

Dave Eichner

Windows System Administrator | VMware Administrator

(678) 577-6033 | DavidCEichner@gmail.com | Cartersville, GA | www.linkedin.com/in/david-eichner

SUMMARY

Highly skilled Windows Server and VMware Administrator with over 17 years of experience in system design and administration. Expertise in supporting largescale environments with over 10,000+ servers and managing critical incidents efficiently. Proven ability to maintain, patch, and troubleshoot Windows servers and VMware systems, ensuring optimal performance and availability. I am committed to leveraging my technical knowledge to enhance operational efficiency and deliver high-quality results for your organization.

WORK EXPERIENCE

T-Mobile/Sprint (Nov 2006 – Nov 2023 +bridged Nextel time)

Seattle WA/Lees Summit MO

Developed and implemented advanced Windows Server environments in collaboration with Project Managers and Application Developers to ensure operational continuity and alignment with evolving business requirements.

Oversaw the daily generation of backup reports and proactively addressed client failures, ensuring that incremental backups were executed nightly to facilitate effective disaster recovery efforts as necessary.

Managed ticket priorities ranging from levels 4 to 1 on a daily basis, collaborating with application owners and vendors to consistently meet or exceed Service Level Agreement (SLA) timelines.

Upgraded Windows Server versions as part of various ongoing projects to ensure the organization remained current and secure.

Conducted monthly patching of the entire Windows environment, encompassing over 3,000 servers, in adherence to Microsoft's best practices, thereby enhancing the stability and security of the organization.

Assumed additional VMware responsibilities to broaden my expertise and provide support not only to the Windows team but also to the VMware team.

During a critical period when the implementation of a third shift was essential yet met with resistance, I proactively volunteered for the position, successfully managing overnight shifts for both the Windows and VMware teams. In addition to my shift responsibilities, I addressed high-priority tickets for both teams and managed after-hours changes while minimizing any planned or unplanned outages.

Successfully maintained third shift roles for both the Windows and VMware teams for over a decade, acquiring invaluable hands-on experience with new applications and environments that would not have been accessible had I remained on the day shift.

Transitioned from the Windows team to the Implementation team, where I provided dedicated support to the Windows and VMware teams during the third shift. I was recognized as the primary member of this team responsible for supporting both teams.

NEXTEL (JAN 2000 – SEPT 2005)

Norcross GA

Nextel was purchased by Sprint in August of 2005. I held two positions there. The first was Desktop support and then I was merged into Windows System Administration in 2003. We were outsourced to EDS in 2002.

Desktop Support

General desktop support duties building, patching, and servicing 400+ desktops at the Brookhollow location

Window System Administrator

Mainly building out HP Windows server hardware and building out Window server OS.

CERTIFICATIONS

A+, MCP, NT Server, NT Workstation, NT Server in the Enterprise, Networking Essentials, TCP/IP

EDUCATION

United States Navy

Sonar A school, Basic electronics and electricity, Sonar C school for the GE AN-SQS-26 and 53b-CX

MILITARY SERVICE

1988-1994 (1995-1996 Ready Reserve)

USS Reasoner | USS Kinkaid | DESRON (Destroyer Squadron) 13

2001-2007 (Reserve)

Naval Special Warfare Unit 10, Rota, Spain – Supported Teams 2, 4 and 8 via Group 2 in Little Creek, VA

Naval Security, NAS Sigonella, Sicily – Base security including Airstrips and outer perimeter.

I received the Naval Achievement Medal and a Good Conduct ribbon x2 along with 16 other Ribbons and Medals for completion of tours of duty in the 1990 Gulf War (Operation Desert Shield), and the 2003 Gulf War (Operation Enduring Freedom).

SKILL SET

VMware Infrastructure	Decommissioning	Ribs	Storage Area Network (SAN)
Ticketing Systems	Vantive	Server Migration	Project Management
Active Directory	System Administration	Backup Exec	Domain Name System (DNS)
Fibre	SFP	VMware	Systems Engineering Process
TCP/IP	Data Migration	Servers	Mops
Virtualization	HBA	Computer Hardware	Servers
Server Operating Systems	VMware vSphere	VLAN	Pier 1 Ticketing System
Vendor Relations	Networking	Enterprise Software	RDP Remote Desktop
Storage	Remote Device Management	LAN-WAN	Patch Management
Change Management	HP System Administrator	Windows Server	Firmware
Data Center Virtualization	Cluster Management	DNS Server	RIBs
Flow Charts	Some Powershell	Microsoft Office	HP Products
Hard bus adapter	VMware Server	McAfee Antivirus	Reports
SQL Server management	Windows OS	Symantec	IIS
