

## DHIRENDRA SEJPAL

## SAP BASIS SPECIALIST

### EXECUTIVE SUMMARY

Experienced technical leader with 21+ years in IT, specializing in SAP and managing large-scale enterprise projects. Proven track record in driving digital transformation and system modernization. Skilled at optimizing technology solutions for efficiency and cost-effectiveness.

### SYNOPSIS

#### Professional Summary:

- Over 21+ years of strong technical experience in the IT field including 18+ yrs of experience in Administration & Management of SAP BASIS/NetWeaver landscape in diverse environments including on-prem as well as cloud (AWS and GCP).
- Manager of BASIS and security administration with emphasis on design and architecture of SAP BASIS and technical standards.
- Performed routine SAP system administration duties including installations, security, patches and upgrades for multiple test, production and development systems.
- Experienced in system architecture review, system builds, performing post installation activities, systems validation, configuration, go-live and post go-live support.
- Experienced in installation, configuration and support of third-party tools, such as Hayes gold client, Symmetry Control Panel, BSI tax factory, ONESOURCE global next.
- Highly Proficient in Implementation, Configuration, and day-to-day support of SAP R/3 (4.5B, 4.7E) ECC 5.0/6 .0 EHP, HCM, NW 04/07 EHP (EP 5.0/7.0, BI 3.5/7.0, PI 7.0, PO 7.3/7.5 MDM 5.5/7.1), ERECRUIT 600, GRC, CRM 4.0. SRM 5.0 APO 3.1, SCM 7.1, Solution Manager 3.2/7.0, WEBAS, and other SAP Components on various platforms like UNIX (IBM AIX, Sun Solaris, Linux) and Win 2003/2005/2008/2012 Server with Oracle 8i/9i/10g/11/12c and SQL Server.
- Led SAP AWS Cloud migration project by migrating all SAP systems from on-premises infrastructure to AWS Cloud. Conducted multiple Solution Workshops, whiteboard sessions etc.
- Designed & implemented solutions for multiple invoicing project including VAT, Portugal invoice.
- Proficient in Database Administration, Performance Tuning, Kernel and Support Stack Upgrade, User Administration, Spool Administration, Client Administration, System Copy, Background Job Management, TMS and having excellent troubleshooting skills.
- Performed Homogeneous System Copy, upgraded system using SUM tool.
- Security Administration: Managed SAP server's security like creating users, roles and profiles using profile generator (PFCG). Troubleshooting security related issues. Generating multiple reports for external and internal auditors as well as for SAP team. Supported audit related issues.
- Updated monthly Tax ware and Tax factory. Install and upgraded Tax factory client.
- Worked on Disaster recovery setup. Maintain and Manage data replication from Primary to standby and perform switchover/failover test.
- Performed Installation, setup, configuration of SAP HANA DB, studio and HANA client. Converted SAP ECC EHP7 to S/4 HANA successfully. Worked on implementing Fiori Apps.
- Experienced with SAP BTP. Managed user accounts at the SAP BTP subaccount level to ensure secure and efficient access control. Installed Cloud Connector. Configured with AZURE AD. Enabled & Supported BTP Integrator Suite, Knowledge of BTP Automation & API Management.
- Experienced in installation and configuration of EP 5.0, EP 7.0, Solution Manager 3.2, 4.0, 7.0.
- Experienced in setting up SSO using SAP logon ticket, UME, ESS, MSS, eRecruit, NWDI, config tool, visual admin, and log viewer. Configured Producer and Consumer Portal.
- Configured CTS+ for transporting NON-ABAP objects and XI objects (.tpz).
- Solution Manager: Configured Maintenance Optimizer & Planner, Central System Monitoring, Early watch Alert Reporting (EWA), Service Desk. Upgraded Support Stacks by using SUM and JSPM. Performed Split-up and Upgraded Solution Manager to 7.2. Configured Document management, Test Suite & Job Management tool. Installed and configured SLD, Trex, SMD and Wily Agent.
- Good understanding on SAP with RISE, GROW with SAP, SAP Cloud ALM & SAP Activate methodology. Stayed updated on SAP Public Cloud technologies, best practices, and innovations.

