaction response times.
- Configured and maintained Always On Availability Groups, log shipping, and replication, improving disaster recovery readiness.
- Automated backup and restore operations with PowerShell and SQL Agent jobs, cutting manual workload by 40%.
- Implemented security measures including role-based access control and TDE encryption, enhancing compliance with internal audit standards.
- Conducted performance tuning using Profiler, Extended Events, and Database Tuning Advisor, reducing blocking and deadlocks.
- Created and maintained maintenance plans for database integrity checks, reindexing, and statistics updates to ensure system reliability.
- Collaborated with development teams to design scalable database structures supporting mission-critical applications.

TransCore | Houston, TX

MS SQL Server DBA

May 2020 – November 2023

- Installed, configured, and administered SQL Server environments (2012–2019), managing 100+ databases across production and QA.
- Designed and implemented automated maintenance plans, resulting in improvement in database performance.
- Developed and optimized T-SQL stored procedures, triggers, and functions, improving query execution times by up to 25%.
- Led on-premises to Azure SQL migration, improving scalability and reducing infrastructure costs.

- Implemented log shipping and mirroring for data redundancy and ensured zero data loss RPO in DR scenarios.
- Used SSIS packages to extract, transform, and load (ETL) large data sets, improving data integration efficiency.
- Conducted root cause analysis of performance bottlenecks using DMVs and query plans, improving throughput.
- Partnered with developers to design normalized and partitioned databases supporting high-volume transactional systems.
- Monitored system performance using Redgate SQL Monitor and Azure Monitor, proactively identifying potential outages.

ExxonMobil | Houston, TX

Junior Database Administrator

February 2019 – May 2020

- Supported installation, upgrade, and migration of SQL Server databases in production and development environments.
- Automated daily backups and point-in-time restores, achieving 100% recovery success rate during audits.
- Troubleshoot database connectivity, HA/DR issues, and performance problems, reducing incident resolution time.
- Assisted in Always On Availability Group implementation, ensuring high availability across critical systems.
- Migrated databases from on-premises to Azure SQL, enabling improved scalability and cost efficiency.
- Implemented Transparent Data Encryption (TDE) to secure sensitive data and meet corporate security standards.
- Conducted capacity planning and health checks, identifying and resolving performance bottlenecks proactively.
- Tuned long-running queries and optimized indexes, improving database response time.
- Supported developers with schema design, normalization, and performance tuning for critical applications.

EDUCATION

- Bachelor of Science in Computer Science
