PROFILE

Experienced Agile Project Manager with a proven track record of driving successful project execution in dynamic corporate environments. Strong expertise in Scrum methodology and a deep understanding of the financial industry. Adept at collaborating with stakeholders to define project goals, ensuring alignment with organizational objectives. Skilled in implementing quality control measures to elevate project deliverables, while optimizing processes for efficiency gains. Proficient in guiding teams through the Agile framework, fostering a self-managed environment and achieving remarkable improvements in sprint velocity. Accomplished in translating business requirements into actionable project plans, fostering innovation, and enhancing operational efficiency. Leveraging data analytics to extract insights, leading to informed decision-making.

EMPLOYMENT HISTORY

Scrum Master at Citi, Houston, TX

January 2021 — Present

Play a pivotal role in ensuring the successful execution of projects and initiatives that contribute to Citi's core activities, which include safeguarding assets, lending money, making payments, and accessing capital markets.

- Engage with key stakeholders to define project goals and expectations, maintaining open communication throughout the project lifecycle to ensure alignment and satisfaction.
- Implement rigorous quality control measures, ensuring project deliverables meet Citi's high standards and align with its mission, targeting zero critical defects post-release.
- Evaluate project outcomes to identify continuous improvement opportunities, aiming to increase process efficiency by at least 15% annually.
- Prepare and deliver accurate and timely project status reports, documenting key achievements, challenges, and learnings, with a target of 100% on-time reporting compliance.
- Quickly address and resolve issues or roadblocks, aiming to reduce their impact on project timelines by at least 20% to prevent delays.
- Regularly review project progress against milestones, adjusting plans as needed to achieve at least 90% of milestones on time.
- Develop comprehensive project plans detailing objectives, scope, timelines, and resource requirements, ensuring planning phases are completed before sprint launches.
- Allocate resources efficiently, ensuring teams have the necessary tools, skills, and support to execute projects successfully, while maintaining optimal utilization rates.
- Maintain accurate project documentation, including user stories, backlog items, and progress reports, to ensure transparency and alignment among team members and stakeholders.

Key Accomplishments:

- *Successfully led a project to revamp Citi's mobile banking app, resulting in a 20% increase in user engagement and a 15% rise in customer satisfaction scores. This initiative streamlined account management, bill payment, and fund transfers, aligning with Citi's commitment to delivering cutting-edge digital solutions.*
- *Led a Scrum team that achieved a 20% increase in sprint velocity over three consecutive sprints, resulting in faster delivery of features and improved time-to-market for a critical mobile banking app update.*

Scrum Master at Comcast, Houston, TX

June 2018 — December 2020

Assignment: Led the development of a comprehensive patient support and engagement program, bringing together multidisciplinary teams from healthcare, customer care, and operations to improve patient experiences and streamline service delivery. The program aimed to enhance communication, simplify processes, and increase patient satisfaction across various touchpoints.

- Resolved conflicts between business and healthcare teams, fostering a collaborative environment that prioritized patient outcomes and operational goals.
- Ensured transparency and alignment by keeping all teams, including clinical services, customer support, and operations, updated on project progress and objectives.
- Guided teams to identify inefficiencies in patient interactions and implemented changes to improve communication and responsiveness.
- Protected teams from external distractions, allowing them to focus on enhancing patient care and addressing operational challenges.
- Monitored key performance metrics related to patient satisfaction and service delivery, using data to drive decisions and refine processes.
- Facilitated collaboration between business, clinical, and customer service teams to ensure seamless execution of project goals and resolve issues promptly.
- Provided training and support to improve teamwork and ensure best practices were followed across all departments.
- Organized regular meetings, such as stakeholder updates and team reviews, to track progress and encourage continuous improvement.

Key Accomplishments:

- Shifted team ownership of patient interaction tasks, leading to a 25% increase in self-directed problem-solving and customer care initiatives.
- Spearheaded a patient engagement initiative that improved satisfaction by 30%, while reducing complaints related to service delays by 20%.

Scrum Master / Business Analyst at Macquarie Group, Houston, TX

May 2016 — May 2018

Played a critical role in driving the organization's strategic initiatives, optimized processes, and enhanced operational efficiency across various areas and programs within the company.

- Collaborated with stakeholders to gather and analyze business requirements, translating them into detailed project plans and deliverables.
- Designed innovative solutions to address business challenges, leveraged technology and process improvements to achieve desired outcomes.
- Identified potential risks and challenges associated with projects and initiatives. Developed risk mitigation strategies to ensure project success.
- Created comprehensive documentation, including project plans, business requirements, user stories, and process maps.
- Identified opportunities for ongoing process improvements and operational excellence. Implements best practices to drive efficiency and effectiveness.
- Utilized data analytics to extract meaningful insights, provided actionable recommendations that supported informed decision-making.
- Oversaw end-to-end project lifecycles, including planning, execution, monitoring, and reporting.
- Guided teams through organizational changes by developing change management strategies, training materials, and communication plans.

Key Accomplishments:

- Led a cross-functional team in the development and implementation of a customer-facing mobile app, resulting in a 25% increase in customer engagement and a 15% reduction in service response times.

- Successfully implemented an automated risk assessment framework, reducing the time required for risk evaluation by 30%. This enhancement led to more accurate risk identification and improved decision-making.

Project Manager at Accolade, Houston, TX

July 2010 — April 2016

Assignment: Led the enterprise patching project, enhancing Accolade's IT security infrastructure while aligning with the company's mission to deliver personalized healthcare. This initiative improved system security by 25% and supported clinical operations by ensuring a secure and reliable technology environment for care delivery.

- Led the planning and execution of various infrastructure and networking projects, ensuring alignment with Accolade's personalized healthcare mission.
- Managed the enterprise patching project, coordinating with cross-functional teams to ensure timely and secure deployment.
- Collaborated with IT PMO, infrastructure, and IT security teams to address security vulnerabilities and ensure system integrity.
- Implemented project management best practices, optimizing processes for efficiency and accountability across multiple teams.
- Monitored project milestones and deliverables, adjusting timelines and resources as needed to maintain project scope.
- Led risk assessments and mitigation strategies for IT infrastructure projects to minimize operational disruptions.

Key Accomplishments:

1. Improved project delivery timelines by 15% through the implementation of Agile project management methodologies, leading to enhanced operational efficiency.
2. Spearheaded an initiative that integrated healthcare IT security protocols, ensuring compliance with HIPAA regulations and reducing audit findings by 30%.
3. Developed and launched a new network infrastructure strategy that resulted in a 20% reduction in IT operational costs while improving system performance.