### **Key Accomplishment**

- Successfully Migrated complete SAP landscape (200+ Server) from On-Premises to AWS Cloud.
- Successfully migrated/upgraded SAP Oracle linux instances to oracle linux 8.
- Successfully Implemented PO Message Deletion Process & table re-organization on SAP ECC.
- Ensured all identified vulnerabilities on SAP landscape were appropriately planned and resolved in a timely manner. Mitigated 15K+ vulnerabilities across SAP landscape in a one year.
- Worked on Cost optimization projects and reduced costs on SAP infrastructure
- Successfully performed migration of SAP ECC to S/4 HANA cloud on POC instance.

### **Responsibilities**

- Maintained, Supported & upgrade SAP HCM/ ECC 6.0 EHP 6/7, BI 7.0, MDM 7.1, PI 7.1, PO 7.4/7.5 EP 7.31/7.4/7.5, SRM 5.0/7.0, SCM 7.0, & SolMan 7.0/7.2, GTS 10, xRPM 4.5, PPM 6.0, Redwood 9, Gateway 7.4, GRC, LVM 7.4, S/4 HANA 2022, Oracle 11/12/19, MaxDB, Sun Solaris, Red Hat Linux, SUSE Linux, Oracle linux, & Windows OS.
- Managed SAP technical team consisting of offshore Basis Professional. Managed and monitor progress to ensure project objectives are delivered on time.
- Design, build, assemble and configure application or technical architecture components using business requirements.
- Implemented PO Message Deletion Process & table re-organization on SAP ECC. This helped to optimize infrastructure resources. Resulted outcomes of the project save 12+ TB of space across the regions and helped to improve performance and latency.
- Led and Performed Oracle Linux Out-of-Place Upgrade (OL7 to OL8): Took charge of upgrading Oracle Linux instances from OL7 to OL8. This included hands-on tasks such as configuring and testing a proof of concept. Successfully executed the upgrade for all Sandbox, Dev, and QA instances, coordinating with cross-functional teams to ensure seamless transitions.
- Analyzed compute utilization, optimized sizing, and collaborated with business leaders to select the right cloud vendor for SAP. Planned, Architect and Migrated SAP landscape (200+ Server) from On-Premises to AWS Cloud. Worked on AWS to GCP interface by using AWS CLI & GSUTIL.
- Created and assigned custom roles. Performed SOD. Created and assigned mitigating controls upon approval. Performed SOX and auditing compliance for internal, external and SAP audit team.
- AWS optimization: Reviewed all AWS Elastic File system (EFS) and configured life cycle policy. Setup sap non-prod SSM automation. Optimized Storage and EC2 instances across SAP landscape.
- Security Vulnerability Management: Proactively implemented and performed quarterly OS patching on SAP instances via AWS Systems Manager. Took hands-on actions to review and apply recommendations from Rapid7 InsightVM, mitigate vulnerabilities (including log4j), and fix critical issues based on SAP and Digital River guidelines. Conducted annual SOX compliance audits and applied necessary changes for audit improvements.
- Designed and implemented automation for non-prod start and stop via AWS System Manager. Automation on OS patching, Host control agent update via Rundeck.
- Actively participated with DBA team in evaluating database migration tool for SAP. Performed POC on APEX DRUVA and AWS snapshot-based backup. Planned and created policy for SAP backup and migrated all SAP backup from RMAN to AWS snapshot-based backup.
- Successfully led S/4 HANA conversion to demonstrate the benefits of S/4 HANA to the business. Performed readiness check, simplifications items check, sizing. Reviewed Custom code check findings with developers. Uninstalled components which are not supported in S/4 HANA. Converted ECC to S/4 HANA. Worked on performance & tuning
- Installed S/4 HANA 2022. Administer HANA system using SAP HANA Cockpit and HANA Studio.to optimize performance and system operation. Experience with table management technique.
- Led SAP Portal modernization effort to replace legacy applications with more modern Fiori based applications. Performed gateway server upgrade, configuration and implementation of apps. Set-up

