

Professional Summary

Accomplished Lead Quality Engineer (SDET) with 10+ years of hands-on experience across SDLC, QA automation, and DevOps. Proven success in designing test strategies, automation frameworks, and leading QA teams for enterprise-scale applications. Expert in Java, Selenium, Rest Assured, AWS SDK, Azure SDK, Terraform and CI/CD. Adept at UI, API, DB, Mobile, and Accessibility testing, reducing defect rates, and improving delivery quality. Recognized for leadership, collaboration, and building high-performing QA teams in agile and hybrid environments.

Technical Skills

- **Programming language:** Java, shell, SQL, Infrastructure.
- **Testing Tools:** Selenium, REST ASSURED, JUnit, Cucumber, TestNG, Appium, Maven, Gradle, AWS SDK, Azure SDK, Serenity BDD, AXE (508 Compliance), Soap UI, Postman.
- **Testing Types:** Functional, Regression, Integration, Smoke, End-to-End, Performance, Accessibility, UAT
- **Methodologies:** Agile and Waterfall.
- **Repo:** Azure Dev Ops, Gitlab, wiki, confluence page.
- **CI/CD:** Jenkins, Gitlab
- **Database:** Snowflake, MySQL, AWS redshift, RDS, Dynamo DB, Microsoft SQL server, and Oracle.
- **Bug Tracking Tool:** JIRA, TFS and Rally
- **Soft Skills:** Leadership, Analytical, Multitasking, Collaborative, Emotional Intelligence, Cultural Intelligence, Positive and Friendly attitude, Active listening.
- **Cloud Platform:** AWS, Azure

Experience**ServiceNow***MO)**Remote (St. Louis,***Lead QA Engineer***Sep 2024 – present*

- Led a team of 4 QA engineers to automate internal application, reducing manual effort to bare minimum.
- Designed and implemented robust automation framework for EDI Gateway using Java, JUnit, and Serenity BDD.
- Designed and implemented multiple robust automation framework for multiple projects and departments using Java, Selenium, Cucumber and Serenity BDD which reduced manual test by 90% and increased team efficiency.
- Coordinated with multiple departments and collected requirement and delivered quality projects.
- Assisted in tool selection for JIRA based test management tool.

Flagstar*Remote (St. Louis, MO)***Lead Quality Engineer (SDET)***Aug 2023 – Sep 2024*

- Led a QE team of 5 for an internal project; created comprehensive test strategy, test plans, and automation frameworks.
- Designed and developed a robust automation framework for Functional, Regression, Integration and End to End tests using Java, Selenium (UI) and Rest Assured (API) with AWS SDK for S3, SNS, SQS, CWL, RDS, and DynamoDB.
- Built and optimized GitLab CI/CD pipelines; managed deployments to QA and CERT environments.
- Executed comprehensive testing strategies, including functional, regression, and integration testing, which reduced post-release defects by 99%.
- Designed mock data, implemented encryption/decryption testing, and executed UAT validation.
- Acted as liaison between QA, DevOps, and Development teams for sprint planning and issue triage.
- Delivered quarterly reports to senior management on automation progress, and quality metrics.

Change Health Care*St. Louis, MO***Quality Assurance Tester (SDET)***May 2020 – Aug 2023*

- Designed and implemented automation frameworks using Serenity BDD (JUnit/Cucumber) from scratch.
- Executed accessibility testing using AXE for Section 508 compliance and mobile tests with AWS Device Farm.
- Developed automation using AWS SDK for cloud resource validation and data workflows.
- Conducted ETL, API, and database validation tests for healthcare data processing systems.
- Integrated automation pipelines via Jenkins and GitLab CI/CD, improving test coverage by 90%.
- Collaborated with developers, business analysts, and stakeholders to drive product quality.
- Led QA efforts for AWS migration and legacy system modernization.

Pet Supermarket - Sunrise, FL

Oct 2018 – April 2020

Senior Quality Engineer

- Developed hybrid automation frameworks (Page Object, Data-Driven, Keyword-Driven) using Java, Selenium WebDriver, and TestNG.
- Automated highly transactional web applications and integrated test execution into Jenkins CI/CD pipelines.
- Performed functional, regression, database, and ETL testing for web and mobile applications using Appium and UNIX scripting.
- Created and maintained automation scripts for Scrum stories, ensuring consistent coverage across Agile sprints.
- Executed API and backend validation using SOAP UI and SQL queries, ensuring data accuracy and integrity.
- Implemented Protractor for JavaScript-based UI testing and TestNG for performance and functional validation.
- Validated ETL Informatica workflows and automated data flow control through UNIX shell scripts.
- Collaborated with cross-functional teams on test planning, risk assessment, and user acceptance testing (UAT).
- Tracked defects in JIRA and ensured timely triage and resolution through continuous feedback loops.

Kaiser Permanente - Pleasanton, CA

May 2016 – Oct 2018

Automation Engineer

- Developed automation framework in Selenium WebDriver using a Behavior Driven Development (BDD) approach with Cucumber and TestNG.
- Created and executed test plans, test scenarios, and automated regression test suites using Java, Maven, and JUnit.
- Performed functional, regression, integration, and cross-platform testing across web applications and browsers.
- Automated and validated SOAP and RESTful APIs using SOAP UI, Apache HTTP Client, and XML parsers.
- Executed backend data validation with SQL queries, ensuring end-to-end data integrity across systems.
- Configured Jenkins CI/CD pipelines to trigger automated test executions and generate detailed reports.
- Collaborated with Agile teams in sprint ceremonies, providing test coverage updates and QA sign-offs.
- Implemented logging and error tracking via Log4J and reported defects using JIRA for efficient triage.
- Authored reusable Java libraries to support data-driven and modular automation.
- Trained new QA team members on Selenium best practices and framework usage, improving team efficiency.

Career Soft Solutions*Edison, New Jersey***QA Tester (Internship)***Jan 2015-April 2016*

- Created and executed test cases based on Business Requirement Documents and user stories in Jira.
- Automated regression and smoke tests with Selenium WebDriver and TestNG.
- Performed manual and API testing (Postman) and verified database integrity using SQL queries.
- Prepared detailed test summary reports and participated in release readiness reviews.

Hobbies and Interests:

Learning new technology through online training sessions.

Enjoy playing football, pickle ball, running and going to the gym.

Volunteer at local charitable events like St. Louis foodbank, Zoos, Give Kids a smile, and other community service events.

Volunteer for coaching at North County Empower soccer.

Travelling and Meditations.

Languages:

English, Hindi, and Bengali