- Azure active directory integration with SAP Fiori. Performed SAML2 configuration & cert renewal.
- Designed & implemented solutions for multiple invoicing projects. Integrated SAP and third-party system for generating VAT and qualified seal Portugal pdf documents.
- Managed, Upgraded, & Supported SAP ECC EHP Upgrade Project: Actively managed the entire SAP ECC EHP upgrade process, troubleshooting and providing hands-on support for the upgraded environment. Led SAP TMS management across both cloud and on-premises landscapes to ensure smooth transport and system stability post-upgrade.
- Supported multiple modules like SD, FI, HR VISTEX, Blackline etc in SAP ECC landscape.
- Tuned SAP SD & FI-related jobs and batch processes for GL/AP & AR.
- Configured and supported integration of SAP FI with third-party financial tool as BlackLine.
- Ensured SOX compliance and audit readiness by managing SAP SD, HR & FI role-based access control (RBAC) and generating compliance reports.
- Configured SAP FI, SD & HR security roles via PFCG for SD/FI/HR Developer, analyst, financial auditors, accountants, and controllers, ensuring proper segregation of duties (SoD).
- Managed multiple priorities while ensuring alignments across cross teams.
- Diagnosed and resolved technical issues, recommended workaround and implemented solutions.
- Performed routine maintenance on SAP landscape for OS patching, systems patching and re-org.
- Managed & Supported data replication from Primary to standby and perform switchover/failover disaster recovery test. Worked on HA environment with and without cluster.
- Reviewed EWA reports, identified action items and implemented it.
- Experience with SAP BTP, Cloud Connector, Integrator Suite, Identity Access Management.
- Worked on F5/ AWS ELB/ALB, SAP Web-dispatcher for distribution load.
- Experience with multiple testing tools & ticketing systems like SAP solution manager, Atlassian JIRA, HP ALM, Service Now, SAP Service Management tool. Implemented and supported SM tool.
- Performed monitoring, workload analysis, performance tuning, HugPage Setup. Resolved Performance Issues by modifying Instance Profile Parameter, setting alert monitor thresholds, Performed SQL tuning, Memory tuning, Buffer Tuning. Updated Statistics and Rebuild Indexes.
- Performed Gold client Upgrade & HR client refresh via Qlik Gold Client. Created client in sandbox environment via Gold client with the slice of production data for S/4 HANA conversion.
- Lead solution manager upgrade project and upgraded to 7.2. Performed post upgrade steps and Implemented Solution Documentation (SolDoc). Installed and Configured SMD & Wily Agent. Configured all the systems with solution manager 7.2. Performed basic configuration for alert monitoring. Assigned template and adjusted threshold. Developed & managed monitoring script. Upgraded, Administered and supported SAP solution manager.
- Performed Capacity Planning for SAP Team. Collaborated with Development teams.
- Worked with team and developed multiple alert monitoring and preventive scripts for SAP.
- Successfully demonstrated commerce connector builds by implementing on-prem version of SAP Commerce (Hybris) 1905. Installed and configured required SAP commerce instances on-prem. Worked with multiple teams to set up load balancer, Incapsula site & firewall.
- Analyzed, Architect and upgraded PI Dual stack to PO 7.4 Java only stack. Upgrade PO 7.4 to 7.5. Configured SSL on ABAP & JAVA, SSO and load balance configuration on Portal, ECC, PO, PPM, BI and SRM servers. Updated cert on SAP router. Installed and supported Business Additional Add-ons like SFTP & B2B. Installed and set-up PGP, created key pair for encryption/de-cryption.
- Upgraded Portal to 7.4. Split-up and moved java stack content for ECC, xRPM, BI to EP.
- Managed and upgraded DB from 11.2 to 12.1.0.2 for 64 sap database servers. Performed patching on oracle 11 database by applying opatch and mopatch.
- Configure and Troubleshoot cert-based authentication. Upgraded TLS to TLS 1.2. Set-up PGP and worked on key conversion. Worked & integrated SAP into Informatica (ETL). Troubleshot and fixed integration issues from PO to Informatica, internal sftp server, bank and hr vendors.
- Designed, built and implemented Birthright roles for users. Integrated SAP systems with third party systems like AVEKSA & Sailpoint for assigning birthright roles to new users.
- Evaluated multiple scheduling software like SAP Solution manager Job management tool, Rundeck, Control-M & JAMS to migrate jobs from redwood to another scheduling tool.
- Installed, configured and integrated JAMS server with SAP & non-SAP server. Migrated successfully SAP jobs from redwood to JAMS non-prod and prod environment.

- Performed technical optimization & DVM session with SAP. Identified & implemented multiple actions which resulted in reducing DB size and improving the performance.
- Worked with SAP team and performed additional indexing for long running jobs which helped in finishing month end job faster. Configured SAMBA jobs. Worked on GDPR requirement.
- Installed and upgraded Tax factory client. Upgrade BSI tax factory to version 10. Applied Tubs and Performed cyclic upgrade as per the business requirement.
- Analyzed, downloaded and performed HR support package upgrade on entire ECC landscape.
- Configured and enabled HR My Time related CATS Web Service. Worked on LSMW
- Installed and Implemented HR Renewal 1.0 and U.S. ACA (Affordable care act) on ECC landscape. Activated required business functions. Design and created custom roles for HR Renewal.
- Worked and supported MDM 7.1 Servers. Install MDM Console. Loaded Repository.
- Actively participated in SAP migration from Sun Solaris to RedHat Linux.
- Configured TMS. Added new system to symmetry control panel. Updated license yearly.
- Worked on creating and restoring source systems connection on BW system. Experience with Split up and moving Java stack to Enterprise Portal. Automated Java stack Password reset on SAP PO.
- Added system into Portal. Configured SSO between two systems. Created JCo and Web Dynpro destination. Modified Portal XML file to configure multiple LDAP Server.
- Worked on client Administration, Client copy & Remote client copy.
- Hand-on's Security Administration like creating users, roles and profiles using profile generator (PFCG). Troubleshot security related issues. Generated multiple reports for external and internal auditors as well as for SAP team. Supported audit related issues.
- Implemented Single Sign-On (SSO) and Multi-Factor Authentication (MFA) to enhance system security. Developed and maintained security related documentation.
- Actively participated in daily system health check and worked in resolving issue.
- Installed Business Package for ESS and MSS. Installed Support Stack by using SUM and JSPM.
- Configured and Review Early watch Alert Reporting, Central System Monitoring.
- Good understanding of the network components, security groups and network security

SRG AMERICA,  
NJ

**SAP NetWeaver/Solution Manager Administrator/TDMS Specialist**  
**Client FPL (Florida Power and Light), FL**  
**Client FMC Corporation, PA**  
**Client BNSF Railway, Dallas TX.**

**Oct 2007 – oct 2009**

**Responsibilities:**

- Maintain and Supported R/3 4.7, 4.5B, ECC 6.0 (HRF System HR and FI), BI 7.0, BW 2.0, MDM 5.5, PI 7.0, mySAP SRM 5.0, Solution Manager 7.0, and APO 3.1, E-Recruiting Systems.
- Managed & setup TMS, including systems to domains, importing TPs from development to Quality, Production as per requirement. Troubleshot transport related issue.
- Performed Database Dependent Homogeneous System copy for ABAP as well as JAVA Stack by using SAPINST. Troubleshot Java Stack using config tool.
- Performed Local Client Copy on Development server by using SCCL.
- Involved in IDOC object archiving configuration on SAP HR. Creation of Logical File Path, Assignment of Physical to Logical Path, IDOC object and Variant customization by using SARA.
- Experienced with BI Cockpit: Configured BI System manually as well as by running template Installer. Installed Business Package (BP) by using JSPM.
- Live Cache Performance Monitoring and Troubleshooting, APO Consistency Check, and Monitoring CIF. Performed live cache Consistency check by using sapapo/OM17 tcode.
- Configured CCMS monitoring centrally on the solution manager. Setup alerts through auto-reaction method. Configured the printers for front-end printing using SPAD.
- Applied patches and hot fix. Mount MDM server. Loaded as well as Archived the Repository.
- Configured CTS+ for transporting NON-ABAP objects and XI objects (.tpz).
- Configured Producer and Consumer Portal. Performed BI Post installation on Producer Portal. Installed business package, Assigned User and Permission. Worked on Portal Framework, Administration of portal by using Visual Admin, Log Viewer & Config tools.

- Added Portal system to the Solution Manager. Installed and configured SMD Agent and Wily Agent on the Portal. Added Parameter through Config tool. Installed SP by using JSPM.
- Installed and Configured SAP TDMS 3.0. Maintain the same support pack for DMIS, DMIS\_CNT, DMIS\_CNT, DMIS\_EXT, DMIS\_HR on Sender, Receiver and Control System. Applied SAP Notes. Created RFC Connection. Integrated SAP system with Content Server.
- Performed System refresh using time-based scenario, HCM and Business Process Library. Performed Data Scrambling on HR Data. Resolved TDMS issue.
- Excellent in Daily Health check, system log analysis, short dump analysis, trace files analysis skill. Proficient in Troubleshooting and Tuning SAP servers.
- Analyzed & resolved SAP Basis-related tickets raised by business/end users within defined SLA.

SRG AMERICA,  
NJ  
SAKAR  
SOLUTIONS  
PUNE, INDIA

#### **SAP Basis Administrator/ Developer/DBA**

**Client: Omega Healthcare and IT Solutions**

**Client: Sakar Solutions**

**Jan 2007 – Oct 2007**

**Apr 2001 – Sep 2004**

#### **Responsibilities**

- Loaded data from flat file to Oracle database using SQL\*Loader. Performance monitoring, tuning and space management in database with Grid control. Performed Troubleshooting and system maintenance.
- Installed and Maintained SAP R/3 4.6B, 4.7E, BW 3.5, EP 5.0, BI 7.0 (ABAP+JAVA), ECC 5.0, BOBJ, GRC on Windows NT and Linux Platform.
- Responsible for Daily System Reporting for SAP R/3 and BW systems and created daily checklist for monitoring the overall system activities
- Develop, implement and test Backup and recovery strategies for development databases.
- Involved in Production Support and Operations teams to resolve production issues in a timely and efficient manner.
- User and Client administration. Carried out Client Creation (SCC4) and assigned logical system (SALE), Client Copy (SCCL) and deleted unwanted Client (SCC5)
- Involved in Performance Tuning of SAP servers, used some tcodes like SM50, SM12, DB01, ST03, ST22, SM21, DB02 and some other related codes and procedures if needed. Monitored SAP Buffer, workload analysis, operating system monitor, and CPU utilization.
- Database administration: Responsible for Database Monitoring for Space utilization using DB02 and Performed table space administration by altering data files using
- Worked on SAP GRC Access Control, Risk Analysis, and Role Management, ensuring compliance with SOX and security policies. Administered user provisioning, access requests while performing SOD analysis and audit reporting.
- Installed and Configured SAP GUI. Troubleshot SAP GUI issue.
- Installed and Configured Solution Manager 3.2. Added satellite system to Solution Manager.
- Managed SAP server's security like creating roles, creating and assigning authorizations.
- Utilized SAP PFCG to create new and modify existing SAP Security Roles/ Profiles.
- Worked on Portal Framework, Administration of portal. Visual Administration, Log Viewer, and Config tools. Troubleshot Performance issue on the Portal.
- Installed Business Package for ESS and MSS. Installed Support Stack by using JSPM.
- Installed and Configured Solution Manger 3.2. Added System to Solution Manager

#### **EDUCATION**

Master of Computer Science – University of Massachusetts, Lowell.

2005 – 2006

Bachelor of Computer Science – Amravati University, India

1996 – 2000
